Contents

1 A Framework for Forensic Foundation Engineering ............. 1
   H.G. Poulos

2 Forensic Geotechnical Engineering Theory and Practice ...... 17
   Suzanne Lacasse

3 Guidelines for Forensic Investigation of Geotechnical Failures .. 39
   V.V.S. Rao

4 Caisson Failure Induced by Wave Action ...................... 45
   E.E. Alonso, N.P. Pinyol and P. Fernández

5 Forensic Geotechnical Engineering Investigations:
   Data Collection ............................................. 95
   Peter Day

6 Diagnosis of Geotechnical Failure Causes Using Bayesian
   Networks .......................................................... 103
   Y. Xu and L. Zhang

7 Back Analyses in Geotechnical Engineering ................... 113
   G.L. Sivakumar Babu and Vikas Pratap Singh

8 Back Analysis of Slope Failures to Design Landslide
   Stabilizing Piles .............................................. 119
   M.E. Popescu and V.R. Schaefer

9 Back Analyses in Forensic Geotechnical Engineering .......... 131
   Richard N. Hwang
10 Instrumentation and Monitoring for Forensic Geotechnical Engineering
Y. Iwasaki

11 Analysis of the Causes of Undue Movements of a Retaining Wall Used to Form a Deep Basement in Sandstone and Consequent Damage to an Adjacent Canal
R.A. Jessep

12 Failure Mechanism of Anchored Retaining Wall Due to the Breakage of Anchor Head
Kazuya Itoh, Naotaka Kikkawa, Yasuo Toyosawa, Naoaki Suemasa and Toshiyuki Katada

13 Backwards Problem in Geotechnical Earthquake Engineering
S. Iai

14 Failure Analysis of Underground Construction—Lessons Learned from Taiwan
B. Hsiung and T. Sakai

15 Failure Analysis of a Highway Dip Slope Slide

16 Characterisation of Failure at a Large Landslide in SE Queensland by Geological Mapping, Laboratory Testing, Instrumentation and Monitoring
D.C. Starr, J. Woodsford and D.F. Marks

17 Post-liquefaction Data Collection and Analyses for Earthquakes in New Zealand
Md. Mizanur Rahman and T.G. Sitharam

18 Forensic Geotechnics—Some Case Studies from Singapore
C.F. Leung

19 Technical Shortcomings Causing Geotechnical Failures:
Report of Task Force 10, TC 302
R.A. Jessep, L.G. de Mello and V.V.S. Rao

20 Effects of Vibration by Demolition on Nearby Machine Shop Floor—Wave Measurement for Dynamic Property of Ground
Y. Iwasaki and K. Nakagawa
21 A Case of Piping in Sand Under a Dam and Its Back Analysis... 311
P. Sembenelli

22 Influence of Vibrations on Installation of Bored Piles............ 337
N. Santosh Rao

23 Aspects Regarding Management of Soil Risk..................... 343
Rolf Katzenbach, Steffen Leplla, Alexandra Weidle
and Deepankar Choudhury

24 Forensic Studies for Failure in Construction
of an Underground Station of the Kaohsiung MRT System....... 357
Richard N. Hwang, Kenji Ishihara and Wei F. Lee

25 Damage to a Metro Tunnel Due to Adjacent Excavation......... 369
R.N. Hwang, B.S. Chen, T.E. Wu and S.W. Duann

26 A Case Study of Floor Heaving of a Condominium
RC Building with Seven Stories............................... 379
Yoshi Iwasaki and Junsuke Haruna

27 Failure Case Study of Tieback Wall in Urban Area, Korea...... 391
S.S. Jeong, Y.H. Kim and M.M. Kim

28 Forensics of Pile Foundations Subjected to Earthquake
Induced Liquefaction and Lateral Spreading.................... 403
Gopal SP. Madabhushi

29 Piping Failure of a Metro Tunnel Construction................. 433
Wei F. Lee and Kenji Ishihara

30 Forensic Analysis of Failure of Retaining Wall............... 451
G.L. Sivakumar Babu, J. Raja, B. Munwar Basha
and Amit Srivastava

31 Role of Reliability in Forensic Geotechnical Engineering..... 467
K.K. Phoon, G.L. Sivakumar Babu and M. Uzielli

32 Important Role of Uncertainty in Forensic Geotechnical
Engineering.......................................................... 493
R.B. Gilbert
33 Technical, Ethical, and Legal Issues with Forensic Geotechnical Engineering—A Case History ............... 505
   D.S. Saxena

34 Forensic Engineering, Legal Considerations, and Property Damage Assessment from Construction Vibrations .......... 521
   D.S. Saxena, Prashanth Vaddu and Anu Saxena

35 A Case Study of Observational Method for a Failed Geotechnical Excavation in Singapore ..................... 535
   Y. Iwasaki

Appendix .................................................................................................................. 549

Author Index ............................................................................................................ 551
Forensic Geotechnical Engineering
Rao, V.V.S.; Sivakumar Babu, G.L. (Eds.)
2016, XVI, 552 p. 411 illus., Hardcover
ISBN: 978-81-322-2376-4
