## Contents

1 Introduction ........................................ 1  
  1.1 Dynamics of Hydrogen Bond in Water ................. 1  
  1.2 Previous Studies of Water Adsorption on Metal Surfaces .... 3  
  1.3 Single Atom/Molecule Science .......................... 6  
  1.4 The Motivation and Scope of this Thesis ............ 8  
References .................................................... 8  

2 Principles and Techniques ............................ 11  
  2.1 Quantum Mechanics ........................................ 11  
    2.1.1 Basics of Quantum Tunneling ....................... 11  
    2.1.2 Tunneling in a Symmetric Double Minimum Potential ... 14  
    2.1.3 Tunneling in an Asymmetric Double Minimum Potential ... 15  
  2.2 Scanning Tunneling Microscope .......................... 16  
    2.2.1 Overview ............................................. 16  
    2.2.2 Tunneling Current .................................... 17  
    2.2.3 Inelastic Electron Tunneling ....................... 19  
    2.2.4 STM-IETS ............................................. 21  
    2.2.5 STM-Induced Motion and Reaction of Adsorbates ....... 24  
    2.2.6 Single Atom and Molecule Manipulation ............. 28  
References .................................................... 30  

3 Experiments ............................................... 33  
  3.1 Experimental Apparatus .................................... 33  
  3.2 Sample Preparation ....................................... 34  
  3.3 STM Measurement .......................................... 35
### Contents

3.4 Time-Resolved Measurement of an STM

3.4.1 Atom-Tracking

3.4.2 Open Feedback Loop Measurement at a Single-Point

References

---

4 Water Monomer: Structure and Diffusion of a Single Water Molecule

4.1 Introduction

4.2 Results and Discussions

4.2.1 Adsorption Structure of a Water Monomer on Cu(110)

4.2.2 Diffusion of a Water Monomer on Cu(110)

4.2.3 Manipulation of a Water Monomer on Cu(110)

4.3 Summary

References

---

5 Water Dimer: Direct Observation of Hydrogen-Bond Exchange

5.1 Introduction

5.2 Results and Discussions

5.2.1 Production of a Water Dimer on Cu(110)

5.2.2 Structure of a Water Dimer on Cu(110)

5.2.3 Quantitative Analysis of the Donor–Acceptor Interchange of a Water Dimer on Cu(110)

5.2.4 The Impact of Substrate

5.3 Summary

References

---

6 Water Clusters: Formation of One-Dimensional Water Clusters

6.1 Introduction

6.2 Results and Discussions

6.2.1 Water Trimer on Cu(110)

6.2.2 Water Tetramer on Cu(110)

6.2.3 Larger Clusters on Cu(110)

6.3 Summary

References

---

7 Hydroxyl Group: Tunneling Dynamics of Hydrogen Atom

7.1 Introduction

7.2 Results and Discussions

7.2.1 STM-Induced Dissociation of a Water Molecule on Cu(110)
Visualization of Hydrogen-Bond Dynamics
Water-Based Model Systems on a Cu(110) Surface
Kumagai, T.
2012, XIV, 134 p., Hardcover
ISBN: 978-4-431-54155-4
