Preface .............................................................................................................. V

Introduction: From Specific Industrial Cases to a General Economic Model?
Alberto Quadrio Curzio and Marco Fortis ...................................................... 1

I. Complexity and Economic Dynamics

What is Complexity?
Murray Gell-Mann ....................................................................................... 13

Complex Adaptive Systems and Spontaneous Emergence
John H. Holland .............................................................................................. 25

The Industrial Cluster as a Complex Adaptive System
Enzo Rullani ..................................................................................................... 35

II. General Models of Industrial Cluster Dynamics

Complexity and Local Interactions: Towards a Theory of Industrial Districts
David A. Lane ................................................................................................. 65

From Marshall’s to the Italian “Industrial Districts”. A Brief Critical Reconstruction
Giacomo Becattini ............................................................................................. 83

Diversity, not Specialization: The Ties That Bind the (New) Industrial District
Charles F. Sabel .............................................................................................. 107

Competitive and Synergic Behaviours in the Development of Industrial Clusters: Ecological Modelling and Empirical Evidence
Marco Fortis and Mario A. Maggioni ............................................................... 123

On the Ubiquitous Nature of Agglomeration Economies and Their Diverse Determinants: Some Notes
Giulio Bottazzi, Giovanni Dosi and Giorgio Fagiolo ........................................ 167
III. Success Cases Around the World

The Entrepreneurial Spark: Individual Agents and the Formation of Innovative Clusters
_Maryann P. Feldman and Johanna Francis_ ...................................................... 195

From Exogenous to Endogenous Local Development: The Cases of the Toulouse and Sophia Antipolis Technopoles
_Christian Longhi_ ...................................................................................... 213

Biotechnology Development in Germany: The Case of Nordrhein-Westfalen
_Francesco Salamini, Anke Sohn and Hartmut Thomas_ ..................... 239

Support for Technology-Based Firms: The Role Played by Property-Based Science Parks
_Don Siegel, Paul Westhead and Mike Wright_ ........................................ 249

High-tech Industrial Clusters in the Asian Countries: The Case of the Electronics Industry in the Hsinchu-Taipei Region
_Kung Wang_ ..................................................................................... 267

Financial Markets, Industrial Clusters and Small and Medium-size Enterprises
_Angelo Tantazzi_ .................................................................................. 291

List of Authors ...................................................................................... 303
Complexity and Industrial Clusters
Dynamics and Models in Theory and Practice
Quadrio Curzio, A.; Fortis, M. (Eds.)
2002, VIII, 308 p., Softcover
ISBN: 978-3-7908-1471-2
A product of Physica-Verlag Heidelberg
