Part I  Medical Education—A Democratising Force for Medicine .......... 1

1 Medical Education as Patient ...................................................... 3
   Not Prophecy, but Spotting Trends ........................................... 3
   Medical Education in an Historical Key ..................................... 6
      Identity .................................................................................. 7
      Location ................................................................................ 7
   Crossroads and Crisis: How Is the Patient? ............................... 8
   The Symptom May Be the ‘Education’ in Medical Education,
      While the Cure May Be a New Approach to Education .......... 10
   Designing Learning for Work ................................................... 14
   Collaborative Learning at Work .............................................. 14
   Communication at Work ......................................................... 15
   Democracy at Work ............................................................... 15
   The Work of Identity .................................................................. 16
   Reflexivity at Work ................................................................... 17

2 Beyond Practical Reasoning ....................................................... 19
   From Critical Thinking to Practical Reasoning: A Necessary
      but Not Sufficient Change in Medical Education .................. 19
   A New Wave of Medical Education Thinking ............................ 26
   ‘Good Enough’ is Not Good Enough ......................................... 29

3 Learning from Learning Theory ............................................... 33
   To the Things Themselves ......................................................... 33
   Where’s the Sense in Medical Education?—Re-Visiting
      Practical Knowing ................................................................. 37

4 Socio-Cultural Learning Theories ............................................. 43
   Learning from History ............................................................ 43
   Three Approaches to Learning ............................................... 44
Miller Lite? ................................................................. 47
Contrasting Metaphors for Learning ................................ 50
Activity Theory .............................................................. 52
Cognitive Apprenticeship and Distributed Cognition ........... 55
Dynamicist Learning and Complexity .............................. 55
Systems Thinking and Learning ........................................ 57
Conclusions .................................................................... 60

Part II  Identity, Power and Location in Medical Education .. 61

5  Producing Doctors .......................................................... 63
What is ‘Identity?’ .......................................................... 63
From the Identity of ‘Medical Student’ to the Identity of
‘Doctor’: Can Learning Theory Illuminate This Transition? .... 66
Actor-Network Theory (ANT) .............................................. 68
Communities of Practice (COP) ......................................... 70
Participation vs. Reification .............................................. 72
Participation vs. Non-Participation .................................... 73
Modes of Belonging ......................................................... 73
Cultural-Historical Activity Theory (CHAT) ....................... 75

6  New Forms of Identity in a Runaway World of Medicine ... 81
Can the Center Hold? ...................................................... 81
The Doctor as Diagnostician, Symptomatologist and Connoisseur 82
The Doctor at Work in the Twenty-First Century: Emergence of New Identities Such as the ‘Medical Citizen’ .......... 86
Two Sample Identities in Transition: Doctor as Diagnostician and Doctor as Teacher ........................................... 90

7  The Medical Educator and the Clinical Teacher ............... 93
Unpicking the Threads .................................................... 93
A Framework for Discussing the Identity of the Medical Educator ........ 95
Identities in Crisis and Transformation ............................... 96
Using Social Learning Theory Frameworks to Identify
the Medical Educator and Clinical Teacher ......................... 98

8  Identity Construction of the Medical Educator Through Learning and Writing ........................................ 107
Introduction ..................................................................... 107
Identity Defined by Philosophy of Teaching and Learning:
Student-Centeredness and Democracy in the Classroom
and Clinic ....................................................................... 109
Empathy and the ‘Prospero Effect’ .................................... 111
Medical Education’s Conservatism .................................... 112
The ‘Constituent Principle’ ............................................. 113
A Literary Perspective on Identities of the Medical Educator ........ 114
## Contents

### 9 Power in Medical Education
- Bodies of Power .......................................................... 119
- Sovereign, Capillary, Virtue and Virtual Power .................. 124
  - Sovereign Power .......................................................... 124
  - Capillary Power .......................................................... 127
  - Virtue Power ............................................................... 130
  - Virtual Power ............................................................. 133

### 10 Place Matters: Location in Medical Education
- Introduction ................................................................. 135
- Where Are We in Medical Education? .............................. 136
- Hospital Architectures and Cognitive Architectures ............ 141
  - The Platform ............................................................... 144
  - The White Cube .......................................................... 145
- Work-Based Learning: Vocation as Location and Deterritorialization .......................... 147

### 11 Learning by Simulation and the Simulation of Learning
- An Age of Simulation ..................................................... 153
- Theory of Simulation: Classical to Postmodern .................. 156
- Strengths and Weaknesses of Learning by Simulation ........... 158
  - Bodies and Nobodies .................................................... 158
  - Assessment ................................................................. 159
  - Theory ...................................................................... 159
- The Simulation Project: Will a Dialogue Emerge Between
  Simulation and Work-Based Learning? ............................. 162
- The Project of Simulation ............................................... 162
- Simulation of Learning for Interpersonal Communication .... 166

### 12 Global Medical Education—A Post-Colonial Dilemma
- Imperialism by the Back Door? ....................................... 171
- Comparative Education .................................................. 174
- Is Western Medical Education Infectious? ........................ 175
- Flaws in the Global Medical Education Vision .................... 178
- Global, Local or ‘Glocal’? The Trade in Knowledge as a Commodity .................................................. 179
- From Reinforcing the Colonial Legacy to Challenging
  the Colonial Gaze ........................................................ 182
- Empire and Forms of Resistance ....................................... 183

### Part III Medical Education Research—A Democratising Force
for Medical Education ...................................................... 185

### 13 Let’s Get Real: Medical Students Learning from,
with and About Patients ................................................... 187
- Productive Forms of the Medical Encounter ......................... 187
- Towards an Authentic Patient-Centered Medical Education .... 188
