Contents

Section I  Teaching and Learning Chemistry

Understanding Chemistry Concepts

1  Constructing Active Learning in Chemistry: Concepts, Cognition and Conceptions ................................................. 5
   Keith S. Taber

2  The Development of Theoretical Frameworks for Understanding the Learning of Chemistry ........................................ 25
   Gail Chittleborough

3  Linking the Macro with the Submicro Levels of Chemistry: Demonstrations and Experiments that can Contribute to Active/meaningful/Conceptual Learning ........................................ 41
   Georgios Tsaparlis

4  Challenging Myths About Teaching and Learning Chemistry . . . 63
   Diane M. Bunce

Students’ Characteristics on Chemistry Learning

5  The Learning of Chemistry: The Key Role of Working Memory ................................................................. 77
   Norman Reid

6  Educational Models and Differences Between Groups of 16-year-old Students in Gender, Motivation, and Achievements in Chemistry ......................................................... 103
   Iztok Devetak and Saša A. Glažar
Section II Approaches in Chemistry Teaching for Learning with Understanding

Cooperative and Collaborative Learning

7 Twenty-Five Years of Experience with Interactive Instruction in Chemistry ........................................ 129
George M. Bodner, Patricia A. Metz and Kirsten Lowrey Casey

8 Problem Solving Through Cooperative Learning in the Chemistry Classroom ............................ 149
Liberato Cardellini

9 The Learning Company Approach to Promote Active Chemistry Learning: Examples and Experiences from Lower Secondary Education in Germany ............................ 165
Torsten Witteck, Katharina Beck, Bettina Most, Stephan Kienast and Ingo Eilks

Teaching Strategies

10 Teaching Chemistry Conceptually ........................ 193
Vickie M. Williamson

11 Students’ Achievement in Learning Chemistry Through the Design and Construction Approach to Laboratory Activity and the Relation with Their Prior Achievements and Motivation to Learn ........................................ 209
Margareta Vrtačnik, Kristina Sodja and Mojca Juriševič

12 Contexts as Learning Catalysts for Students and Teachers: Approaches and Exemplary Results from the Projects Chemie im Kontext and CHEMOL ................................. 233
Ilka Parchmann, Nina Dunker and Wiebke Endres

13 How Does Level of Guidance Affect Understanding When Students Use a Dynamic Simulation of Liquid–Vapor Equilibrium? ............................................. 243
Sevil Akaygun and Loretta L. Jones

14 Evaluation of the Predict-Observe-Explain Instructional Strategy to Enhance Students’ Understanding of Redox Reactions .............................................. 265
David F. Treagust, Zuzi Mthembu and A. L. Chandrasegaran
15 Application of Case Study and Role-Playing in Forensic Chemistry and Analytical Chemistry Education: Students’, Graduates’ and Teachers’ Points of View .......................... 287
Iwona Maciejowska, Renata Wietecha-Posłuszny, Michał Woźniakiewicz and Paweł Kościelniak

Section III Curriculum Reform and Teachers

16 Fostering Active Chemistry Learning in Thailand: Toward a Learner-Centered Student Experiences ................ 305
Richard K. Coll, Chanyah Dahsah, Sanoe Chairam and Ninna Jansoon

17 Active Learning in Computerized Chemical Education Environments .................................................. 345
Yehudit Judy Dori, Miriam Barak and Miriam Carmi

18 Prospective Chemistry Teachers’ Use of Student-Centered Learning During Their Teaching Practicum ................ 375
Vesna Ferk Savec and Katarina S. Wissiak Grm

About the Authors .................................................. 397

Author Index ........................................................ 407

Subject Index ...................................................... 415
Learning with Understanding in the Chemistry Classroom
Devetak, I.; Glazar, S.A. (Eds.)
2014, XVII, 418 p. 129 illus., Hardcover
ISBN: 978-94-007-4365-6
