Contents

1 Introduction ........................................ 1
   1.1 Dimension of the Environment: Outer Universe .... 1
   1.2 Dimension of Subjective Preference: Inner Universe . 1
   1.3 Three Stages of Human Life .......................... 2
   1.4 Twilight of the Third Stage of Life of the Author:
       An Example ......................................... 3
   References ............................................ 6

2 Model of Auditory Brain System ......................... 9
   2.1 Slow-Vertex Responses (SVR) Corresponding to Subjective
       Preference of the Sound Field ....................... 9
   2.2 Electroencephalographic (EEG) and Magnetoencephalographic
       (MEG) Correlates of Subjective Preference of the
       Sound Field .......................................... 12
       2.2.1 EEG in Response to Change of $\Delta t_1$ ....... 13
       2.2.2 MEG in Response to Change of $\Delta t_1$ ........ 14
       2.2.3 EEG in Response to Change of $T_{\text{sub}}$ ........ 17
       2.2.4 EEG in Response to Change of the IACC .......... 18
   2.3 Specialization of Cerebral Hemispheres for the Sound Field . 20
   2.4 Model of Auditory Brain System ..................... 23
   References ............................................ 27

3 EEG and MEG Correlates of Visual Subjective Preferences 29
   3.1 EEG Correlates of Subjective Preferences for Oscillatory
       Horizontal Movements of a Single Target .............. 29
   3.2 MEG Correlates of Subjective Preferences for
       Flickering Light ..................................... 35
       3.2.1 MEG Correlates of Sinusoidal Flickering Light ... 36
       3.2.2 MEG Correlates of Subjective Preferences for
           Fluctuating Flickering Lights ..................... 41
   References ............................................
### 3.3 Hemispheric Specialization in Vision

References

### 4 Temporal and Spatial Percepts of Sound and Vision

4.1 Definitions of Temporal and Spatial Objective Factors

4.1.1 Temporal Factors for Sound and Vision

4.1.2 Spatial Factors Extracted from the Interaural Crosscorrelation Function (IACF) of the Sound Field

4.1.3 Spatial Factors Extracted from the Spatial Autocorrelation Function (ACF) of the Visual Field

4.1.4 Temporal Windows of Signals for Autocorrelation Processing

4.2 Temporal and Spatial Percepts of Sound

4.2.1 Temporal Sensations of Sound

4.2.2 Spatial Percepts of the Sound Field

4.3 Temporal and Spatial Percepts in Vision

4.3.1 Temporal Percepts of the Missing Fundamental Phenomenon in Vision

4.3.2 Spatial Percepts in Vision

References

### 5 Theory of Subjective Preference for Sound and Visual Fields

5.1 Theory of Subjective Preference for Sound Fields

5.2 Theory of Subjective Preference for Visual Fields

References

### 6 Preferred Conditions of Temporal and Spatial Factors of Sound Fields

6.1 Preferred Conditions of Temporal Factors of the Sound Field

6.1.1 Optimal First Reflection Time After the Direct Sound ($\Delta t_1$)

6.1.2 Optimal Subsequent Reverberation Time After the Early Reflection ($T_{sub}$)

6.2 Preferred Conditions of Spatial Factors of Sound Fields

6.2.1 Listening Level (LL)

6.2.2 Optimal Magnitude of Interaural Crosscorrelation Function (IACC)

References

### 7 Subjective Preferences in Vision

7.1 Subjective Preferences for the Temporal Factor of Flickering Lights

7.2 Subjective Preferences for the Temporal Factor of Oscillatory Movements

7.3 Subjective Preferences for Spatial Factors of Textures
