

# Contents

<b>1 “Plant Cell Wall Structure-Pretreatment” the Critical Relationship in Biomass Conversion to Fermentable Sugars . . . . .</b>	<b>1</b>
Ahmed Faik	
<b>2 Thermo-Mechanical Pretreatment of Feedstocks . . . . .</b>	<b>31</b>
Chinnadurai Karunanithy and Kasiviswanathan Muthukumarappan	
<b>3 Solid-State Biological Pretreatment of Lignocellulosic Biomass . . . . .</b>	<b>67</b>
Caixia Wan and Yebo Li	
<b>4 Hydrothermal Pretreatment of Lignocellulosic Biomass . . . . .</b>	<b>87</b>
Iwona Cybulska, Grzegorz Brudecki and Hanwu Lei	
<b>5 Pretreatment of Lignocellulosic Biomass Using Supercritical Carbon Dioxide as a Green Solvent . . . . .</b>	<b>107</b>
Tingyue Gu	
<b>6 Pretreatment of Lignocellulosic Biomass Using Green Ionic Liquids . . . . .</b>	<b>127</b>
Jian Luo, Meiqiang Cai and Tingyue Gu
