Preface

The proceedings of the International Conference on Advanced Computing, Networking, and Informatics (ICACNI 2013), at Central Institute of Technology Raipur, Chhattisgarh, India during 12–14 June record scientific and engineering progress in both theoretical and applied sections of Computer Science and related fields. The proceedings contain technical articles, reports, and case studies on computing, networking, and informatics. Along with these main tracks, there were two special sessions organized for recording specific advancements in the domains of image and video processing and biometric security. The conference also sported a special industrial track to mark the relevant research achievements from the industry. Out of 458 articles received for consideration for publication, 135 have been selected through a single-blind peer review process. Each article has been reviewed by at least two reviewers. Academicians, scholars, industry professionals, and practitioners have contributed to this conference by submitting their valuable research works, which has led this conference to a success.

A dedicated committee of several professors and academicians from premier institutes, such as the IITs and the NITs, has served to manifest the conference successful. We sincerely thank all our chairs and committees. We are grateful to the reviewers who, despite their busy schedules, have supported us by providing review reports within the stipulated time. We would like to thank Central Institute of Technology Raipur for organizing and providing the venue for the conference. Our hearty thanks go to the Department of Computer Science and Engineering, National Institute of Technology Rourkela for overall support in executing the conference.
