
Contents

1	Introduction	1
1.1	Tea and Camellia: An Overview	1
1.2	History	1
1.3	Origin and Distribution	2
1.4	Morphological Descriptions	2
1.5	Taxonomy and Nomenclature	3
1.6	Economic Importance and Health Benefits	3
1.7	Landmarks of Biotechnological Works	6
	References	8
2	Genetics and Breeding	9
2.1	Introduction	9
2.2	Genome Size	9
2.3	Diversity of the Genus	9
2.4	Karyotype	13
2.5	Propagation	14
2.6	Floral Biology and Pollination Mechanism	17
2.7	Seed Biology	18
2.8	Breeding Techniques	18
2.8.1	Introduction	18
2.8.2	Hybridization	20
2.8.3	Selection	20
2.8.4	Polyploidy Breeding	21
2.8.5	Mutation Breeding	24
2.8.6	Pre-Breeding and Distance Hybridization	25
2.9	Genetic Resources of Tea	25
2.10	Bottlenecks of Tea Breeding	30
2.11	Conclusion	31
	References	31
3	Micropropagation	35
3.1	Introduction	35
3.2	Need for Micropropagation	35
3.3	Tea	35
3.3.1	Explants	35
3.3.2	Initiation and Multiplication	36
3.3.3	Rhizogenesis	44

3.3.4	Hardening and Field Transfer	45
3.3.5	Field Performance of Micropropagated Raised Plants	47
3.3.6	Cold Storage and Cryopreservation	48
3.4	<i>Camellia</i> Species	48
3.4.1	<i>C. japonica</i>	48
3.4.2	<i>C. oleifera</i>	49
3.4.3	<i>C. reticulata</i>	49
3.4.4	<i>C. sasanqua</i>	49
3.4.5	<i>Camellia</i> Hybrids	49
3.4.6	Rooting and Hardening	50
3.5	Problems of Micropropagation	50
3.5.1	Explant Browning	50
3.5.2	Microbial Contamination	51
3.6	Conclusion	51
	References	52
4	Somatic Embryogenesis and Alternative <i>In Vitro</i> Techniques	55
4.1	Introduction	55
4.2	Induction	55
4.2.1	Explants	55
4.2.2	Physiological Stages and Genotypic Variations	60
4.2.3	Basal Media and Growth Regulators	61
4.2.4	Growth Adjuvants	62
4.3	Secondary Embryogenesis	62
4.4	Bioreactor Technology for Secondary Embryogenesis	63
4.5	Maturation and Germination	64
4.5.1	Sugars	64
4.5.2	Desiccation	64
4.5.3	Plant Growth Regulators and Additives	65
4.6	<i>In Vivo</i> Embryogenesis	65
4.7	Hardening and Field Transfer	66
4.8	Somaclonal and Gametoclonal Variation	67
4.9	Origin and Morphology of Somatic Embryos	68
4.10	Biochemical Changes of Somatic Embryogenesis	69
4.11	Histological and Ultrastructural Changes During Embryogenesis	70
4.11.1	Direct Somatic Embryogenesis	70
4.11.2	Secondary Embryogenesis	70
4.12	Electron Probe X-ray Microanalysis: A Tool for Early Diagnosis of Embryogenesis	71
4.13	Alternative <i>In Vitro</i> Techniques	71
4.13.1	Storage of <i>In Vitro</i> Culture	71
4.13.2	Low Temperature and Short-Term Storage	72
4.13.3	Cryopreservation	74
4.14	Organogenesis	75
4.15	Caulogenesis	75
4.16	Protoplast Culture	76
4.17	Anther Culture	76

4.18	Secondary Metabolites Production	77
4.19	Embryo Rescue	79
4.20	Conclusion	79
	References	80
5	Genetic Transformation	85
5.1	Introduction	85
5.2	<i>Agrobacterium tumefaciens</i>	85
5.3	<i>Agrobacterium rhizogenes</i>	89
5.4	Biolistic-Mediated Transformation	90
5.5	Applications	90
5.6	Conclusion	91
	References	91
6	Molecular Markers	93
6.1	Introduction	93
6.2	Morphological Markers	93
6.3	Artificial Neural Network (ANN): A Digital Marker	95
6.4	Biochemical Markers	96
6.5	Metallic Markers	98
6.6	Isozyme Markers	98
6.7	Cytological Markers	99
6.8	DNA-Based Markers	99
6.8.1	Random Amplified Polymorphic DNA (RAPD)	104
6.8.2	Inter-Simple Sequence Repeat (ISSR)	106
6.8.3	Restriction Fragment Length Polymorphism (RFLP).....	107
6.8.4	Simple Sequence Repeat (SSRs)	107
6.8.5	Amplified Fragment Length Polymorphism (AFLP)	108
6.8.6	Single Nucleotide Polymorphism (SNP)	108
6.8.7	Sequence-Tagged Microsatellite Site (STMS)	109
6.8.8	Single-Strand Conformation Polymorphism (SSCP)	109
6.8.9	Cleaved Amplified Polymorphic Sequence (CAPS)	109
6.9	Organelle DNA Analysis	110
6.10	Genetic Linkage Map	111
6.11	Genomic Resources	112
6.12	Conclusion	113
	References	114
7	Stress Physiology	125
7.1	Introduction	125
7.2	Abiotic Stress	125
7.2.1	Moisture Stress	125
7.2.2	Temperature Stress	127
7.2.3	Ultraviolet (UV) Radiation Stress	128

7.2.4	Low Light-Induced Stress	128
7.2.5	Elemental Stress	129
7.3	Biotic Stress	136
7.3.1	Relevance of Microbes in Stress Alleviation	137
7.3.2	Autotoxins	137
7.3.3	Effect of Plant Growth Regulators (PGR)	138
7.4	Effects of Stress on Quality of Made Tea	139
7.5	Emerging Physiological Stresses	139
7.6	Impact of Various Stresses on Wild Species of Tea	139
7.7	Conclusion	142

Breeding and Biotechnology of Tea and its Wild Species

Mondal, T.K.

2014, XVI, 167 p. 17 illus., 6 illus. in color., Hardcover

ISBN: 978-81-322-1703-9
