6 How I Ventilate a Patient Non Invasively

6.1 Continuous Positive Airway Pressure
   6.1.1 Applications

6.2 Volume Modes
   6.2.1 Assisted-Controlled Ventilation
   6.2.2 Synchronized Intermittent Mandatory Ventilation

6.3 Pressure Modes
   6.3.1 Pressure Support Ventilation
   6.3.2 Pressure Controlled Ventilation
   6.3.3 Proportional Assist Ventilation

Suggested Reading

7 How I Set a Ventilator

7.1 What do Volume and Pressure Mode Settings Have in Common?
   7.1.1 The Trigger
   7.1.2 The Respiratory Rate
   7.1.3 Fraction of Inspired Oxygen

7.2 Specific Setting of Volume Modes
   7.2.1 Tidal Volume
   7.2.2 Expiratory Pressure
   7.2.3 Inspiratory Flow
   7.2.4 Inspiratory/Expiratory Ratio
   7.2.5 Setting Pressure Modes

Suggested Reading

8 Other Modes of Ventilation

8.1 Neurally Adjusted Ventilatory Assist
8.2 Airway Pressure-Release Ventilation or Biphasic Positive Airway Pressure
8.3 High Frequency Ventilation
8.4 Volume-Assured Pressure Support Ventilation and Volume-Guaranteed Ventilation

10 Myths, Prejudices and Real Problems

10.1 The Side Effects are Negligible
10.2 NIV Does Not Work in Severely Ill Patients
10.3 The Work Load Necessary for NIV is Too Onerous ............... 70
10.4 The Helmet is the Interface of Choice ............................. 72
10.5 It is Better Not to Use an Interface with a Large Dead Space ........................................ 73
10.6 A Patient Being Non Invasively Ventilated Must Not Be Sedated ........................................ 73
10.7 It is (Almost) Impossible to Use NIV in a Comatose Patient ........................................ 75
10.8 Reimbursement for NIV Through the DRG System ............. 75
Suggested Reading .......................................................... 77

14 Eight Rules to Remember When Ventilating a Patient Non Invasively
14.1 Everything Must be Ready and Everything Must be Familiar
14.2 There is No Such Thing as the Best Method of Ventilation
14.3 Choose the Ventilator According to the Patient’s Need
14.4 There is no Single Interface Valid for All Patients
14.5 Explain What You Want to Do to the Patient
14.6 Never Work Alone
14.7 Be Aware of Your Limits
14.8 Monitor and Record What You Do
