## Part I Role of Multiple Representations in Learning Biology

<b>1 Introduction to Multiple Representations: Their Importance in Biology and Biological Education . . . . .</b>	<b>3</b>
Chi-Yan Tsui and David F. Treagust	
<b>2 Identifying and Developing Students' Ability to Reason with Concepts and Representations in Biology . . . . .</b>	<b>19</b>
Trevor R. Anderson, Konrad J. Schönborn, Lynn du Plessis, Abindra S. Gupthar, and Tracy L. Hull	
<b>3 Pictures in Biology Education . . . . .</b>	<b>39</b>
Wolff-Michael Roth and Lilian Pozzer-Ardenghi	
<b>4 Possible Constraints of Visualization in Biology: Challenges in Learning with Multiple Representations . . . . .</b>	<b>55</b>
Billie Eilam	
<b>5 Promoting the Collaborative Use of Cognitive and Metacognitive Skills Through Conceptual Representations in Hypermedia . . . . .</b>	<b>75</b>
Lei Liu and Cindy E. Hmelo-Silver	
<b>6 Learning and Teaching Biotechnological Methods Using Animations . . . . .</b>	<b>93</b>
Hagit Yarden and Anat Yarden	

## Part II Implications for Biology Teaching and Teacher Education with Multiple Representations

<b>7 Experts' Views on Translation Across Multiple External Representations in Acquiring Biological Knowledge About Ecology, Genetics, and Evolution . . . . .</b>	<b>111</b>
Konrad J. Schönborn and Susanne Bögeholz	

**8 Evolution Is a Model, Why Not Teach It That Way? . . . . . 129**  
Paul Horwitz

**9 Multiple Representations of Human Genetics  
in Biology Textbooks . . . . . 147**  
Pierre Clément and Jérémy Castéra

**10 Deconstructing and Decoding Complex Process Diagrams  
in University Biology . . . . . 165**  
Phyllis B. Griffard

**11 Learning Tree Thinking: Developing a New Framework  
of Representational Competence . . . . . 185**  
Kristy L. Halverson and Patricia Friedrichsen

**12 Understanding Photosynthesis and Cellular Respiration:  
Encouraging a View of Biological *Nested* Systems . . . . . 203**  
Reneé Schwartz and Mary H. Brown

**13 Scientific Models in the Severe Acute Respiratory  
Syndrome (SARS) Research and in the Biology Curriculum . . . . . 225**  
Alice Siu Ling Wong, Maurice M.W. Cheng, and Valerie W.Y. Yip

**Part III Assessment of Learning and Teaching with Multiple  
Representations**

**14 Supporting and Assessing Complex Biology Learning  
with Computer-Based Simulations and Representations . . . . . 247**  
Barbara C. Buckley and Edys S. Quellmalz

**15 Secondary Students' Understanding of Genetics  
Using *BioLogica*: Two Case Studies . . . . . 269**  
Chi-Yan Tsui and David F. Treagust

**16 The Hidden Hand that Shapes Conceptual Understanding:  
Choosing Effective Representations for Teaching Cell  
Division and Climate Change . . . . . 293**  
Kai Niebert, Tanja Riemeier, and Harald Gropengießer

**17 Analogy and Gesture for Mental Visualization  
of DNA Structure . . . . . 311**  
Anveshna Srivastava and Jayashree Ramadas

**18 Multiple Representations in Modeling Strategies for the  
Development of Systems Thinking in Biology Education . . . . . 331**  
Roald Pieter Verhoeff, Kerst Th Boersma, and Arend Jan Waarlo

<b>19 Conclusion: Contributions of Multiple Representations to Biological Education</b> . . . . .	349
David F. Treagust and Chi-Yan Tsui	
<b>About the Authors</b> . . . . .	369
<b>Index</b> . . . . .	381
