Preface	xi
I Preliminaries	
1 Regular and Singular Perturbations	3
2 Evolution Equations in Hilbert Spaces	17
II Singularly Perturbed Hyperbolic Problems	
3 Presentation of the Problems	37
4 Hyperbolic Systems with Algebraic Boundary Conditions	
4.1 A zeroth order asymptotic expansion	44
4.2 Existence, uniqueness and regularity of the solutions of problems P_ε and P_0	46
4.3 Estimates for the remainder components	59
5 Hyperbolic Systems with Dynamic Boundary Conditions	
5.1 A first order asymptotic expansion for the solution of problem (LS) , (IC) , $(BC.1)$	66
5.1.1 Formal expansion	67
5.1.2 Existence, uniqueness and regularity of the solutions of problems P_ε , P_0 and P_1	70
5.1.3 Estimates for the remainder components	79
5.2 A zeroth order asymptotic expansion for the solution of problem (NS) , (IC) , $(BC.1)$	83
5.2.1 Formal expansion	84

5.2.2	Existence, uniqueness and regularity of the solutions of problems P_ε and P_0	85
5.2.3	Estimates for the remainder components	91
5.3	A zeroth order asymptotic expansion for the solution of problem (NS) , (IC) , $(BC.2)$	96
5.3.1	Formal expansion	96
5.3.2	Existence, uniqueness and regularity of the solutions of problems P_ε and P_0	97
5.3.3	Estimates for the remainder components	102
5.4	A zeroth order asymptotic expansion for the solution of problem $(LS)'$, (IC) , $(BC.1)$	105
5.4.1	Formal expansion	106
5.4.2	Existence, uniqueness and regularity of the solutions of problems P_ε and P_0	107
5.4.3	Estimates for the remainder components	109

III Singularly Perturbed Coupled Boundary Value Problems

6	Presentation of the Problems	113
7	The Stationary Case	
7.1	Asymptotic analysis of problem $(P.1)_\varepsilon$	119
7.1.1	Higher order asymptotic expansion	122
7.1.2	Existence, uniqueness and regularity of the solutions of problems $(P.1)_\varepsilon$ and $(P.1)_k$	124
7.1.3	Estimates for the remainder components	127
7.2	Asymptotic analysis of problem $(P.2)_\varepsilon$	130
7.2.1	First order asymptotic expansion	130
7.2.2	Existence, uniqueness and regularity of the solutions of problems $(P.2)_\varepsilon$, $(P.2)_0$ and $(P.2)_1$	132
7.2.3	Estimates for the remainder components	134
7.3	Asymptotic analysis of problem $(P.3)_\varepsilon$	137
7.3.1	Formal expansion	137
7.3.2	Existence, uniqueness and regularity of the solutions of problems $(P.3)_\varepsilon$ and $(P.3)_0$	138
7.3.3	Estimates for the remainder components	141

8 The Evolutionary Case

8.1 A first order asymptotic expansion for the solution of problem $(P.1)_\varepsilon$ 145

8.1.1 Formal expansion 145

8.1.2 Existence, uniqueness and regularity of the solutions of problems $(P.1)_\varepsilon$, $(P.1)_0$ and $(P.1)_1$ 147

8.1.3 Estimates for the remainder components 156

8.2 A first order asymptotic expansion for the solution of problem $(P.2)_\varepsilon$ 161

8.2.1 Formal expansion 161

8.2.2 Existence, uniqueness and regularity of the solutions of problems $(P.2)_\varepsilon$, $(P.2)_1$ and $(P.2)_0$ 163

8.2.3 Estimates for the remainder components 169

8.3 A zeroth order asymptotic expansion for the solution of problem $(P.3)_\varepsilon$ 173

8.3.1 Formal expansion 173

8.3.2 Existence, uniqueness and regularity of the solutions of problems $(P.3)_\varepsilon$ and $(P.3)_0$ 174

8.3.3 Estimates for the remainder components 177

IV Elliptic and Hyperbolic Regularizations of Parabolic Problems

9 Presentation of the Problems 181

10 The Linear Case

10.1 Asymptotic analysis of problem $(P.1)_\varepsilon$ 187

10.1.1 N th order asymptotic expansion 187

10.1.2 Existence, uniqueness and regularity of the solutions of problems $(P.1)_\varepsilon$ and $(P.1)_k$ 189

10.1.3 Estimates for the remainder 192

10.2 Asymptotic analysis of problem $(P.2)_\varepsilon$ 195

10.2.1 N th order asymptotic expansion 196

10.2.2 Existence, uniqueness and regularity of the solutions of problems $(P.2)_\varepsilon$ and $(P.2)_k$ 197

10.2.3 Estimates for the remainder 197

10.3 Asymptotic analysis of problem $(P.3)_\varepsilon$ 199

10.3.1 N th order asymptotic expansion 199

10.3.2 Existence, uniqueness and regularity of the solutions of problems $(P.3)_\varepsilon$ and $(P.3)_k$ 200

10.3.3	Estimates for the remainder	203
10.4	An Example	204
11	The Nonlinear Case	
11.1	Asymptotic analysis of problem $(P.1)_\varepsilon$	211
11.1.1	A zeroth order asymptotic expansion for the solution of problem $(P.1)_\varepsilon$	211
11.1.2	Existence, uniqueness and regularity of the solutions of problems $(P.1)_\varepsilon$ and P_0	211
11.1.3	Estimates for the remainder	214
11.2	Asymptotic analysis of problem $(P.2)_\varepsilon$	216
11.2.1	A first order asymptotic expansion for the solution of problem $(P.2)_\varepsilon$	216
11.2.2	Existence, uniqueness and regularity of the solutions of problems $(P.2)_\varepsilon$, P_0 and $(P.2)_1$	217
11.2.3	Estimates for the remainder	219
11.3	Asymptotic analysis of problem $(P.3)_\varepsilon$	221
11.3.1	A first order asymptotic expansion	221
11.3.2	Existence, uniqueness and regularity of the solutions of problems $(P.3)_\varepsilon$, P_0 and $(P.3)_1$	222
11.3.3	Estimates for the remainder	224
	Bibliography	227
	Index	231
