Contents

Auger-Architectomics: Introducing a New Nanotechnology to Infectious Disease ..................................... 1
Chantel W. Swart, Carolina H. Pohl and Johan L. F. Kock

Rational Design of Antigens to Improve the Serodiagnosis of Tick-Borne Borreliosis in Central Regions of Russia .......... 9
Evgenia Baranova, Pavel Solov'ev, Evgeny Panfertsev, Anastasia Baranova, Galina Feduykina, Liubov Kolombet, Muhammad G. Morshed and Sergey Biketov

Ayurvedic Bhasmas: Overview on Nanomaterialistic Aspects, Applications, and Perspectives .............................. 23
Rameshwar Adhikari

Nanobiosensors: Role in Cancer Detection and Diagnosis ............. 33
Andrew Gdowski, Amalendu P. Ranjan, Anindita Mukerjee and Jamboor K. Vishwanatha

Cell Compatible Arginine Containing Cationic Polymer: One-Pot Synthesis and Preliminary Biological Assessment ........ 59
Nino Zavradashvili, Tamar Memanishvili, Nino Kupatadze, Lucia Baldi, Xiao Shen, David Tugushi, Christine Wandrey and Ramaz Katsarava

Neuroinvasive and Neurotropic Human Respiratory Coronavirus: Potential Neurovirulent Agents in Humans ..................... 75
Marc Desforges, Alain Le Coupanec, Élodie Brison, Mathieu Meessen-Pinard and Pierre J. Talbot
Infectious Diseases and Nanomedicine I
First International Conference (ICIDN – 2012), Dec. 15-18, 2012, Kathmandu, Nepal
Adhikari, R.; Thapa, S. (Eds.)
2014, XIII, 119 p. 25 illus., Hardcover
ISBN: 978-81-322-1776-3
