Foreword.....	V
Abstract, Preface and Acknowledgement.....	VII
1 Introduction.....	1
1.1 Introduction.....	1
1.2 Financial System and Issues.....	2
1.3 Characteristics of the Emerging Stock Markets in Developing Countries... 3	3
1.4 Financial Econometrics: Methods and Models.....	5
1.5 The Thai Financial System and the Emerging Stock Market.....	5
1.6 Limitations of Existing Literature and the Motivation.....	6
1.7 The Objectives of the Study.....	7
1.7.1 Objectives.....	7
1.7.2 Welfare Economics of Finance: Policies and Institutions.....	7
1.8 Contributions of this Research.....	8
1.9 Econometric Methodologies and Sources of Data.....	8
1.9.1 Econometric Methodologies.....	8
1.9.2 Sources of Data and Computer Programs.....	9
1.10 Structure of the Book.....	10
1.10.1 Chapter Structure.....	10
1.10.2 General Structure.....	11
2 The Thai Financial System: Characteristics of the Emerging Thai Stock Market.....	13
2.1 Introduction.....	13
2.2 Financial and Capital Markets.....	13
2.2.1 The Central Bank and Commercial Bank.....	15
2.2.2 Money and Capital Markets.....	16
2.2.3 Foreign Exchange Market.....	17
2.2.4 Stock Market: General Characteristics.....	18
2.3 Recent Issues.....	21
2.3.1 Financial Liberalisation.....	21
2.3.2 Economic Crisis.....	21
2.3.3 Focus on Foreign Capital Flows.....	22
2.3.4 Unstable Exchange Rate in an Open Economy.....	22
2.3.5 Market Imperfection.....	23

2.4 Conclusions	23
3 Descriptive Statistics and General Characteristics of the Stock Market	25
3.1 Introduction	25
3.2 Descriptive Statistics	25
3.3 Univariate Time Series Modelling.....	31
3.3.1 Moving Average	33
3.3.2 Exponential Smoothing.....	36
3.3.3 Holt Winters' Multiplicative Method.....	44
3.3.4 ARIMA Models	49
3.5 Implications and Empirical Characteristics	50
3.6 Conclusion.....	51
4 Market Efficiency Models and Tests	53
4.1 Introduction	53
4.2 Market Efficiency Hypothesis	54
4.2.1 The Concept.....	54
4.2.2 EMH and Time Series Behaviour	56
4.3 Stock Market Efficiency Tests	58
4.3.1 Run Test.....	58
4.3.2 Autocorrelation Function Test	60
4.4 The Market Efficiency of the Thai Financial System.....	62
4.5 Conclusions	63
5 Stock Valuation Models.....	65
5.1 Introduction	65
5.2 Literature Review: Why a Multifactor Model?	66
5.2.1 The Rational Valuation Model.....	66
5.2.2 Capital Asset Pricing Model (CAPM)	68
5.2.3 The Arbitrage Pricing Theory	74
5.2.4 Estimation of the Valuation Model.....	76
5.2.5 Limitation of Current Models	76
5.2.6 Relation between Macroeconomic Factors and Stock Prices	77
5.3 Models, Econometrics Methodology and Data.....	77
5.3.1 Variable Selection, Macroeconomic and International Factors	77
5.3.2 Multi-Factor Model.....	80
5.3.3 Data	80
5.4 Results and Implications for Valuation	81
5.4.1 Unit Root and Cointegration Test	81
5.4.2 The Factors Determining the Values of the Stocks.....	86
5.5 Cointegration Test of the Six-Variable Model	87
5.6 The Real Value of Stocks	88
5.7 Conclusions	88
6 Models for Rational Speculative Bubbles	91
6.1 Introduction	91

6.2 Rational Speculative Bubbles and Financial Market Behaviour.....	92
6.2.1 The Concept of Bubbles.....	92
6.2.2 Issues about Bubbles.....	93
6.3 Different Models.....	94
6.4 Adopted Models.....	96
6.4.1 Discrete Log Logistic Model.....	96
6.4.2 Weibull Hazard Model.....	96
6.5 Data and Empirical Results.....	97
6.6 Rational Speculative Bubbles in the Thai Stock Market.....	103
6.7 Conclusions.....	106
7 Models for Anomalies Studies.....	107
7.1 Introduction.....	107
7.2 Anomalies in the Stock Market.....	107
7.3 Tests of Anomalies in the Thai Stock Market.....	108
7.3.1 The Day of the Week Effect.....	108
7.3.2 The January Effect.....	109
7.4 Empirical Results.....	109
7.4.1 The Day of the Week Effect.....	109
7.4.2 The January Effect.....	117
7.5 Anomalies in the Thai Stock Market.....	119
7.6 Anomalies and Investors Motives.....	121
7.7 Conclusions.....	122
8 Volatility Models.....	123
8.1 Introduction.....	123
8.2 Models for Volatility.....	124
8.2.1 Autoregressive Conditional Heteroscedasticity (ARCH) Models....	124
8.2.2 Autoregressive Moving Average (ARMA) Models.....	128
8.2.3 Stochastic Volatility (SV) Models.....	128
8.3 Adopted Volatility Models – GARCH Type Models.....	129
8.3.1 GARCH(p,q).....	130
8.3.2 EGARCH.....	131
8.3.3 GARCH-M.....	132
8.3.4 GJR-GARCH.....	132
8.3.5 PGARCH.....	133
8.4 Data and Estimation Results.....	134
8.5 Volatility in the Thai Stock Market.....	145
8.6 Conclusions.....	146
9 Summary and Conclusions.....	147
9.1 Introduction.....	147
9.2 Major Empirical Finance Findings.....	148
9.3 The Empirical Characteristics of the Stock Market.....	148
9.3.1 Efficiency.....	148
9.3.2 Valuation.....	148

9.3.3 Rational Speculative Bubbles	149
9.3.4 Anomalies	149
9.3.5 Volatility	149
9.3.6 Other Characteristics.....	149
9.4 Welfare Economics of the Financial System: Institutions and Policies...	150
9.5 Financial Econometrics: Modelling and Applications.....	152
9.6 Future Research.....	152
9.7 Conclusions	153
Appendix 1 Structure of Financial Institutions in Thailand	155
Appendix 2 Market Efficiency and ARIMA Test Results	156
Appendix 3 Regression Test Results.....	161
Appendix 4 Day of the Week and January Effect Test Results.....	167
List of Figures	183
List of Tables	185
List of Appendices	187
Bibliography	189
Index	199
About the Authors.....	201
