## Contents

### Part I Reconstruction Technique for Total Mastectomy

- Timing of Reconstruction ............................................. 1
- Immediate Breast Reconstruction ................................... 1
- Delayed Breast Reconstruction ...................................... 1
- Delayed-Immediate Breast Reconstruction ....................... 1
- Technique of Reconstruction ........................................ 2
  - Implant Base Reconstruction ...................................... 2
  - Autologous Tissue Base Reconstruction .......................... 2
- Special Consideration .................................................... 3
  - Contralateral Procedure ............................................. 3
  - Skin Reducing Mastectomy ............................................ 3
  - Acellular Dermal Matrix (ADM) Experience ....................... 3
  - Implant Revisions ..................................................... 3
- Case Demonstration (1–31) ............................................ 3
- Suggested Reading ....................................................... 4

Case 1 Immediate Definitive Prosthesis Technique .......................... 7
  - Unilateral Reconstruction .......................................... 7

Case 2 Immediate Definitive Prosthesis Technique .......................... 11
  - Bilateral Reconstruction .............................................. 11

Case 3 Immediate Definitive Prosthesis Technique .......................... 17
  - Unilateral Reconstruction .......................................... 17

Case 4 Immediate Definitive Prosthesis Technique .......................... 23
  - Unilateral Reconstruction with Contralateral Mastopexy .... 23

Case 5 Immediate Definitive Prosthesis Technique .......................... 33
  - Unilateral Reconstruction with Contralateral Augmented Mammaplasty .... 33

Case 6 Immediate Definitive Prosthesis Technique .......................... 37
  - Bilateral Reconstruction .............................................. 37

Case 7 Immediate Definitive Prosthesis Technique .......................... 43
  - Special Situation ..................................................... 43
    - Unilateral Reconstruction with Contralateral Augmented Mammaplasty
      in Previous Augmented Mammaplasty Patient ........................ 43

Case 8 Immediate Definitive Prosthesis Technique .......................... 55
  - Special Situation ..................................................... 55
    - Skin-Reducing Mastectomy (Unilateral Reconstruction) .............. 55

Case 9 Immediate Definitive Prosthesis Technique .......................... 67

Part II  Reconstruction Techniques for Partial Mastectomy 
          and Other Partial Breast Deformities 
          Timing of Reconstruction ............................................. 299
          Technique of Reconstruction ....................................... 299
          Contralateral Procedure .............................................. 300
          Cases .......................................................................... 301
          Suggested Reading .......................................................... 301

Case 32 Volume Replacement ..................................................... 303
Case 33 Volume Replacement ..................................................... 313
Case 34 Volume Replacement ..................................................... 321
          Lateral Thoracic Wall Flap............................................. 321
Case 35 Volume Replacement ..................................................... 325
          Abdominal Advancement Flap ....................................... 325
Case 36 Volume Displacement with Oncoplastic Technique 
          For Upper Outer Quadrant Defect .................................. 331
Case 37 Volume Displacement with Oncoplastic Technique 
          For Upper Outer Quadrant Defect .................................. 341
Case 38 Volume Displacement with Oncoplastic Technique 
          For Upper Inner Quadrant Defect .................................. 349
Case 39 Volume Displacement with Oncoplastic Technique 
          For Lower Outer Quadrant Defect .................................. 353
Case 40 Volume Displacement with Oncoplastic Technique 
          For Lower Outer Quadrant Defect .................................. 359
Case 41 Volume Displacement with Oncoplastic Technique 
          For Lower Inner Quadrant Defect .................................. 365
Case 42 Volume Displacement with Oncoplastic Technique 
          For Central Quadrant Defect ....................................... 369
Case 43 Volume Displacement with Oncoplastic Technique 
          Mastopexy Technique ..................................................... 383
Case 44 Volume Displacement with Oncoplastic Technique 
          Bilateral Mastopexy Technique ...................................... 397

Part III  Reconstruction and Correction Technique for Nipple–Areolar Complex 
          Timing of NAC Reconstruction ........................................ 409
          Situation of NAC Reconstruction ..................................... 409
          Technique of Nipple Reconstruction ................................ 409
          Technique of Areolar Reconstruction ................................ 410
          Authors’ Preferred Technique .......................................... 410
          Cases .......................................................................... 410
          Suggested Reading .......................................................... 410

Case 45 Arrow Flap and Areolar Tattoo ..................................... 411
Case 46 NAC Reposition ............................................................ 421
Part IV  Lipofilling
Harvesting Technique ........................................... 427
Fat Preparation Technique ...................................... 427
Recipient Site ..................................................... 427
Indication ............................................................ 428
Cases ................................................................. 428
Suggested Reading .................................................. 428

Case47  Post Implant Reconstruction ......................... 429
Case48  Post Implant Reconstruction ......................... 437
Case49  Post Implant Reconstruction ......................... 445
Case50  Post TRAM Flap Reconstruction .................... 449
Case51  Post Conservative Surgery ......................... 455
Case52  Post Conservative Surgery ......................... 459
Case53  Post Conservative Surgery ......................... 465
Case54  Post Conservative Surgery ......................... 469
Case55  Post Conservative Surgery ......................... 473

Part V  Surgical Corrections of Complications
Large Thoracic Wall Defects (Locally Advanced Breast Cancer) .......... 487
Scar Revision ....................................................... 488
Lipofilling to Chest Wall as a New Ground Soft Tissue for Implant .......... 488
NAC (Nipple–Areolar Complex) and IMF (Inframammary Fold) Repositioning ......................................................... 488
  Post Conservative Surgery .................................... 488
  Postmastectomy Surgery ...................................... 488
  IMF Positioning .................................................. 488
Prosthesis Substitution for Ruptured Prosthesis .............................. 489
Cases ................................................................. 489
Suggested Reading .................................................. 489

Case56  Large Thoracic Wall Defects (Advanced Cancer) ............... 491
Case57  Scar Revision ............................................. 497
Case58  Scar Revision ............................................. 509
Case59  Lipofilling to Chest Wall as a New Ground Soft Tissue for Implant .......... 521
Case60  NAC and IMF Repositioning ................................ 525
Case61  Prosthesis Substitution for Ruptured Prosthesis .............. 533
Case62  IMF Repositioning After Capsular Contracture
  Without Prosthesis Substitution ................................ 541
Atlas of Breast Reconstruction
