Contents

Part I  Cognitive Radio and Radio Spectrum

1  Introduction to Cognitive Radio ................................. 3
  Berna Sayrac

2  Spectrum Usage Models for the Analysis, Design
  and Simulation of Cognitive Radio Networks ................. 27
  Miguel López-Benítez and Fernando Casadevall

3  Bandwidth-Efficient Cooperative Spectrum Sensing .......... 75
  X. Zhou, G. Y. Li, D. Li, D. Wang and A. C. K. Soong

4  Emergency Networking in Licensed Spectrum Using
  Cognitive Radios: Challenges and Insights .................. 101
  H. Viswanathan and D. Pompili

5  Signature Detection for Context Awareness in Cognitive
  Radio Networks ..................................................... 119
  E. Mera Avila, D. Muñoz Rodriguez and C. Vargas Rosales

6  Generalized Eigenvalue Based Spectrum Sensing .......... 139
  Muhammad Zeeshan Shakir and Mohamed-Slim Alouini

Part II  Cognitive Radio for Wireless and Cellular Networks

7  From Self-Organizing to Cognitive Networks: How Can the
  Cellular Network Operator Make Use of the
  Cognitive Paradigm? .............................................. 179
  Berna Sayrac

**Brief Bio of the Editors**

**Index**
Cognitive Radio and its Application for Next Generation Cellular and Wireless Networks
Venkataraman, H.; Muntean, G.-M. (Eds.)
2012, XII, 412 p., Hardcover
