Contents

Part I  Algebra

Mathematics: As an Infrastructure of Technology and Science ........ 3
Hiroyuki Ochiai

Remarks on Quantum Interaction Models by Lie Theory
and Modular Forms via Non-commutative Harmonic Oscillators .... 17
Masato Wakayama

Introduction to Public-Key Cryptography ......................... 35
Tsuyoshi Takagi

Code-Based Public-Key Encryption .............................. 47
Kirill Morozov

Gröbner Basis and Its Applications ............................. 57
Takafumi Shibuta

Part II  Geometry

Stability Analysis for Variational Problems for Surfaces
with Constraint ......................................................... 71
Miyuki Koiso

Discrete Models of Isoperimetric Deformation of Plane Curves .... 89
Jun-ichi Inoguchi, Kenji Kajiwara, Nozomu Matsuura
and Yasuhiro Ohta

Computing Optimal Cycles of Homology Groups ............... 101
Emerson G. Escolar and Yasuaki Hiraoka

Singularity Theory of Differentiable Maps and Data Visualization 119
Osamu Saeki
Part III  Analysis

Mathematical Analysis for Pattern Formation Problems          133
  Shin-ichiro Ei

Models and Applications of Organism Transportation          141
  Atsushi Tero

The Renormalization Group Method for Ordinary
Differential Equations                                     151
  Hayato Chiba

A Phase Field Approach to Mathematical Modeling
of Crack Propagation                                       161
  Masato Kimura and Takeshi Takaishi

Variational Methods in Differential Equations                171
  Michiaki Onodera

Part IV  Probability and Statistics

Finite Markov Chains and Markov Decision Processes          189
  Tomoyuki Shirai

Introduction to the Premium Principle Based
on the Wang Transform                                        207
  Shingo Saito

Stochastic Process Models                                    219
  Hiroki Masuda

Signal Detection and Model Selection                         239
  Yoshiyuki Ninomiya

Regression Analysis and Its Development                      249
  Ryuei Nishii

Stochastic Analytical Models in Mathematical Finance         263
  Setsuo Taniguchi

An Introduction to the Minimum Description Length Principle  279
  Jun’ichi Takeuchi
Contents

An Introduction to Ergodic Theory .......................... 297
Khanh Duy Trinh

Part V  Applied Mathematics

Discrete Optimization: Network Flows and Matchings .......... 313
Naoyuki Kamiyama

Strict Feasibility of Conic Optimization Problems ............... 325
Hayato Waki

Theory of Automata, Abstraction and Applications ............... 337
Yoshihiro Mizoguchi

Markov Chain Monte Carlo Algorithms .......................... 349
Osamu Maruyama

Modeling of Fluid Flows by Nonlinear Schrödinger Equation .... 365
Yasuhide Fukumoto

Financial Applications of Quasi-Monte Carlo Methods ........... 379
Shu Tezuka

Pure Mathematics and Applied Mathematics are Inseparably Intertwined: Observation of the Early Analysis of the Infinity .... 393
Masahito Takase

High Performance Computing for Mathematical Optimization Problem ........................................ 401
Katsuki Fujisawa

Part VI  Application of Mathematics

Modeling of Head-Disk Interface for Magnetic Recording ........ 425
Kanzo Okada

Nonstationary Analysis of Blast Furnace Through Solution of Inverse Problem and Recurrence Plot ...................... 439
Junichi Nakagawa

Time-Periodic Nonlinear Steady Field Analysis ................... 453
Kenji Miyata
Mathematical Models in First-Principles Calculations
for Materials Science ........................................ 467
Hajime Kobayashi

Mathematics and Manufacturing: The Symbolic Approach .... 481
Ryusuke Masuoka and Hirokazu Anai

Error Correcting Codes Based on Probabilistic Decoding
and Sparse Matrices ........................................ 495
Hironori Uchikawa

Index .......................................................... 505
A Mathematical Approach to Research Problems of Science and Technology
Theoretical Basis and Developments in Mathematical Modeling
2014, XII, 507 p. 149 illus., 68 illus. in color., Hardcover
ISBN: 978-4-431-55059-4
