Contents

Foreword
 M.M. Gupta v

Preface
 C. Zhou, D. Maravall and D. Ruan vii

Part 1: Basic Principles and Methodologies 1

Where is Knowledge in Robotics? Some Methodological Issues on Symbolic and Connectionist Perspectives of AI 3
 J. Mira and A.E. Delgado

Introduction to Fusion Based Systems - Contributions of Soft Computing Techniques and Application to Robotics 35
 M. Ouussalah

Part 2: Planning and Navigation 73

Applied Soft Computing Strategies for Autonomous Field Robotics 75

Integration of Reactive Utilitarian Navigation and Topological Modeling 103
 J. de Lope and D. Maravall

Line-Crawling Robot Navigation: A Rough Neurocomputing Approach 141
 J.F. Peters, T.C. Ahn, M. Borkowski, V. Degtyaryov and S. Ramanna
Hierarchical Planning in a Mobile Robot for Map Learning and Navigation  
C. Urdiales, A. Bandera, E. Pérez, A. Poncela and F. Sandoval

An Analytical Method for Decomposing the External Environment Representation Task for a Robot with Restricted Sensory Information  
F. de la Paz, J.R. Álvarez and J. Mira

Evolutionary Artificial Potential Field – Applications to Mobile Robot Path Planning  
P. Vadakkepat, T.H. Lee and L. Xin

Part 3: Learning, Adaptation and Control

Using Hierarchical Fuzzy Behaviors in the RoboCup Domain  
A. Saffiotti and Z. Wasik

A Bio-Inspired Robotic Mechanism for Autonomous Locomotion in Unconventional Environments  
D. Maravall and J. de Lope

Online Learning and Adaptation for Intelligent Embedded Agents Operating in Domestic Environments  
H. Hagras, V. Callaghan, M. Colley, G. Clarke and H. Duman

Integration of Soft Computing Towards Autonomous Legged Robots  
A. Wong and M.H. Ang Jr

Grasp Learning by Active Experimentation Using Continuous B-Spline Model  
J. Zhang and B. Rössler

Online Adaptive Fuzzy Neural Identification and Control of Nonlinear Dynamic Systems  
M.J. Er and Y. Gao

Hybrid Fuzzy Proportional-Integral plus Conventional Derivative Control of Robotics Systems  
M.J. Er and Y. L. Sun
Part 4: Vision and Perception

Robot Vision Using Cellular Neural Networks
  M. Balsi and X. Vilasís-Cardona

Multiresolution Vision in Autonomous Systems
  P. Camacho, F. Arrebola and F. Sandoval

A Computer Vision Based Human-Robot Interface
  J. M. Buenaposada and L. Baumela

Subject Index

Contributors
Autonomous Robotic Systems
Soft Computing and Hard Computing Methodologies
and Applications
Zhou, C.; Maravall, D.; Ruan, D. (Eds.)
2003, XIII, 500 p. 12 illus. in color., Hardcover
ISBN: 978-3-7908-1546-7
