Contents of Volume I

Part I Formation, Structure and Characteristics of HS and NOM

Revisiting Structural Insights Provided by Analytical Pyrolysis About Humic Substances and Related Bio- and Geo-Polymers ........ 3
J.A. González-Pérez, F.J. González-Vila, G. Almendros, H. Knicker,
J.M. de la Rosa, and Z. Hernández

The Role of Mineral Complexation and Metal Redox Coupling in Carbon Cycling and Stabilization ......................... 7
Donald L. Sparks and Chunmei Chen

Elucidating the Biogeochemical Memory of the Oceans by Means of High-Resolution Organic Structural Spectroscopy ................ 13
N. Hertkorn, M. Harir, B.P. Koch, B. Michalke, and Ph. Schmitt-Kopplin

Correlating Bulk Optical Spectroscopy and Ultrahigh-Resolution Mass Spectrometry to Determine the Molecular Composition of Dissolved Organic Matter in Northern Peatlands ............. 19
William T. Cooper, Malak M. Tfaily, Jane E. Corbet, and Jeffrey P. Chanton

Effects of Synthetic Quinones as Electron Shuttles on Geothite Reduction and Current Generation by Klebsiella pneumoniae L17 .... 25
Xiaomin Li, Liang Liu, Tongxu Liu, Tian Yuan, Wei Zhang, Fangbai Li,
Shungui Zhou, and Yongtao Li

Dynamics of Newly Formed Humic Acid and Fulvic Acid in Aggregates After Addition of the $^{14}$C-Labelled Wheat Straw in a Typic Hapludoll of Northeast China ................................................................. 31
Sen Dou, Song Guan, Guang Chen, and Gang Wang

FTIR Analysis of Soil Organic Matter to Link the Turnover of Organic Inputs with Carbon Respiration Rates .................... 37
M.C. Hernandez-Soriano, B. Kerre, B. Horemans, and E. Smolders
Characterization of Soil Humic Substances Using Mid-infrared Photoacoustic Spectroscopy .................................................. 43
Changwen Du, Zhongqi He, and Jianmin Zhou

Splitting of Soil Humic Acid Fluorescence on Different Fluorophores ................................................................. 49
Oleg Trubetskoj, Lubov Shaloiko, Dmitrii Demin, Victor Marchenkov, and Olga Trubetskaya

Lumping or Splitting: Holistic or Fractionation Approaches to Studies of Humic Substances ........................................ 55
Michael H.B. Hayes and Roger S. Swift

The Fate of Mineral Particles in Bulk Peat and Corresponding Humic Acids Throughout an Ombrotrophic Bog Profile: Atmospheric Dust Depositions vs Mineralization Processes ......................... 61
C. Zaccone, S. Pabst, T.M. Miano, and W. Shotyk

HS-Protein Associates in the Aqueous/Oil System: Composition and Colloidal Properties .............................................. 67
M.G. Chernysheva and G.A. Badun

Integrated Physical-Chemical Procedure for Soil Organic Carbon Fractionation and Characterization During Transition to Organic Farming .............................................................. 73
H.M. Abdelrahman, D.C. Olk, C. Cocozza, D. Ventrella, F. Montemurro, and T. Miano

Sulfur-Containing Molecules Observed in Hydrophobic and Amphiphilic Fractions of Dissolved Organic Matter by Fourier Transform Ion Cyclotron Resonance Mass Spectrometry ............ 79
Guixue Song, Rajaa Mesfiou, Aaron Dotson, Paul Westerhoff, and Patrick Hatcher

Standard and Reference Samples of Humic Acids, Fulvic Acids, and Natural Organic Matter from the Suwannee River, Georgia: Thirty Years of Isolation and Characterization .................. 85
E. Michael Perdue

Molecular Understanding of a Humic Acid by “Humeomic” Fractionation and Benefits from Preliminary HPSEC Separation . . . . 89
Antonio Nebbioso and Alessandro Piccolo

Microbiological Oil Transformation to Humic-Like Substances . . . . 95
E.A. Vialih and S.A. Ilarionov

Genesis of Peat Humic Acid Structure and Properties Within Bog Profiles .......................................................... 101
Maris Klavins and Oskars Purmalis

Solubilisation of Multiwalled Carbon Nanotubes by Synthetic Humic Acids Studied by ATR-FTIR Spectroscopy .................. 793
Eleni Bletsa, Yiannis Deligiannakis, and Dimitris Gournis
Fluorescence and Raman Spectroscopy Study of Humic Acids in Iron Chloride Solutions and Magnetite/HA Nanoparticles .................................................. 799

Interactions Between Silver Nanoparticles and Dissolved Natural Organic Matter Under Estuarine Conditions .................................................. 805
M. Millour, E. Pelletier, and J.P. Gagné

Part VI HS/NOM, Biodiversity and Ecosystem Health

How Important Is Microbial Biodiversity in Controlling the Mineralisation of Soil Organic Matter? .................................................. 813
Phil Brookes and Sarah Kemmitt

The Influence of Humic Acids on the Activities of Lysozyme and Urease .................................................. 817
Yan Li, Wenfeng Tan, and Luuk K. Koopal

Sorption Between Humic Substances and Marine Microalgae in Estuaries: Effects of Microalgae Species, pH and Salinity .................................................. 823
M. Millour and J.P. Gagné

Feasibility of Chelating Agent Utilization for Suppressing Methane Production During Soil Organic Matter Decomposition .................................................. 829
Prabhat Pramanik and Pil Joo Kim

Microbial and Enzyme Properties in Response to Amelioration of an Acidic Ultisol by Industrial and Agricultural By-Products .................................................. 833
Jiuyu Li, Zhaodong Liu, Anzhen Zhao, and Renkou Xu

Change of Cation Exchange Capacity of Soils as Influenced by Plowing and Irrigation .................................................. 839
B.M. Klenov

Elemental Composition of Humic Acids in Frost Cracks of Soils of Cryolithic Belt .................................................. 843
G.D. Chimitdorzhieva, M.G. Merkusheva, A.N. Baldanova, O.V. Vishnyakova, and B.M. Klenov

Humus Composition of Saline Soils as Affected by Long-Term Irrigation .................................................. 847
M.G. Merkusheva, A.N. Baldanova, G.D. Chimitdorzhieva, and B.M. Klenov

Determination of Labile Fe(II) Species Complexed with Seawater Extractable Organic Matter in a Seawater Environment .................................................. 853
Hisanori Iwai, Masami Fukushima, and Mitsuo Yamamoto
Microbial Community Composition of Latosols Under a Rubber Plantation ................................................................. 859
Haichao Guo, Wenbin Wang, Xiaoping Wu, and Xuehua Luo

Quantitative Determination of 2-Mercaptoethane Sulfonate as a Biomarker for Methanogens in Soil Using HPLC .................. 863
Prabhat Pramanik and Pil Joo Kim

Kocuria Rosea HN01: A Newly Discovered Alkaliphilic Humic-Reducing Bacteria Isolated from Cassava Dregs Composting . . . 869
Nan Chen, Chunyuan Wu, Qinfen Li, and Xiao Deng

The Endodermis Is the Major Control Point for Radial Transport of Humic Substances into the Vascular System of Plants ........... 873

Impact of Methanogens Originated from Cattle Manure on Increasing CH₄ Emission in Paddy Soil During Rice Cultivation . . . 877
Sang Yoon Kim, Prabhat Pramanik, and Pil Joo Kim

Part VII HS/NOM in Water and Water Treatment

Water Repellency Induced by Organic Matter (OM) in Treated Wastewater (TWW) Infiltration Ponds and Irrigation .................. 883
Itamar Nadav, Jorge Tarchitzky, and Yona Chen

Production of Biologically Stable Safe Drinking Water from Polluted Surface Water Sources ............................................. 889
Olena Samsoni-Todorova, Natalia Klymenko, and Liudmyla Savchyna

The Effect of Increased Dissolved Natural Organic Matter on Eutrophication ................................................................. 895
Rolf D. Vogt, Alexander Engebretsen, and Christian Mohr

EEM Spectra and Removal Property of Fluorescent DOM in Biologically Treated Sewage Effluent ................................. 901
Wentao Lia and Aimin Li

pH Dependence of Configurations and Surface Properties of Microbial Extracellular Polymeric Substances (EPS) .................. 905
Lingling Wang, Longfei Wang, Xuemei Ren, Xiaodong Ye, Wenwei Li, Shijie Yuan, Min Sun, Guoping Sheng, Hanqing Yu, and Xiangke Wang

Ferrate(VI): Novel Compound for Removal of Natural Organic Matter in Water ............................................................. 911
Virender K. Sharma, Jiaqian Jiang, and Hyunook Kim

The Role of Natural Organic Matter in the Biodecontamination of Freshwaters from the Endocrine Disruptor Bisphenol A ............ 915
G. Castellana, E. Loffredo, A. Traversa, and N. Senesi
