## Contents

Introduction .............................................................. vii

**T. Antunović and I. Veselić**  
Spectral Asymptotics of Percolation Hamiltonians  
on Amenable Cayley Graphs ........................................... 1

**B.M. Brown and R. Weikard**  
On Inverse Problems for Finite Trees ............................... 31

**E.V. Cheremnikh**  
Wave Operators for Nonlocal Sturm-Liouville Operators  
with Trivial Potential ................................................ 49

**M. Combescure**  
Semiclassical Results for Ideal Fermion Systems. A Review ....... 69

**J. Dereziński**  
Quadratic Hamiltonians and Their Renormalization ............... 89

**J. Dombrowski**  
Jacobi Matrices: Eigenvalues and Spectral Gaps .................. 103

**R.L. Frank and A.M. Hansson**  
Eigenvalue Estimates for the Aharonov-Bohm Operator  
in a Domain .......................................................... 115

**F. Gesztesy, H. Holden, J. Michor and G. Teschl**  
The Ablowitz–Ladik Hierarchy Revisited ........................... 139

**F. Gesztesy, M. Mitrea and M. Zinchenko**  
On Dirichlet-to-Neumann Maps and Some Applications  
to Modified Fredholm Determinants ................................ 191

**D.J. Gilbert, B.J. Harris and S.M. Riehl**  
Higher Derivatives of Spectral Functions Associated  
with One-dimensional Schrödinger Operators ....................... 217
