Contents

Preface xi
Introduction 1

I Analysis of Nonlocal Elliptic Operators 3

1 Nonlocal Functions and Bundles 5
  1.1 Group Algebras and Crossed Products 5
  1.1.1 Group Algebras 5
  1.1.2 $C^*$-Crossed Products 7
  1.1.3 Isomorphism Theorem 11
  1.1.4 Smooth Crossed Products 13
    Motivation 13
    Sufficient Condition for Locality 14
    Groups of Polynomial Growth 15
    Tempered Actions 16
    Schweitzer theorem 17
  1.2 Nonlocal Functions 18
    1.2.1 Assumptions about the Group $\Gamma$ 18
    1.2.2 Continuous Nonlocal Functions 18
      Nonlocal Functions as Operators in $L^2$ 19
      Changes of Variables and Substitutions 19
    1.2.3 Smooth Nonlocal Functions 20
  1.3 Nonlocal Bundles 22
  1.4 Case of Noncompact Spaces 22
    1.4.1 Nonlocal Functions 23
    1.4.2 Special Noncompact Manifolds 24

2 Nonlocal Elliptic Operators 27
  2.1 Scalar Operators 27
    2.1.1 Symbol Algebras 27

## Contents

9.5 Proofs of Auxiliary Statements ........................................ 108  
  9.5.1 Multiplicativity of the Chern Character ...................... 108  
    Case 1. Compact Manifold .................................... 108  
    Case 2. Noncompact Manifold ................................. 110  
  9.5.2 Chern Character of the Symbol of the Euler Operator ....... 114  

10 Cohomological Formula for the $\Lambda$-Index .................... 115  
  10.1 Noncommutative Differential Forms ............................ 116  
  10.2 Graded Traces over $\Lambda^\infty$ .......................... 117  
    10.2.1 Cohomology of Groups ................................ 118  
    10.2.2 Construction of Traces ................................ 119  
    10.2.3 Examples ............................................ 119  
      Traces of Degree 0 ....................................... 119  
      Trace of Degree 1 for the Group $\mathbb{Z}$ ............... 120  
      Trace of Degree 2 for the Group $\mathbb{Z}^2$ ............ 120  
  10.3 Graded Traces over $C^\infty(X) \rtimes \Gamma$ ............... 120  
  10.4 Chern Character and the Index Formula ...................... 122  
    10.4.1 Chern Character ..................................... 122  
    10.4.2 Index Formula ....................................... 123  
    10.4.3 Proofs of Auxiliary Statements ....................... 123  

11 Index of Nonlocal Operators over $C^\ast$-Algebras .............. 127  
  11.1 Classification of Nonlocal Elliptic Operators ................ 128  
    11.1.1 Ell-Group ......................................... 128  
    11.1.2 Difference Construction .............................. 128  
    11.1.3 Isomorphism of the Groups Ell and $K$ ................ 128  
    11.1.4 Künneth Formula and Classification Modulo Torsion .... 129  
  11.2 Chern Character and the Index Theorem ...................... 130  
    11.2.1 Chern Character ..................................... 130  
    11.2.2 Index Theorem ....................................... 131  
      Case 1. Product of Elements of Even $K$-Groups ......... 131  
      Case 2. Product of Elements of Odd $K$-Groups ............ 132  

III Examples ........................................................................ 137  

12 Index Formula on the Noncommutative Torus ....................... 139  
  12.1 Operators on the Noncommutative Torus ..................... 139  
  12.2 Index Computation ......................................... 140  
    12.2.1 Reduction to the Two-Dimensional Torus ............. 140  
    12.2.2 Index of Operators on the 2-Torus ................. 141  
  12.3 Special Cases ............................................ 142
Contents

13 An Application of Higher Traces 145
  13.1 Index with Values in Odd K-Groups .......................... 145
  13.2 Odd Index Formula ............................................ 146
    13.2.1 Suspension ................................................ 147
    13.2.2 Index Theorem ............................................ 147
      Step 1. Reduction to the Cosphere Bundle and the Chern-
               Simons Character ...................................... 148
      Step 2. Desuspension and Integration over $S^1$ .............. 148
  13.3 Example of $\Lambda$-Index Computation ...................... 149

14 Index Formula for a Finite Group $\Gamma$ 153
  14.1 Trajectory Symbol ............................................. 153
  14.2 Index Formula .................................................. 154

IV Appendices 157

A $C^*$-Algebras 161
  A.1 Basic Notions .................................................... 161
    A.1.1 Definitions and Examples ................................ 161
    A.1.2 Unital Algebras and Units ................................ 162
    A.1.3 Homomorphisms, Ideals, Quotient Algebras, and Extensions 163
    A.1.4 Commutative $C^*$-Algebras ................................ 165
    A.1.5 Spectrum and Functional Calculus .......................... 165
    A.1.6 Local $C^*$-Algebras ...................................... 167
    A.1.7 Positive Elements .......................................... 167
    A.1.8 Projections in $C^*$-Algebras .............................. 168
  A.2 Representations of $C^*$-Algebras ........................... 169
    A.2.1 Basic Definitions ........................................... 169
    A.2.2 Existence of Representations .............................. 172
    A.2.3 Representations of Ideals and Quotient Algebras .......... 173
    A.2.4 Primitive Ideals ............................................ 174
    A.2.5 Algebras of Type I ......................................... 175
  A.3 Tensor Products and Nuclear Algebras ......................... 176
    A.3.1 Minimal and Maximal Tensor Products ...................... 176
    A.3.2 Nuclear Algebras .......................................... 177
    A.3.3 Primitive Ideals in the Tensor Product ................... 178

B $K$-Theory of Operator Algebras 179
  B.1 Covariant $K$-Theory ............................................ 179
    B.1.1 Topological $K$-Theory ................................... 179
    B.1.2 Group $K_0(A)$ ............................................ 182
    B.1.3 Group $K_1(A)$ ............................................ 184
    B.1.4 Bott Periodicity .......................................... 186
Elliptic Theory and Noncommutative Geometry
Nonlocal Elliptic Operators
