## Contents

### Part I Neuroprotection for Glaucoma

1. **Molecular Architecture of Glutamate Signaling Pathway in Glaucomatous Optic Neuropathy**
   Yasunari Munemasa

2. **Calcium and Calpain Activation**
   Morin Ryu and Toru Nakazawa

3. **Classical Signaling Pathways**
   Hideki Hayashi

4. **Antioxidative Treatment for Neuroprotection in Glaucoma**
   Kenya Yuki

5. **ER Stress**
   Masamitsu Shimazawa and Hideaki Hara

6. **Nitric Oxide Contributes to Retinal Ganglion Cell Survival Through Protein S-Nitrosylation After Optic Nerve Injury**
   Yoshiki Koriyama and Satoru Kato

7. **Neurotrophic Factors**
   Chikako Harada and Takayuki Harada

8. **RIP Kinase-Mediated Programmed Necrosis**
   Yusuke Murakami, Maki Kayama, Joan W. Miller, and Demetrios Vavvas

9. **Axonal Degeneration**
   Yasushi Kitaoka

10. **Axonal Transport**
    Yuji Takihara and Masaru Inatani
11 Interaction Between RGC Bodies and Glia .......................... 143
   Kenji Kashiwagi
12 Aquaporin in Optic Neuropathies ............................ 161
   Akiyasu Kanamori
13 Microglia ...................................................... 175
   Yuki Fujita and Toshihide Yamashita

Part II Neuroprotection for Age-Related Macular Degeneration (AMD), Retinal Pigmentary Degeneration

14 Neuroprotection for Photoreceptors ............................ 191
   Toshiaki Abe and Nobuhiro Nagai
15 Retinal Photooxidative Stress and Its Modifiers ............ 205
   Masaki Tanito
16 Roles of the Retinal Pigment Epithelium in Neuroprotection ........................................... 227
   Atsuhiro Kanda and Susumu Ishida
17 Oxidative Stress in the RPE and Its Contribution to AMD Pathogenesis: Implication of Light Exposure .. 239
   Yoko Ozawa
18 Interaction Between Photoreceptors and RPEs ................. 255
   Takeshi Yoshida and Kyoko Ohno-Matsui

Part III Neuroprotection for Other Retinal Diseases

19 Neuroprotection for Retinal Detachment ......................... 275
   Toshio Hisatomi
20 Neuroinflammation .............................................. 293
   Kazuichi Maruyama
21 Optic Neuritis .................................................. 307
   Xiaoli Guo
22 Neuroprotection by Endothelial Progenitor Cells for Retinal Degeneration .................................. 323
   Shinichi Fukuda
23 Optic Nerve Regeneration ...................................... 341
   Kazuhiko Namekata
Neuroprotection and Neuroregeneration for Retinal Diseases
Nakazawa, T.; Kitaoka, Y.; Harada, T. (Eds.)
2014, X, 356 p. 85 illus., 61 illus. in color., Hardcover
ISBN: 978-4-431-54964-2
