Contents

Part I  Managing Genetic Resources

1  Building a Global Plant Genetic Resources System ....................... 3
   Emile Frison and Nicole Demers

2  Genomic Approaches and Intellectual Property Protection for Variety
   Release: A Perspective from the Private Sector ....................... 27
   J. Stephen C. Smith, Elizabeth S. Jones, Barry K. Nelson,
   Debora S. Phillips and Robin A. Wineland

3  The Use of Molecular Marker Data to Assist in the Determination
   of Essentially Derived Varieties ..................................... 49
   J. Stephen C. Smith, Elizabeth S. Jones and Barry K. Nelson

4  Application of Molecular Markers in Spatial Analysis to Optimize
   In Situ Conservation of Plant Genetic Resources .................... 67
   Maarten van Zonneveld, Ian Dawson, Evert Thomas, Xavier Scheldeman,
   Jacob van Etten, Judy Loo and José I Hormaza

5  Historical and Prospective Applications of ‘Quantitative Genomics’
   in Utilising Germplasm Resources .................................... 93
   Adrian Hathorn and Scott C. Chapman

Part II  Platforms and Approaches to Investigate Plant Genetic Resources

6  High-throughput SNP Profiling of Genetic Resources in Crop Plants
   Using Genotyping Arrays ............................................. 113
   Martin W. Ganal, Ralf Wieseke, Hartmut Luerssen, Gregor Durstewitz,
   Eva-Maria Graner, Joerg Plieske and Andreas Polley

7  Paleogenomics as a Guide for Traits Improvement ..................... 131
   Jérôme Salse
