Contents

1 Introduction ................................................................. 1

Part I Stable Isotopes

2 Isotope Geochemistry of Natural Waters ......................... 11
  2.1 Some Properties of Waters and Solutions .................. 11
  2.1.1 The Notion of Activity and the Activity Coefficient ... 13
  2.1.2 The Relationship between Solvent and Solute Activity ... 14
  2.2 Water Vapor Pressure over the Water and Solution ........... 15
  2.3 Physicochemical Foundations of Isotope Separation ........ 17
  2.4 Hydrogen and Oxygen Isotope Separation at Phase Transition of Water ................................................. 26
  2.5 Relationship Between the Isotope Reaction Change Constant and the Fractionation Factor .............................. 30
  2.6 Hydrogen and Oxygen Isotope Fractionation at Interaction Between Water and Gases and Rocks ..................... 33
  2.7 Isotope Geothermometry ........................................... 35

3 Isotopic Composition of Ocean Water .............................. 49
  3.1 Distribution of Hydrogen and Oxygen Isotopes and Water Dynamics ..................................................... 49
  3.2 Effect of Evaporation and Vertical Water Exchange .......... 54
  3.3 Dynamics of the Ocean Water ..................................... 57
  3.4 Isotopic Composition of Ocean Water in the Past .......... 62

4 Isotopic Composition of Atmospheric Moisture ................ 67
  4.1 Hydrogen and Oxygen Isotope Fractionation in the Hydrological Cycle .................................................. 67
  4.2 Isotopic Balance in the Global Hydrologic Cycle at Evaporation and Condensation of Water .............................. 79
  4.3 Isotopic Composition of Atmospheric Water in the Past ... 86
## Isotopic Composition of Surface Continental Waters

5.1 Isotopic Balance of the Continental Waters ........................................ 95
5.2 Isotopic Composition of the River and Lake Water .......................... 101
5.3 Isotopic Composition of Water in Evaporating Basins .................... 107

## Isotopic Composition of Water in the Unsaturated and Saturated Zones

6.1 Relationship Between Surface and Ground Water .......................... 116
6.2 Groundwater Recharge at Present Time ........................................ 118
6.3 Groundwater Recharge in the Past .............................................. 118
6.4 Identification of Area of Groundwater Recharge ............................ 119
6.5 Relationship Between Aquifers ................................................... 123
6.6 Mixing Proportions of Groundwater of Different Genesis ............... 125
6.7 Groundwater Residence Time in an Aquifer ................................. 126
6.8 Relationship of Waters in Conjugate Hydrologic Basins ................. 127

## Isotopic Composition of Formation Waters

7.1 Relationship Between Hydrogen and Oxygen Isotopes in Formation Waters ........................................ 129
7.2 Isotopic Composition of Formation Water in Sedimentary Basins .... 134

## Hydrogen and Oxygen Isotopic Composition of Sedimentary Rocks of Marine Genesis and Implications for Paleothermometry

8.1 Isotopic Composition of Sediments and Pore Water ........................ 155
8.2 Paleothermometry Based on the Isotopic Composition of Cherts ....... 161
8.3 Paleothermometry Based on the Isotopic Composition of Carbonate Rocks ........................................ 169
8.4 Isotopic Composition of Evaporates ............................................ 175

## Hydrogen and Oxygen Isotopic Composition of Groundwater in Volcanic Regions

9.1 Use of Isotopes in Studying the Origin of Thermal Water ............... 179
9.2 Isotopic Geothermometers ......................................................... 192

## Hydrogen and Oxygen Isotopic Composition of Minerals of Magmatic and Metamorphic Rocks and Fluid Inclusions

10.1 Role of Water in Hydrothermal Alteration of the Rocks and Minerals ........................................ 195
10.2 Meteoric Water in the Processes of Hydrothermal Formation of Minerals ........................................ 201

## Other Stable Isotopes in the Hydrosphere

11.1 Stable Isotopes of Carbon ......................................................... 205
11.2 Stable Isotopes of Sulfur ......................................................... 209
## Part II  Cosmogenic Radioisotopes

12  Origin and Production of Cosmogenic Radioisotopes  
12.1 Composition of Cosmic Radiation in the Earth’s Atmosphere  
12.2 Composition and Steady-state Abundances of Cosmogenic Radioisotopes in the Outer Shells of the Earth  
12.3 Distribution of Cosmogenic Radioisotopes in the Exchange Reservoirs  

13  Tritium in Natural Waters  
13.1 Properties of Tritium and Sources of Its Occurrence  
13.2 Global Circulation of Tritium Water  
13.2.1 Tritium in Atmospheric Hydrogen and Methane  
13.2.2 Tritium in Atmospheric Water Vapor  
13.2.3 Tritium in Precipitation  
13.2.4 Global Distribution of Tritium  
13.3 Regional Distribution of Tritium in Precipitation  
13.3.1 The North American Continent  
13.3.2 The European–Asiatic Continent  
13.3.3 The African Continent  
13.3.4 The South American Continent  
13.3.5 Australia and New Zealand  
13.3.6 Antarctic  
13.3.7 Tritium in Precipitation over the Oceans  
13.4 Formation of Tritium Concentrations in the Atmosphere  
13.5 Tritium in Ocean Waters  
13.6 Tritium in Continental Surface Waters  
13.6.1 Tritium Content in River Water  
13.6.2 Tritium in Lakes and Reservoirs  
13.7 Tritium in Groundwaters  
13.8 Dating by Tritium  
13.8.1 Piston Flow Model  
13.8.2 Dispersive Model  
13.8.3 Complete Mixing Model  
13.8.4 Symmetrical Binominal Age Distribution Model  
13.8.5 Model of Mixing Waters of Different Ages  
13.8.6 Complicated Model  

14  Radiocarbon in Natural Waters  
14.1 Origin and Distribution of Radiocarbon in the Nature  
14.2 Natural Variations of Radiocarbon in the Atmosphere and Biosphere  
14.3 Natural Radiocarbon in the Oceans  
14.4 Technogenic Radiocarbon in the Atmosphere and Oceans  
14.5 Forecast of Carbon Dioxide Increase in the Atmosphere  
14.6 Principles of Radiocarbon Dating
14.7 Radiocarbon Dating of Groundwater ........................................... 335
14.8 Formation of Chemical and Isotonic Composition of Groundwater’s Carbonate System ........................................... 339
14.9 Corrections in Groundwater Dating by Radiocarbon .................. 343

15 The Other Cosmogenic Isotopes in Natural Waters .................. 361
15.1 Origin of Other Cosmogenic Radioisotopes in the Atmosphere .... 361
15.2 Distribution of Other Cosmogenic Isotopes in the Hydrosphere ... 363
15.3 Use of Radioisotopes as Tracers in the Hydrological Cycle ...... 365

Part III Radiogenic Isotopes

16 Production and Distribution of Radiogenic Isotopes .............. 377
16.1 Geochemistry of Radiogenic Elements ................................. 378
  16.1.1 Uranium ............................................. 378
  16.1.2 Thorium ............................................. 382
  16.1.3 Protactinium .......................................... 383
  16.1.4 Actinium .............................................. 384
  16.1.5 Radium ............................................... 384
  16.1.6 Radon .................................................. 385
16.2 Separation of Radiogenic Elements and Isotopes .................. 386
  16.2.1 Separation of Uranium Isotopes ................................ 388
  16.2.2 Separation of Thorium Isotopes ................................ 389
  16.2.3 Separation of Radium Isotopes ................................ 390
16.3 Distribution of Radiogenic Elements in Natural Waters .......... 391
  16.3.1 Uranium Isotopes in Natural Waters .............................. 392
  16.3.2 Thorium Isotopes in Natural Waters .............................. 398

17 Dating of Surface Water, Groundwater, and Sediments .......... 407
17.1 Dating of Closed Reservoirs .................................................. 407
17.2 Dating of Groundwater ....................................................... 411
17.3 Dating of Sediments ......................................................... 413
  17.3.1 Uranium-Uranium Method ........................................... 413
  17.3.2 Uranium-Ionium Method .............................................. 415
17.4 Isotopes of Radiogenic Elements as Indicators of Hydrologic Processes .................................................. 418

Part IV Applications

18 Applications to the Problems of Dynamics of Natural Waters ... 427
18.1 Dynamics of Moisture in the Atmosphere ................................ 427
18.2 Mixing of River and Sea Waters in Estuaries ......................... 436
18.3 Water Exchange in the River Basins, Lakes, and Reservoirs .... 446
18.4 Water Dynamics in Unsaturated and Saturated Zone .............. 452
18.5 Recharge and Discharge of Groundwater ............................... 456
18.6 Relationship of Aquifers .................................................... 462
18.7 Separation of Recharged Water of Different Genesis in Mining ... 469
