

# Contents

<b>1 Continental Crust and Granitic Plutons</b> .....	1
1.1 Growth of Continental Crust .....	1
1.2 Orogeny and Continental Crust .....	2
1.3 Growth Theory <i>versus</i> Steady-State Theory .....	3
1.4 Continental Growth and Breakup .....	5
References .....	6
<b>2 Chemical Composition of Continental Crust and the Primitive Mantle</b> .....	9
2.1 Continental Crust .....	9
2.2 Chemical Composition of Continental Crust .....	10
2.3 Chemical Composition of the Primitive Mantle .....	14
2.4 Mass of Primitive Mantle Necessary for Formation of Continental Crust .....	15
References .....	16
<b>3 Origin of Magmas of the Bowen's Series</b> .....	19
3.1 Magmas of the Bowen's Series .....	19
3.2 Partial Melting of Mantle Peridotite .....	23
References .....	24
<b>4 Search for the Formation Mechanism of Continental Crust</b> .....	27
4.1 Three Constraints .....	27
4.2 Advantages of Using Minor Elements .....	30
4.3 Partial Melting of the Mantle Beneath Island Arcs .....	32
4.4 Fractional Crystallization of Magma .....	34
4.5 Partial Melting of Basaltic Crust .....	35
4.6 Crystallization Differentiation in a Chamber That Is Continuously Supplied with Primitive Magma .....	37
4.7 Removal of Cumulate into the Mantle .....	42
References .....	43

<b>5</b>	<b>Differentiation Mechanism of Magma at Arc Volcanoes</b>	45
5.1	Open-System Magma Chamber Repeatedly Supplied with Primitive Magma	45
5.1.1	Time-Dependent Variation in a Serrated Pattern	46
5.1.2	Crystallization Differentiation in a Chamber Periodically Supplied with Parental Magma	48
5.1.3	Steady-State	49
5.1.4	Remaining Two Problems	51
5.2	Evolution Limit of Volcanic Rocks, and Its Relation to Chemical Composition of the Upper Continental Crust	52
5.2.1	Variation Ranges of Rb/Sr Ratios at Individual Volcanoes	53
5.2.2	Rb and Sr Contents of Volcanic Rocks and Composition of the Upper Continental Crust	54
5.2.3	Crustal Assimilation and Its Effects on Magma Compositions	56
	References	58
<b>6</b>	<b>Configuration and Dynamics of Magma Chambers Beneath Arc Volcanoes</b>	59
6.1	Open-System Magma Chamber in the Crust	59
6.1.1	Regularity of Change in the Chemical Composition of Lava Flows	60
6.1.2	Another Regular Change in Chemical Composition of Lava Flows of the Massive Eruptions	63
6.1.3	Configuration of the System of Magma Supply and Cumulate Removal	65
6.1.4	Histogram of Orthopyroxene Phenocryst Compositions	69
6.2	Inevitability of Formation of Coupled Chambers	71
6.3	Lower Crust Assimilation and Its Effect on the Differentiation Path of Magma	71
6.4	Lower Crust Assimilation as Observed in Volcanic Rocks	73
	References	75
<b>7</b>	<b>Island Arc Volcanic Rocks and the Upper Continental Crust</b>	77
7.1	Magma Evolution in Incompatible Element Compositions	77
7.1.1	Incompatible Element Ratios, and Concentration Limits of Incompatible Elements	77
7.1.2	Incompatible Element Compositions and Ratios of Volcanic Rocks	79
7.2	Evolution of Volcanic Rocks in Major Element Compositions	82
7.2.1	Volcanic Rocks from Shimabara Peninsula	82
7.2.2	Volcanic Rocks from Mount Tara	85
7.2.3	Closed-System Versus Open-System Magma Chambers	87

- 7.2.4 Open-System Magma Chamber, and Magmatic Evolution of Major-Element Compositions ..... 89
- 7.2.5 Major Element Compositions of Island Arc Volcanic Rocks and the Upper Continental Crust ..... 91
- 7.3 Further Implications of Repeatedly Refilled Magma Chambers ..... 96
  - 7.3.1 Two-Layer Structure of the Continental Crust ..... 96
  - 7.3.2 Abundant Andesites on the Surface, and Abundant Granitic Plutons in the Crust of Mature Island Arcs ..... 97
  - 7.3.3 Plate Subduction and the Bowen’s Series ..... 98
  - 7.3.4 Archean Continental Crust and the Open-System Magma Chamber ..... 99
- 7.4 Roles of Water ..... 101
- References ..... 102
  
- 8 Volcanic Arcs and Outer Arcs ..... 103**
  - 8.1 Granitic Plutons Associated with and Without Coeval Volcanic Rocks ..... 103
  - 8.2 Topographic Configuration of an Island Arc ..... 104
  - 8.3 Two Types of Island Arcs of Different Topography ..... 105
  - 8.4 Magma Chambers Beneath Volcanic and Outer Arcs ..... 109
  - 8.5 Model for Alternative Growth of Volcanic and Outer Arcs ..... 111
  - 8.6 Cretaceous Southwest Japan ..... 113
  - References ..... 115
  
- Appendix ..... 117**
  
- Index ..... 119**

Arc Volcano of Japan

Generation of Continental Crust from the Mantle

Yanagi, T.

2011, XI, 123 p., Hardcover

ISBN: 978-4-431-53995-7
