Contents

1 Introduction .................................................. 1
  1.1 Background ............................................. 1
  1.2 Significance ............................................ 3
  1.3 Objectives .............................................. 5
  1.4 Research Questions .................................... 5
  1.5 Methodological Overview .............................. 6
References .................................................. 6

2 Review of Literature ........................................... 9
  2.1 Urban Growth and Sprawl ................................ 9
  2.2 Physical Patterns and Forms of Urban Growth and Sprawl 10
  2.3 Temporal Process of Urban Growth and Sprawl ........... 12
  2.4 Remote Sensing for Analysis of Urban Growth and Sprawl 13
  2.5 Measurement and Analysis of Urban Growth and Sprawl 14
  2.6 Administrative Versus Natural Boundary for the Analysis 21
  2.7 Determining the Natural Boundary of the City .......... 21
  2.8 Subdivision of Natural City Extent ..................... 22
  2.9 Similar Studies in India ............................... 24
  2.10 Similar Studies on Kolkata ............................ 26
  2.11 Scope of the Research .................................. 26
References .................................................. 27

3 Methodology ................................................... 33
  3.1 Data .................................................. 33
  3.2 Software Used .......................................... 35
  3.3 Image Registration ..................................... 35
  3.4 Encoding Hardcopy Map ................................ 36
  3.5 Encoding Vector Maps .................................. 37
  3.6 Image Classification .................................... 38
  3.7 Assessment of Classification Accuracy .................. 39
3.8 Subsetting of Remote Sensing Data
3.9 Determining the Natural Boundary of the City
3.10 Subdivision of Natural City Extent
3.11 Calculating the Built-up Area
3.12 Generation of KMC Boundary
3.13 Analysis Based on Administrative Boundary
  3.13.1 Built-up Area and Urban Growth
  3.13.2 Proportion of Population and Proportion of Built-up Area
  3.13.3 Growth Rates of Population and Built-up Area
  3.13.4 Households and Built-up Area
3.14 Analysis Based on Natural Boundary
  3.14.1 Area Index and Shape Index
  3.14.2 City Extent and Built-up Area
  3.14.3 Shannon’s Entropy and Built-up
  3.14.4 Degree of Freedom in Urban Growth
  3.14.5 Degree of Goodness in Urban Growth

References

4 Results and Discussion
4.1 Classified Imagery and Change Map
4.2 Results From Analysis: Based on Administrative Boundary
  4.2.1 Built-up Area and Urban Growth
  4.2.2 Proportion of Population and Proportion of Built-up Area
  4.2.3 Growth Rates of Population and Built-up Area
  4.2.4 Households and Built-up Area
4.3 Results From Analysis: Based on Natural Boundary
  4.3.1 Area Index and Shape Index
  4.3.2 City Extent and Built-up Area
  4.3.3 Shannon’s Entropy and Built-up
  4.3.4 Degree of Freedom in Urban Growth
  4.3.5 Degree of Goodness in Urban Growth
4.4 Comparison of Sprawl Analysis
4.5 Degree of Freedom and Goodness
4.6 Boundary of the City
4.7 Application of the Results
4.8 Limitations of the Research

References

5 Conclusions
5.1 Conclusions
5.2 Scope of Future Research

Urban Growth Analysis and Remote Sensing
A Case Study of Kolkata, India 1980–2010
Bhatta, B.
2012, XIII, 103 p. 23 illus., 13 illus. in color., Softcover
ISBN: 978-94-007-4697-8
