Contents

The Dual Generalized Inverses and Their Applications in Kinematic Synthesis .................................................. 1
Jorge Angeles

On the Twist Recovery Methodologies After Failure .................. 11
Leila Notash

A Loop-Based Approach for Rigid Subchain Identification in General Mechanisms ........................................... 19
Shuxian Xia, Huafeng Ding and Andres Kecskemethy

Self-Motions of Planar Projective Stewart Gough Platforms ............ 27
G. Nawratil

Asymptotic Singularities of Planar Parallel 3-RPR Manipulators ........ 35
Michel Coste

Classification of the Singularity Loci of m-n Fully-Parallel Manipulators . 43
Raffaele Di Gregorio

Compensation of Compliance Errors in Parallel Manipulators Composed of Non-perfect Kinematic Chains ......................... 51
Alexandr Klimchik, Anatol Pashkevich, Damien Chablat and Geir Hovland

Motion Planning of the Multi-Bar System: The Imbalanced Jacobian Algorithm .................................................... 59
Janusz Jakubiak, Krzysztof Tchoń and Mariusz Janiak

Robotic Fish Kinectics Design Based on a Fuzzy Control ............... 67
Pei-Jun Lee and Wen-June Wang
Self-Calibration of Redundantly Actuated PKM Based on Motion Reversal Points .......................................................... 75 Andreas Müller and Maurizio Ruggiu

Trajectory Planning for Systems with Homotopy Class Constraints ....... 83 Soonkyum Kim, Koushil Sreenath, Subhrajit Bhattacharya and Vijay Kumar

Validation of a Power Grasping Algorithm for an Anthropomorphic Robotic Hand on the Basis of Human Grasping Action .................. 91 F. Cordella, L. Zollo, A. Salerno, E. Guglielmelli and B. Siciliano

On the Vertical Darboux Motion .............................................. 99 Chung-Ching Lee and Jacques M. Hervé

Kinematic Analysis of a Planar Tensegrity Mechanism for Wave Energy Harvesting .................................................... 107 Rafael E. Vasquez, Carl D. Crane III and Julio C. Correa

Motion Planning for Parallel Robots with Non-holonomic Joints ........ 115 Krzysztof Tchoń, Janusz Jakubiak, Patrick Grosch and Federico Thomas

Synthesis of a Family of Regular Deployable Polyhedral Mechanisms (DPMs) ................................................................. 123 Guowu Wei and Jian S. Dai

Type Synthesis of Binary Actuated Parallel Mechanisms ................. 131 D. Schütz, R.J. Ellwood, A. Raatz and J. Hesselbach

Biokinematic Study of Barn Owl Head Movements for the Development of a Bio-Inspired Active Vision Robotic System ............... 139 Ouriel Barzilay, Yoram Gutfreund and Alon Wolf

Persistent Screw Systems of Dimension Four ................................. 147 Marco Carricato

Simplified Voronoi Diagrams for Motion Planning of Quadratically-Solvable Gough–Stewart Platforms ................................... 157 Rubén Vaca, Joan Aranda and Federico Thomas

Dynamic Capabilities of a Parallel Robot Based Routing Machine ........ 165 J. Corral, Ch. Pinto, F.J. Campa and O. Altuzarra

Kinematic Synthesis of Multi-Fingered Robotic Hands for Finite and Infinitesimal Tasks ..................................................... 173 E. Simo-Serra, A. Perez-Gracia, H. Moon and N. Robson

Inverse Kinematics Solver for Android Faces with Elastic Skin .......... 181 Emarc Magtanong, Akihiko Yamaguchi, Kentaro Takemura, Jun Takamatsu and Tsukasa Ogasawara
