

Contents

| | | |
|---------------|---|----|
| 1 | Introduction | 1 |
| | G.P.J. Dijkema, Z. Lukszo, and M.P.C. Weijnen | |
| | 1.1 Why This Book? | 1 |
| | 1.2 Infrastructures as Complex Adaptive Socio-technical Systems . . . | 2 |
| | 1.3 Better Decision-Making Needed | 4 |
| | 1.4 Agent-Based Modelling for Decision Support | 5 |
| | 1.5 A Book in Two Parts | 7 |
| | References | 7 |
| | | |
| Part I | Theory and Practice | |
| 2 | Theory | 11 |
| | I. Nikolic and J. Kasmire | |
| | 2.1 Introduction | 11 |
| | 2.1.1 Focus | 12 |
| | 2.1.2 Structure of the Chapter | 12 |
| | 2.1.3 Example: Westland Greenhouse Cluster | 13 |
| | 2.2 Systems | 14 |
| | 2.2.1 History of Systems Thinking | 14 |
| | 2.2.2 Systems | 16 |
| | 2.2.3 World Views | 19 |
| | 2.2.4 Observer-Dependence | 21 |
| | 2.2.5 System Boundaries | 24 |
| | 2.2.6 System Nestedness | 25 |
| | 2.3 Adaptive | 26 |
| | 2.3.1 Adaptation Versus Evolution | 27 |
| | 2.3.2 Evolution—More than just Biology | 28 |
| | 2.3.3 Adaptation in Its Many Forms | 30 |
| | 2.3.4 Direction of Adaptation | 31 |
| | 2.3.5 Coupled Fitness Landscape | 32 |
| | 2.3.6 Intractability | 34 |

- 2.4 Complexity 36
 - 2.4.1 Simple 36
 - 2.4.2 Complicated 39
 - 2.4.3 Complex 41
- 2.5 Complex Adaptive Systems 44
 - 2.5.1 Chaos and Randomness 45
 - 2.5.2 Emergence, Self-organisation and Patterns 48
- 2.6 Modelling Complex Adaptive Systems 51
 - 2.6.1 What Does a Model of a Complex Adaptive System
Need? 51
 - 2.6.2 Agent-Based Modelling 54
 - 2.6.3 What It Is and Is not 55
- 2.7 Anatomy of an Agent-Based Model 57
 - 2.7.1 Agent 57
 - 2.7.2 Environment 61
 - 2.7.3 Time 65
- References 68
- 3 Practice 73**
 - I. Nikolic, K.H. van Dam, and J. Kasmire
 - 3.1 Introduction 73
 - 3.2 Step 1: Problem Formulation and Actor Identification 74
 - 3.2.1 Step 1 Example 75
 - 3.3 Step 2: System Identification and Decomposition 77
 - 3.3.1 Inventory 77
 - 3.3.2 Structuring 78
 - 3.3.3 Step 2 Example 81
 - 3.4 Step 3: Concept Formalisation 82
 - 3.4.1 Software Data Structures 83
 - 3.4.2 Ontology 84
 - 3.4.3 Step 3 Example 85
 - 3.5 Step 4: Model Formalisation 88
 - 3.5.1 Developing a Model Narrative 88
 - 3.5.2 Pseudo-code 89
 - 3.5.3 Step 4 Example 92
 - 3.6 Step 5: Software Implementation 93
 - 3.6.1 Modelling Environment 94
 - 3.6.2 Programming Practices 95
 - 3.6.3 Step 5 Example 98
 - 3.7 Step 6: Model Verification 98
 - 3.7.1 Recording and Tracking Agent Behaviour 100
 - 3.7.2 Single-Agent Testing 101
 - 3.7.3 Interaction Testing in a Minimal Model 102
 - 3.7.4 Multi-agent Testing 103
 - 3.7.5 Step 6 Example 104

- 3.8 Step 7: Experimentation 105
 - 3.8.1 Experiment Design Aspects 105
 - 3.8.2 Experiment Setup 108
 - 3.8.3 Experiment Execution 112
 - 3.8.4 Step 7 Example 114
- 3.9 Step 8: Data Analysis 116
 - 3.9.1 Data Exploration 116
 - 3.9.2 Pattern Visualisation and Identification 120
 - 3.9.3 Pattern Interpretation and Explanation 123
 - 3.9.4 Experiment Iteration 123
 - 3.9.5 Step 8 Example 124
- 3.10 Step 9: Model Validation 126
 - 3.10.1 Historic Replay 127
 - 3.10.2 Expert Validation 128
 - 3.10.3 Validation by Literature Comparison 129
 - 3.10.4 Validation by Model Replication 129
 - 3.10.5 Step 9 Example 130
- 3.11 Step 10: Model Use 130
 - 3.11.1 Outcome Presentation 131
 - 3.11.2 Raising New Questions 131
 - 3.11.3 Long Term Stakeholder Engagement 132
 - 3.11.4 Agent-Based Models and Stakeholders 132
 - 3.11.5 Computer Models and Mental Models 133
 - 3.11.6 Step 10 Example 134
- 3.12 Chapter Conclusions 135
- References 136

Part II Case Studies

- 4 Introduction to the Case Studies 141**
 - K.H. van Dam, I. Nikolic, and Z. Lukszo
 - 4.1 Case Studies 141
 - 4.1.1 Operational Models 142
 - 4.1.2 Tactical Models 142
 - 4.1.3 Strategic Models 142
 - 4.1.4 Setup of Case Study Chapters 143
 - 4.1.5 State-of-the-Art Modelling 144
 - 4.2 An Ontology for Socio-technical Systems 144
 - 4.2.1 Aims 144
 - 4.2.2 Development 145
 - 4.2.3 Key Concepts 146
 - 4.2.4 Usage 147
 - References 149

| | | |
|----------|--|-----|
| 5 | Agent-Based Models of Supply Chains | 151 |
| | B. Behdani, K.H. van Dam, and Z. Lukszo | |
| 5.1 | Introduction | 151 |
| 5.1.1 | Supply Chains | 152 |
| 5.1.2 | Abnormal Situation Management | 152 |
| 5.1.3 | Supply Chain Modelling | 153 |
| 5.1.4 | Chapter Organisation | 154 |
| 5.2 | Oil Refinery Supply Chain | 154 |
| 5.2.1 | Step 1: Problem Formulation and Actor Identification | 154 |
| 5.2.2 | Step 2: System Identification and Decomposition | 155 |
| 5.3 | Multi-plant Enterprise Supply Chain | 159 |
| 5.3.1 | Step 1: Problem Formulation and Actor Identification | 159 |
| 5.3.2 | Step 2: System Identification and Decomposition | 160 |
| 5.4 | Step 3: Concept Formalisation | 160 |
| 5.5 | Step 4: Model Formalisation | 164 |
| 5.5.1 | Procurement | 164 |
| 5.5.2 | Order Assignment | 165 |
| 5.6 | Step 5: Software Implementation | 167 |
| 5.7 | Step 6: Model Verification | 167 |
| 5.8 | Step 7: Experimentation | 169 |
| 5.8.1 | Experimental Setup for the Oil Refinery Supply Chain | 169 |
| 5.8.2 | Experimental Setup for the Multi-plant Enterprise | 172 |
| 5.9 | Step 8: Data Analysis | 173 |
| 5.9.1 | Delay in Shipment in the Oil Refinery Supply Chain | 173 |
| 5.9.2 | Normal and Abnormal Behaviour Analysis for the Multi-plant Enterprise | 174 |
| 5.10 | Step 9: Model Validation | 177 |
| 5.11 | Step 10: Model Use | 177 |
| 5.12 | Conclusions | 178 |
| | References | 179 |
| 6 | An Agent-Based Model of Consumer Lighting | 181 |
| | E.J.L. Chappin and M.R. Afman | |
| 6.1 | Introduction | 181 |
| 6.2 | Step 1: Problem Formulation and Actor Identification | 183 |
| 6.3 | Step 2: System Identification and Decomposition | 183 |
| 6.3.1 | Inventory | 183 |
| 6.3.2 | Structuring | 187 |
| 6.4 | Step 3: Concept Formalisation | 188 |
| 6.5 | Step 4: Model Formalisation | 190 |
| 6.5.1 | Social Structure | 190 |
| 6.5.2 | Model Narrative and Pseudo Code | 191 |
| 6.6 | Step 5: Software Implementation | 193 |
| 6.7 | Step 6: Model Verification | 194 |
| 6.8 | Step 7: Experimentation | 194 |

| | | |
|----------|---|------------|
| 6.9 | Step 8: Data Analysis | 195 |
| 6.10 | Step 9: Model Validation | 197 |
| 6.11 | Step 10: Model Use | 198 |
| 6.12 | Conclusions | 198 |
| | References | 199 |
| 7 | An Agent-Based Model of CO₂ Policies and Electricity Generation | 201 |
| | E.J.L. Chappin and G.P.J. Dijkema | |
| 7.1 | Introduction | 201 |
| 7.2 | Step 1: Problem Formulation and Actor Identification | 202 |
| 7.3 | Step 2: System Identification and Decomposition | 204 |
| 7.4 | Step 3: Concept Formalisation | 206 |
| 7.5 | Step 4: Model Formalisation | 206 |
| | 7.5.1 Model Narrative | 207 |
| | 7.5.2 Investment | 208 |
| | 7.5.3 Bidding on Markets | 208 |
| 7.6 | Step 5: Software Implementation | 210 |
| 7.7 | Step 6: Model Verification | 211 |
| | 7.7.1 Preliminary Simulations | 211 |
| | 7.7.2 Extreme-Condition Tests and Discussion | 212 |
| | 7.7.3 Agent Behaviour Tests | 212 |
| | 7.7.4 Repetitions | 213 |
| 7.8 | Step 7: Experimentation | 213 |
| 7.9 | Step 8: Data Analysis | 214 |
| 7.10 | Step 9: Model Validation | 215 |
| 7.11 | Step 10: Model Use | 215 |
| | 7.11.1 Emergent Insights from Iterations and Discussions | 216 |
| | 7.11.2 Serious Game | 216 |
| 7.12 | Conclusions | 217 |
| | References | 218 |
| 8 | An Agent-Based Model of a Mobile Phone Production, Consumption and Recycling Network | 221 |
| | L.A. Bollinger, C.B. Davis, and I. Nikolic | |
| 8.1 | Introduction | 221 |
| 8.2 | Step 1: Problem Formulation and Actor Identification | 223 |
| 8.3 | Step 2: System Identification and Decomposition | 223 |
| 8.4 | Step 3: Concept Formalisation | 226 |
| 8.5 | Step 4: Model Formalisation | 228 |
| | 8.5.1 Create Contracts | 228 |
| | 8.5.2 Purchase | 229 |
| | 8.5.3 Process | 229 |
| | 8.5.4 Invest | 231 |
| 8.6 | Step 5: Software Implementation | 231 |
| 8.7 | Step 6: Model Verification | 231 |
| 8.8 | Step 7: Experimentation | 233 |

- 8.9 Step 8: Data Analysis 235
 - 8.9.1 Default Case 235
 - 8.9.2 Sweep 1 236
 - 8.9.3 Sweep 2 237
 - 8.9.4 Sweep 3 239
- 8.10 Step 9: Model Validation 239
- 8.11 Step 10: Model Use 240
- 8.12 Conclusions 241
- References 242
- 9 Next Steps in Modelling Socio-technical Systems: Towards Collaborative Modelling 245**
 - A. Chmieliauskas, C.B. Davis, and L.A. Bollinger
 - 9.1 Complications of Modelling Socio-technical Systems 245
 - 9.1.1 Agent-Based Model as Software 246
 - 9.2 Applying Semantic Web Technologies and Methods for Modelling 247
 - 9.2.1 Semantic Web Technologies 247
 - 9.2.2 Using SPARQL to Extract Structured Data 249
 - 9.2.3 Using SPARQL Within Simulations 250
 - 9.2.4 Implementations by Other Researchers 253
 - 9.3 Case Study: Mobile Phone Recycling Networks 253
 - 9.4 Future Work: Enabling Collaboration Between Modellers 257
 - 9.4.1 Limitations of Using a Single Ontology for Modelling . . . 257
 - 9.4.2 Enabling Multiple System Views 258
 - 9.4.3 Integrating Multiple Ontologies Together for Simulations . 259
 - 9.4.4 Simple Example of Integrating Multiple Ontologies 259
 - 9.5 Conclusion 262
