Contents

Part I  Mathematical Approaches to Computer Graphics and Vision

The Power of Orthogonal Duals (Invited Talk) ................................. 3
Mathieu Desbrun and Fernando de Goes

Mathematical Models of Visual Information Processing
in the Human Brain and Applications to Visual Illusions
and Image Processing .......................................................... 7
Hitoshi Arai

Decomposition and Clustering for the Visualization
of Dynamical Systems ......................................................... 13
Zin Arai

Probable and Improbable Faces ........................................... 21
J. P. Lewis, Zhenyao Mo, Ken Anjyo and Taehyun Rhee

Part II  Sound and Scene Rendering

Progress in Digital Sound Synthesis for Physically Based
Animation (Invited Talk) ..................................................... 33
Doug L. James

Efficient Image-Based Rendering Method Using
Spherical Gaussian ............................................................. 37
Kei Iwasaki

A Lie Theoretic Proposal on Algorithms for the Spherical
Harmonic Lighting .............................................................. 43
Masato Wakayama
Interactive Editing of Volumetric Objects by Using Feature-Based Transfer Function .................................................. 55
Yuhei Shibukawa, Yoshinori Dobashi and Tsuyoshi Yamamoto

Feature-Based Approach for the Interactive Editing of Environmental Lighting Effects .................................................. 63
Munehiro Tada, Yoshinori Dobashi and Tsuyoshi Yamamoto

Ray Tracing of Quadratic Parametric Surface ........................ 71
Shinji Ogaki

Part III Fluid and Flow

A Flexible Image Processing Approach to the Surfacing of Particle-Based Fluid Animation (Invited Talk) ..................... 81
Ken Museth

Inverse Approach for Visual Simulation of Clouds ................ 85
Yoshinori Dobashi

Generating Flow Fields Variations Using Laplacian Eigenfunctions . . . 93
Syuhei Sato, Yoshinori Dobashi, Kei Iwasaki, Hiroyuki Ochiai and Tsuyoshi Yamamoto

Blood Flow Analysis Using Medical Imaging Data and Streamline Visualization ................................................. 103
Hiroshi Suito and Takuya Ueda

Part IV Deformation and Locomotion

Discrete Isoperimetric Deformation of Discrete Curves . . . . 111
Jun-ichi Inoguchi, Kenji Kajiwara, Nozomu Matsuura and Yasuhiro Ohta

Mathematical Formulation of Motion and Deformation and Its Applications .................................................. 123
Hiroyuki Ochiai and Ken Anjyo

Anti-commutative Dual Complex Numbers and 2D Rigid Transformation .................................................. 131
Genki Matsuda, Shizuo Kaji and Hiroyuki Ochiai
