Contents

Part 1. Wavelet Theory

Chapter 1: Approximation and Fourier Analysis
Local Smoothness Conditions on a Function Which Guarantee Convergence of Double Walsh-Fourier Series of This Function
S.K. Bloshanskaya and I.L. Bloshanskii .................................................. 3
Linear Transformations of $\mathbb{R}^N$ and Problems of Convergence of Fourier Series of Functions Which Equal Zero on Some Set
I.L. Bloshanskii ...................................................................................... 13
Sidon Type Inequalities for Wavelets
N.A. Sheikh ......................................................................................... 25
Almansi Decomposition for Dunkl-Helmholtz Operators
G. Ren and H.R. Malonek ................................................................. 35
An Uncertainty Principle for Operators
M.G. Cowling and M. Sundari .......................................................... 43
Uncertainty Principle for Clifford Geometric Algebras $Cl_{n,0}$, $n = 3 \pmod{4}$ Based on Clifford Fourier Transform
E.S.M. Hitzer and B. Mawardi ............................................................ 47

Chapter 2: Construction of Wavelets and Frame Theory
Orthogonal Wavelet Vectors in a Hilbert Space
H.-X. Cao and B.-M. Yu ..................................................................... 59
Operator Frames for $B(\mathcal{H})$
C.-Y. Li and H.-X. Cao .................................................................... 67
On the Stability of Multi-wavelet Frames
G. Wang and Z. Cheng ..................................................................... 83
Biorthogonal Wavelets Associated with Two-Dimensional Interpolatory Function
J. Yang, Y.Y. Tang, Z. Cheng and X. You ........................................ 91
Parameterization of Orthogonal Filter Bank with Linear Phase
X. Feng, Z. Cheng and Z. Yang .......................................................... 99

Signal-Adaptive Aeroelastic Flight Data
Analysis with HHT
M.J. Brenner, S.L. Kukreja and R.J. Prazenica .......................... 321

An Adaptive Data Analysis Method for Nonlinear
and Nonstationary Time Series: The Empirical Mode Decomposition
and Hilbert Spectral Analysis
N.E. Huang ................................................................. 363

Part 2. Wavelet Applications

Transfer Colors from CVHD to MRI Based on Wavelets Transform
X. Tian, X. Li, Y. Sun and Z. Tang ....................................... 381

Medical Image Fusion by Multi-resolution Analysis of Wavelets Transform
X. Li, X. Tian, Y. Sun and Z. Tang ....................................... 389

Salient Building Detection from a Single Nature Image
via Wavelet Decomposition
Y. Qu, C. Li, N. Zheng, Z. Yuan and C. Ye ............................... 397

SAR Images Despeckling via Bayesian Fuzzy Shrinkage Based
on Stationary Wavelet Transform
Y. Wu, X. Wang and G. Liao ............................................... 407

Super-Resolution Reconstruction Using Haar Wavelet Estimation
C.S. Tong and K.T. Leung .................................................. 419

The Design of Hilbert Transform Pairs
in Dual-Tree Complex Wavelet Transform
F. Yan, L. Cheng and H. Wang .......................................... 431

Supervised Learning Using Characteristic Generalized Gaussian Density
and Its Application to Chinese Materia Medica Identification
S.K. Choy and C.S. Tong .................................................. 443

A Novel Algorithm of Singular Points Detection for Fingerprint Images
T. Tan and J. Huang ......................................................... 453

Wavelet Receiver: A New Receiver Scheme for Doubly-Selective Channels
G. Shi and S. Peng .......................................................... 463

Face Retrieval with Relevance Feedback Using Lifting Wavelets Features
C.F. Wong, J. Zhu, M.I. Vai, P.U. Mak and W. Ye .................. 477
High-Resolution Image Reconstruction Using Wavelet Lifting Scheme
S. Pei, H. Feng and M. Du .......................................................... 489

Multiresolution Spatial Data Compression Using Lifting Scheme

Ridgelet Transform as a Feature Extraction Method
in Remote Sensing Image Recognition
Y. Ren, S. Wang, S. Yang and L. Jiao ........................................... 515

Analysis of Frequency Spectrum for Geometric Modeling
in Digital Geometry
Z. Cai, H. Ma, W. Sun and D. Qi ................................................ 525

Detection of Spindles in Sleep EEGs Using a Novel Algorithm Based
on the Hilbert-Huang Transform
Z. Yang, L. Yang and D. Qi ....................................................... 543

Wavelet-Domain Hidden Markov Tree Model with Localized Parameters
for Image Denoising
M. Yang, Z. Xiao and S. Peng .................................................. 561
Wavelet Analysis and Applications
Qian, T.; Vai, M.I.; Xu, Y. (Eds.)
2007, XIV, 574 p., Hardcover
ISBN: 978-3-7643-7777-9
