1 Iron, an Element Essential to Life ............................................. 1  
References ................................................................. 5

2 Iron in Plant–Pathogen Interactions ................................. 7  
2.1 Iron and Microbial Virulence ......................................... 8  
   2.1.1 *Agrobacterium tumefaciens* and Crown Gall Disease .... 8  
   2.1.2 *Pseudomonas syringae*, a Plant Pathogen Adapted  
       to Different Hosts ................................................. 12  
   2.1.3 Diseases Caused by *Xanthomonas Species* ............... 15  
   2.1.4 Diseases Caused by *Xylella fastidiosa* .................. 17  
   2.1.5 *Ralstonia solanacearum*, The Causal Agent  
       of Bacterial Wilt on a Large set of Plants ................. 18  
   2.1.6 Enterobacterial Species and Plant Disease ............... 19  
   2.1.7 Pathogenicity of Ascomycete Fungi ....................... 23  
   2.1.8 *Ustilago maydis*, a Basidiomycete Model ............... 25  
2.2 Iron and Plant Defense .................................................. 26  
   2.2.1 Iron Homeostasis in Wheat Upon Infection  
       by *Blumeria graminis* ......................................... 26  
   2.2.2 Involvement of Ferritin in the Response  
       of Potato to *Phytophthora infestans*. ..................... 27  
   2.2.3 Iron Homeostasis and Resistance of *Arabidopsis*  
       to *D. dadantii* .................................................. 28  
   2.2.4 Effect of the Plant Iron Status on  
       Susceptibility/Resistance to Pathogens .................... 30  
2.3 Conclusion ............................................................... 31  
References ................................................................. 34
3 Mechanisms and Regulation of Iron Homeostasis in the Rhizobia

3.1 The Problem of Iron Acquisition and Roles of Iron in Symbiosis

3.2 Iron Transport Systems

3.2.1 Siderophore-Mediated Iron Transport

3.2.2 Heme and Heme Proteins as Iron Sources

3.2.3 Ferric Dicitrate

3.2.4 Role of Iron Transport in Symbiosis

3.3 Regulation of Iron Homeostasis in the Rhizobia

3.3.1 The Fur/Mur Protein

3.3.2 The Irr Protein

3.3.3 The RirA Protein
