Contents

Preface ............................................................................................................................... v
Contributors ..................................................................................................................... xi

Part I Dynamics and Complexity of Intercellular Networks

Integrative Synaptic Mechanisms of the Neural Network ................................. 3
Shigetada Nakanishi

The Molecular and Cellular Design of Networks in Motion ....................... 11
Sten Grillner, Peter Wallén, and Russell Hill

Bacterial Complexity: More Is Different on All Levels ............................... 25
Eshel Ben-Jacob

How Animals Get Their Skin Patterns: Fish Pigment Pattern as a Live Turing Wave ......................................................... 37
Shigeru Kondo

Characterization and Application of Natural Light-Sensitive Proteins .......... 47
Jens Looser and Georg Nagel

Systems Biology of Mammalian Circadian Clocks ......................................... 57
Hiroki R. Ueda

Toward Understanding How the Immune System Establishes a Diverse Yet Self-Tolerant T-Cell Repertoire: Stepwise Roles of Thymic Microenvironments .................................................. 71
Takeshi Nitta and Yousuke Takahama
The Mechanisms of Motor Programming for Learned Vocalization in Songbirds .......................................................... 83
Hisataka Fujimoto, Taku Hasegawa, Ryosuke Matsui, Kentaro Abe, and Dai Watanabe

Dynamic Model of the Basal Ganglia Functions and Movement Disorders ......................................................... 91
Atsushi Nambu

Part II Integrative Mechanism of Intracellular Information Networks

A Posttranslational Chemical Circadian Oscillator in Cyanobacteria ..... 101
Hideo Iwasaki

The Apoptotic Signaling Network Dynamically Interprets the Outputs of Individual Signaling Pathways in an Early Analog and Late Digital Manner ................................................................. 111
Kevin A. Janes, H. Christian Reinhardt, and Michael B. Yaffe

Specific Features of Transient Ras and Sustained Rap1 Activation ....... 121
Yu-ichi Ozaki, Shinsuke Uda, and Shinya Kuroda

Control and Alteration of Protein Traffic in the Cell ......................... 129
Toshiya Endo

Plant Functional Genomics Based on Integration of Metabolomics and Transcriptomics: Toward Plant Systems Biology .................. 135
Kazuki Saito

A Possible Role of Homeostasis Between Monomeric and Filamentous Actin in Filament Nucleation Revealed by Pharmacokinetic Modeling ........................................................................ 143
Naoki Watanabe and Chihiro Higashida

Molecules, Networks, and Memory .................................................. 151
Upinder S. Bhalla

Systems Biology Meets Single-Cell Physiology: Role of a Positive-Feedback Signal Transduction Network in Cerebellar Long-Term Synaptic Depression ........................................... 159
Keiko Tanaka and George J. Augustine

Computational Models of Cerebellar Long-Term Memory .................. 169
Hideaki Ogasawara and Mitsuo Kawato
Biogenesis and Function Mechanisms of Micro-RNAs and Their Role as Oncogenes and Tumor Suppressors.............................. 183
Soken Tsuchiya, Kazuya Terasawa, Ryo Kunimoto, Yasushi Okuno, Fumiaki Sato, Kazuharu Shimizu, and Gozoh Tsujimoto

Part III Dysfunction of Information Networks and Related Diseases

The Pathogenetic Significance of Deregulated Transcription Factors in Hematological Malignancies ....................................................... 193
Masahiro Nakagawa, Susumu Goyama, Motoshi Ichikawa, and Mineo Kurokawa

Ultradian Oscillation Networks in Somite Segmentation and Other Biological Events ......................................................................... 199
Yasutaka Niwa, Hiromi Shimojo, and Ryoichiro Kageyama

The Cellular Basis of Dictyostelium Morphogenesis ................................................. 209
Cornelis J. Weijer

Metabolic Information Highway: Interorgan Metabolic Communication Via the Autonomic Nervous System................................. 221
Hideki Katagiri

Involvement of the CCR4-NOT Deadenylase Complex in the Control of Cell Growth ................................................................. 229
Masahiro Morita, Kentaro Ito, Toru Suzuki, and Tadashi Yamamoto

Reconstruction of Nuclear Reprogramming by Defined Factors ............... 239
Shinya Yamanaka

Index................................................................................................................ 243
Systems Biology
The Challenge of Complexity
Nakanishi, S.; Kageyama, R.; Watanabe, D. (Eds.)
2009, XV, 246 p., Hardcover
ISBN: 978-4-431-87703-5
