

Contents

1	Introduction	1
Part I Financial Formulas		
2	Simple Interest and Discount	5
2.1	Simple Interest	5
2.2	Calendar Conventions	7
2.3	Simple Interest with Principals Credited <i>m</i> thly	9
2.4	Simple Discount	9
	Further Reading	10
3	Compound Interest and Discount	11
3.1	Compound Interest	11
3.2	Compound Discount	12
3.3	Compound Interest and Discount Convertible <i>m</i> thly	13
3.4	Combination of Simple and Compound Interest	15
	Further Reading	16
4	Continuous Interest and Discount	17
	Further Reading	19
5	Classical Analysis of Interest Rates	21
5.1	Risk-Free Interest Rate and Real Interest Rate	21
5.2	Term Structure of Interest Rates	23
	Further Reading	24
6	Systems of Cash Flows	25
6.1	Present and Future Value	25
6.2	Internal Rate of Return	28
6.3	Payback Period	30
6.4	Duration	31
6.5	Convexity	33
	Further Reading	34

7	Annuities	35
7.1	Annuity Calculus	36
7.2	Dynamic Annuities	40
7.3	Annuities Payable <i>m</i> thly	44
7.4	Continuously Payable Annuities	45
7.5	Amortization of Debt	46
	Further Reading	48
8	Depreciation	51
	Further Reading	53
9	Financial Instruments	55
9.1	Discount Securities	55
9.2	Bonds	57
9.3	Stocks	65
9.4	Currencies	71
	Further Reading	71
10	Derivative Securities	73
10.1	General Classification	73
10.2	Forwards	74
10.3	Futures	78
10.4	Swaps	80
10.5	Options	81
	Further Reading	89
11	Utility Theory	91
	Further Reading	93
12	Rate of Return and Financial Risk	95
12.1	Rate of Return	95
12.2	Financial Risk	98
12.3	Value at Risk VaR	102
12.4	Credit at Risk CaR	105
	Further Reading	107
13	Portfolio Analysis and CAPM Model	109
13.1	Construction of Portfolio	109
13.2	Portfolio with a Risk-Free Asset	114
13.3	CAPM Model	116
	Further Reading	118
14	Arbitrage Theory	119
	Further Reading	122
15	Financial Stochastic Analysis	123
15.1	Wiener Process in Finance	123
15.2	Poisson Process in Finance	125
15.3	Ito Stochastic Integral	126

- 15.4 Stochastic Differential Equations SDE 128
- 15.5 Ito’s Lemma 129
- 15.6 Girsanov Theorem on Equivalent Martingale Probability . . . 130
- 15.7 Theorem on Martingale Representation 132
- 15.8 Derivatives Pricing by Means of Equivalent Martingale
Probabilities 132
- 15.9 Derivatives Pricing by Means of Partial Differential
Equations PDE 134
- 15.10 Term Structure Modeling 135
- Further Reading 139

Part II Insurance Formulas

- 16 Insurance Classification 143**
 - Further Reading 148
- 17 Actuarial Demography 149**
 - 17.1 Selected Population Indicators 149
 - 17.2 Life Tables 153
 - 17.3 Mortality and Survival Modeling 157
 - 17.4 Multiple Decrement Models 161
 - 17.5 Multiple Life Functions 162
 - 17.6 Commutation Functions 162
 - Further Reading 164
- 18 Classical Life Insurance 165**
 - 18.1 Basic Concepts of Life Insurance 165
 - 18.2 Symbols and Calculation Principles of Life Insurance 167
 - 18.3 Technical Provisions in Life Insurance 170
 - 18.4 Pure Endowments 174
 - 18.5 Whole Life and Term Insurance 175
 - 18.6 Further Products of Capital Life Insurance 180
 - 18.7 Life Annuities 183
 - 18.8 Multiple Life Insurance 189
 - 18.9 Premium Reserve and Its Implications 190
 - 18.10 Medical Underwriting 192
 - Further Reading 193
- 19 Modern Approaches to Life Insurance 195**
 - 19.1 Critical Illness Insurance 195
 - 19.2 Flexible Products of Life Insurance 197
 - 19.3 Unit Linked 198
 - 19.4 Profit Testing 201
 - 19.5 Embedded Value 203
 - 19.6 Fair Value 205
 - Further Reading 207

- 20 Pension Insurance** 209
 - 20.1 Basic Concepts of Pension Insurance 209
 - 20.2 Defined Contribution Plan 211
 - 20.3 Defined Benefit Plan 213
 - Further Reading 217
- 21 Classical Non-Life Insurance** 219
 - 21.1 Basic Concepts of Non-Life Insurance 219
 - 21.2 Premium Calculations in Non-Life Insurance 222
 - 21.3 Forms of Non-Life Insurance and Deductibles 225
 - 21.4 Technical Provisions in Non-Life Insurance 228
 - 21.5 Bonus-Malus Systems 233
 - Further Reading 234
- 22 Risk Theory in Insurance** 235
 - 22.1 Collective Risk Model 235
 - 22.2 Aggregate Claim Distribution 238
 - 22.3 Copula 242
 - 22.4 Credibility Premium 243
 - 22.5 Ruin Probability 246
 - 22.6 Deductible 248
 - 22.7 Calculations for Bonus-Malus Systems 251
 - Further Reading 252
- 23 Health Insurance** 255
 - Further Reading 257
- 24 Reinsurance** 259
 - 24.1 Basic Concepts of Reinsurance 259
 - 24.2 Types of Reinsurance 261
 - 24.3 Solvency 267
 - 24.4 Alternative Risk Transfer ART 269
 - Further Reading 271

Part III Formulas of Related Disciplines

- 25 Mathematical Compendium** 275
 - 25.1 Powers with Integral Exponents ($a, b \in \mathbb{R}; a, b \neq 0; p, q \in \mathbb{Z}$) 275
 - 25.2 Roots of Real Numbers ($a, b \in \mathbb{R}; a, b > 0; m, n \in \mathbb{N}; p \in \mathbb{Z}$) 275
 - 25.3 Powers with Rational Exponents ($a \in \mathbb{R}; a > 0; m, n \in \mathbb{N}$) 275
 - 25.4 Powers with Real Exponents ($a, b \in \mathbb{R}; a, b > 0; x, y \in \mathbb{R}$) 276
 - 25.5 Formulas $a^n \pm b^n$ ($a, b \in \mathbb{R}; n, k \in \mathbb{N}$) 276
 - 25.6 Logarithms ($x, y \in \mathbb{R}; x, y > 0; a, b, c \in \mathbb{R}; a, b > 0; a, b \neq 1$) 276
 - 25.7 Factorial and Binomial Coefficients ($k, m, n \in \mathbb{N}_0; k \leq m, k \leq n$) 277

25.8	Binomial Theorem ($a, b \in \mathbb{R}; n \in \mathbb{N}$)	278
25.9	Sums of Powers of Natural Numbers ($n \in \mathbb{N}$)	278
25.10	Numerical Series ($a_1, d, q, v \in \mathbb{R}; n \in \mathbb{N}$)	278
25.11	Means ($x_1, \dots, x_n \in \mathbb{R}; k, n, n_1, \dots, n_k \in \mathbb{N}; n = \sum_{i=1}^k n_i$)	280
25.12	Beta and Gamma Function ($x, p, q \in \mathbb{R}; p > 0, q > 0; n \in \mathbb{N}$)	280
	Further Reading	281
26	Probability Theory	283
26.1	Random Events and Probability	283
26.2	Conditional Probability and Independent Events	284
26.3	Random Variables and Their Basic Characteristics	285
26.4	Important Discrete Distributions	288
26.5	Important Continuous Distributions	289
26.6	Random Vectors and Their Basic Characteristics	291
26.7	Transformation of Random Variables	294
26.8	Conditional Mean Value	295
26.9	Martingales	296
26.10	Generating Function	298
26.11	Convolutions and Sums of Random Variables	300
26.12	Random Sums of Random Variables	301
26.13	Some Inequalities	301
26.14	Limit Theorems of Probability Theory	302
	Further Reading	305
27	Descriptive and Mathematical Statistics	307
27.1	Sampling Theory: Simple Random Sample	307
27.2	Sampling Theory: Stratified Random Sample	308
27.3	Elementary Statistical Treatment	309
27.4	Sample Quantiles	310
27.5	Measures of Sample Level	310
27.6	Measures of Sample Variability	312
27.7	Measures of Sample Concentration	313
27.8	Measures of Sample Dependence	314
27.9	Point and Interval Estimators	315
27.10	Hypothesis Testing	318
27.11	Regression Analysis	320
27.12	Analysis of Variance (ANOVA)	327
27.13	Multivariate Statistical Analysis	328
	Further Reading	329
28	Econometrics	331
28.1	Multicollinearity	331
28.2	A Priori Restrictions	333
28.3	Qualitative Regressors	333
28.4	Probit and Logit Models	334

- 28.5 Random Regressors and Instrumental Variable Estimation . . . 335
- 28.6 Simultaneous Equation Models and 2SLS-Estimator 336
- Further Reading 338
- 29 Index Numbers 339**
 - 29.1 Indices as Instruments of Comparison 339
 - 29.2 Indices in Practice 340
 - 29.3 Stock Exchange Indicators 342
 - Further Reading 343
- 30 Stochastic Processes 345**
 - 30.1 Classification and Basic Characteristics
of Stochastic Processes 345
 - 30.2 Markov Chains 347
 - 30.3 Markov Processes 351
 - 30.4 Important Stochastic Processes 353
 - 30.5 Spectral Properties of Stochastic Processes 357
 - Further Reading 360
- 31 Statistical Analysis of Time Series 361**
 - 31.1 Predictions in Time Series 361
 - 31.2 Decomposition of (Economic) Time Series 362
 - 31.3 Estimation of Correlation and Spectral Characteristics 369
 - 31.4 Linear Time Series 371
 - 31.5 Nonlinear and Financial Time Series 376
 - 31.6 Multivariate Time Series 381
 - 31.7 Kalman Filter 382
 - Further Reading 385
- Index 387**
