Part I Reference Theories

1 From Social and Natural Science Comes a Historical Overview on the Concepts of Uncertainty and Risk ................... 3
  1.1 Risk... Beginning with Newton and Heisenberg. ............... 3
  1.2 Uncertainty and Risk: Loss and Gain—A Historical View .... 4
  1.3 The First Risk Classifications .................................. 7
  References ......................................................... 8

2 Governance and Risk Management. ............................... 9
  2.1 Three Interpretative Models: The Paradigm of “Structure-Conduct-Performance”, “System Theory”, and “Value-Based Management” ........................................ 9
    2.1.1 The North-American School and the Structure-Conduct-Performance Paradigm. ............... 9
    2.1.2 Business as an Open System and the Systemic Approach to Business Governance ........... 10
    2.1.3 Value-Based Management ................................ 11
  2.2 Governance and Value Creation ................................ 12
  2.3 Corporate Governance: Regulatory Evolutions ................. 14
  References ......................................................... 17

3 Risk Management Perspectives. .................................... 19
  3.1 Risk is Transversal ............................................. 19
  3.2 From the Risk Spectrum to the Four Big Risks ................ 20
  3.3 Four Risk Observation and Management Perspectives ......... 22
  3.4 Risk Management: A Brief Historical Evolution ............... 26
  References ......................................................... 27
Part II Risk Assessment: Approaches, Techniques and Good Practices

4 The Need for an Enterprise-Wide Approach to Risk Management

4.1 Enterprise Risk Management

4.1.1 Internal Auditing and Risk Management: Collaboration, Not Overlap!

4.2 Business Risk Management

4.3 Risk Management in the Organizational Structure

4.4 ISO 31000 (2009)

References

5 Risk Identification

5.1 What is Risk Identification?

5.1.1 Organizational Charts

5.1.2 Flow Charts

5.1.3 Vulnerability Analysis and Matrix of Interdependencies

5.1.4 Checklists

5.1.5 Event Chain Diagrams and Decision Trees

References

6 Risk Analysis

6.1 Qualitative or Quantitative Analysis?

6.2 Introduction to Basic Statistical Tools

6.2.1 Discrete Probability Distribution

6.2.2 Continuous Probability Distribution

6.3 Probable Maximum Loss and Annual Aggregate Loss

6.4 Qualitative and Semi-Qualitative Methods for Risk Analysis

6.4.1 Event Tree Analysis and Fault Tree Analysis

6.4.2 Business Impact Analysis

6.4.3 Business Continuity Planning (BCP)

6.4.4 FMEA

6.4.5 Dependency Modeling

6.5 How Can the Risk Be Assessed when the Historical Data is Insufficient or Lacking?

6.6 Risk Analysis for a Better Performance Improving

6.6.1 Risk Analysis for Measuring Monetary Losses

6.6.2 Risk Analysis for Measuring Underperformance

6.7 Risk Evaluation

6.8 External contribution 6.1: Analysis of Economic, Financial and Equity Indicators for the Assessment of Business Risk and Client Risk in an Industrial Group
Part III  Risk Treatment: Approaches, Techniques and Good Practices

7 Risk Treatment .................................................................................. 89
  7.1 Risk Control .................................................................................. 89
    7.1.1 Avoidance .............................................................................. 90
    7.1.2 Loss Prevention ...................................................................... 90
    7.1.3 Loss Reduction ....................................................................... 91
    7.1.4 Separation, Duplication, Diversification ................................. 91
  7.2 Risk Financing ................................................................................ 92
    7.3 Risk Financing: Retention .......................................................... 93
      7.3.1 Retention: Take a Proper Decision! ....................................... 93
      7.3.2 Asset Reduction .................................................................. 95
      7.3.3 Absorption into the Operating Costs .................................... 95
      7.3.4 Self-insurance (Self-insured Retention) ............................... 96
      7.3.5 How Should Reserves be Allocated? .................................... 97
      7.3.6 Reserve Funds ..................................................................... 98
      7.3.7 Contingent Credit Lines ...................................................... 98
  7.4 Risk Financing: Transfer ............................................................... 99
    7.4.1 Property .................................................................................. 100
    7.4.2 Business Income .................................................................... 101
    7.4.3 General Liability .................................................................... 102
    7.4.4 Workers’ Compensation ...................................................... 103
    7.4.5 Motor Vehicle Liability .......................................................... 103
    7.4.6 Employers’ Liability .............................................................. 103
    7.4.7 Flood ...................................................................................... 103
    7.4.8 Directors’ and Officers’ Liability ............................................ 103
    7.4.9 Take Care in Evaluating the Insurance Cost! ....................... 104
    7.4.10 What is a Captive Insurance Company? ............................... 105
  7.5 Decision Making ............................................................................. 106
  7.6 How to Measure the Cost of Risk? ............................................... 107
  7.7 External contribution 7.1: Innovation in the Context of Risk Management ........................................................................ 107
  7.8 External contribution 7.2: The Role of an Insurance Partner .......... 111
  References .......................................................................................... 113
Part IV  Supply Chain Risk Management and Business Continuity

8  Operational Risk and Supply Chain Risk Management ............. 117
  8.1 What is Operational Risk? ........................................... 117
        8.1.1 ... and Supply Chain Risk? .............................. 118
  8.2 Logistics and Supply Chain Management ............................ 118
        8.2.1 The Goal of Customer Service .............................. 119
        8.2.2 The Goal of Flexibility ..................................... 119
  8.3 Creating Resilient—and Less Vulnerable—Processes
        and Supply Chains .................................................. 120
        8.3.1 How to Assess Supply Chain Risks ......................... 122
  8.4 Supply Chain Risk Management Strategies .......................... 124
  8.5 External contribution 8.1: What is Crisis Management? ............ 126
  8.6 External contribution 8.2: Disaster Recovery for Industrial
        Plant: Manufacturing Industry ..................................... 131
