## CONTENTS

Preface........................................................................................................................................ix

Acknowledgement .......................................................................................................................... xi

List of Contributors ....................................................................................................................... xiii

### Advanced Water Supply

1 Strategies for Enhancing Sustainability of Urban Water Systems ........................................ 3  
_Jiri Marsalek_

2 Environmental Advances by Water Supply Impact ................................................................. 13  
_Jozef Kriš_

3 Water Pollution Level as a Key Impact on Human Health. Analysis and Prediction of Health Status After Water Supply System Improvement in Chernivtsi City ....................................................... 25  
_Borys Skip and Konstantin Nakonechny_

4 Examples of Reconstruction and Extension of Group Water Supply Systems in The Czech Republic ................................................................................................................................. 39  
_Pavel Kopeček and Radka Pešoutová_

5 Nom Removal from Freshwater Supplies by Advanced Separation Technology .................. 49  
_Nicolo Aliverti, Arianna Callegari, Andrea G. Capodaglio and Philippe Sauvignet_

### Advanced Wastewater Treatment

6 The Influence of Seasonality on the Economic Efficiency of Wastewater Treatment Plants ....................................................................................................................... 65  
_Francesc Hernández-Sancho, María Molinos-Senante and Ramón Sala-Garrido_

7 Perspectives of Decentralized Wastewater Treatment for Rural Areas .............................. 75  
_Petr Hlavínek_

8 Combined Sewer Network in Hilly Region: Field Survey and Pollutant Overflow Optimization ......................................................................................................................... 87  
_Stefano Pagliara, Iacopo Carnacina and Michele Palermo_
9 Solar Water Purification at Household Level .................................................99
Oleg Udovyk

10 Application of Membrane and Membrane-Like Technologies for State-of-the-Art Wastewater Treatment ...............................................................107
Andrea G. Capodaglio and Arianna Callegari

11 Type of Sewer System – Technical and Environmental Advances and Arrangements ............................................................................................121
Štefan Stanko, Jozef Kriš and Ivona Škultétyová

12 Ozonation of Tertiary Treated Wastewater - A Solution for Micro Pollutant Removal? ...............................................................................................131
Norbert Kreuzinger and Heidemarie Schaar

13 Comparison of Two Treatments for the Removal of Organic Micro-Pollutants : Conventional Activated Sludge (CAS) Followed by Ultrafiltration (UF) vs. Membrane Bioreactor (MBR) ........................................147

14 Sludge Tanks Operation in Small and Middle-Sized Waste Water Treatment Plants .............................................................................................163
Ivana Mahríková

15 Use of Natural Materials for Wastewater Treatment & Improvement of Water Quality .......................................................................................171
Gagik Torosyan, Gagik Matevosyan and Siranush Harutyunyan

16 Feasibility Studies for Water Reuse Projects: Economic Valuation of Environmental Benefits ..........................................................181
María Molinos-Senante, Francesc Hernández-Sancho and Ramón Sala-Garrido

Case Studies of Water Resource Management

17 Water Resources in Jordan ........................................................................193
Anwar Jiries

18 Transboundary Migration of the River Water Pollutants Between Ukraine and Romania: A Case Study of Bukovyna Region ..................201
Igor Winkler

19 Impact of Waste Water Treatment Facilities on Ground Water (An Example of Svetlogorsk City, Belarus) ......................................................211
Valery Khomich, Tamara Kukharchyk and Alena Aucharova
CONTENTS

20 Sustainable Use of Wastewater and Sludge in Jordan; Residues of Persistent Organic Pollutants, A Review .........................................................219
Mufeed Batarseh

21 Reflections Over the Water Cycle Impact on the Peace Process in the Middle East ............................................................................................227
Shmuel Brenner and Kristina Donnelly

Poster Section

22 New Method of the Boundary Rainfall Capacity Computation ...............239
Dušan Rusnák

23 Contributions to the Development of Photometric and Spectrophotometric Portable Kits for Water Analysis .................................................247
Sonia Gutt, Georg Gutt and Igor Winkler

24 A New Generation of Instrumental Analytical Devices for Controlling and Monitoring of Water Quality .........................................................257
Georg Gutt, Sonia Gutt and Igor Winkler

25 The Study of Toxic Effects of Wastewaters Discharged From the Vilnius Treatment Plant on Fish .................................................................267
Nijolė Kazlauskienė, Milda Zita Vosylienė and Edvinas Taujanskis

Danutė Marčiulionienė, Danguolė Montvydienė and Ričardas Paškauskas

27 Phytoremediation of Waters at An Urban Station of Water Purification by Water Hyacinth with Preinduction of Metallothioneins ..........287
Ilya Danilin, Olga Momot and Boris Synzynys

28 Anoxic Granulation in USB Reactor with Anaerobic Granulated Sludge as An Inoculum ............................................................................295
Katarina Galbova, Ivana Jonatova, Lenka Babjakova and Miloslav Drtil

29 Comparison of Two Flat Sheet Membrane Modules Used in a Real Domestic Wastewater Treatment Plant .........................................................303
Tina Pikorova, Petr Hlavinek and Petra Pagacova

30 Problems of Regulation of Anthropogenic Load on the Water Objects with Various Dilution Ratio in Ukraine ..................................................313
Alla Choban and Igor Winkler
31 Water Supply of Chernivtsi (Ukraine): Problems and Possible Solutions..........................................................................................................................319
*Yarema Tevtul and Igor Winkler*

32 Sorption of Ammonium Cations and Heavy Metal Ions from the Natural Artesian Waters with the Basalt Tufa Samples ..................325
*Valentyna Tsymbalyuk, Anatoliy Woloshuk and Igor Kobasa*

33 Deactivation of Hazardous Uranium Contaminated Water in Black Sea Basin ..........................................................................................329
*Borys Kornilovych, Iryna Kovalchuk, Larysa Spasonova and Mike Wireman*

34 The Influence of Wastewater Disposal System on the Quality and Quantity of the Wastewater Transported to a Wastewater Treatment Plant .....................................................................................................................339
*Radim Mifek and Petr Hlavinek*

**Subject Index** ...........................................................................................................345
Advanced Water Supply and Wastewater Treatment: A Road to Safer Society and Environment
Hlavinek, P.; Winkler, I.; Marsalek, J.; Mahrikova, I. (Eds.)
2011, XIX, 353 p., Hardcover
ISBN: 978-94-007-0279-0
