1 Introduction to Integrated Systems Approach to Materials Management ........................................... 1

1.1 Importance of Materials Management .................................................. 2

1.2 Efficiency Indicators of Materials Management ........................................ 2

1.3 Definition of Materials Management .................................................... 3

1.4 Some Indicators of Low Materials Management Effectiveness .................... 3

1.5 Materials Management in India: Some Reflections/Concerns ..................... 4

1.6 Major Reasons of Low Materials Productivity ........................................ 5

1.6.1 Lack of Integrated Approach in Dealing with the Materials ................... 5

1.6.2 Hidden Costs Associated with Managing Materials .......................... 6

1.6.3 Lack of Use of Scientific Methods of Planning and Control in Materials Management Function .......... 7

1.6.4 Uncertainty of Demand and Supply in the Supply Environment ............ 7

1.6.5 Low Organizational Importance to Materials Management in the Organizational Structure ............ 7

1.6.6 Terminological Confusion ............................................................... 8

1.6.7 Inflationary Pressures ................................................................. 8

1.7 Integrated Systems Approach to Materials Management: An Overview ........... 8

1.7.1 Inventory Management ................................................................. 10

1.7.2 Materials Handling and Transportation ........................................... 10

1.7.3 Storage and Warehousing ............................................................... 11

1.7.4 Waste Management (or SOS Management) ........................................ 11

1.7.5 Make or Buy Decisions or Outsourcing ........................................... 12

1.7.6 Incoming Materials Quality Assurance ........................................... 12

1.7.7 Vendor Selection, Evaluation, and Development .............................. 12

1.7.8 Value Analysis for Cost Avoidance or Reduction ............................... 13

1.7.9 Lead Time Analysis, Value Stream Mapping, and Process Simplification .......... 13
