

Contents

1	Introduction	1
	Sun and Earth	2
	Cycles and Trends	4
	The Need for a Long Chronology	5
	References	7
2	Origins	9
	Meteoritic Ages	10
	Modelling the Main Sequence Sun	12
	The Contribution of Helioseismology	16
	References	17
3	The Young Sun	19
	The Moon and Meteorites	20
	The Faint Young Sun	23
	The SSM	26
	References	27
4	Isotopes and Ice Cores	29
	Cosmogenic ^{10}Be	30
	Ice Cores	32
	SEPs	33
	References	34
5	Cosmogenic Radiocarbon	37
	Cosmogenic ^{14}C	38
	Grand Maxima and Minima	39
	Secular Trends	42
	References	44

6	The Solar Cycle	47
	The Sunspot Cycle	48
	Solar Luminosity	49
	The Magnetic Connection	51
	Related Effects	54
	References	56
7	Solar Rotation	59
	Rotation	60
	Luminosity	61
	The Neutrino Flux	64
	References	65
8	Contemporary History	69
	Diameter	70
	Total Solar Irradiance	71
	Sunspots	74
	The Magnetic Flux	76
	References	79
9	Lessons from History	83
	Cumulative Change	84
	Forecasting	85
	Heliogeology	86
	References	87
	Index	89
