Part II Building Technologies	
Inmaculada Oliver-Faubel	
Energy Efficiency and Daylight Transmission in the Current Envelope of the Arquitecure	91
P. Gómez and A. Rolando	
A Ceramic Double Skin in an Educational Center in Melilla	97
Á. Verdasco	
Ventilation and Sealing in the Current Envelopes in Architecture	103
E. Sánchez and A. Rolando	
Translucent Concrete. Research with Glass, Optical Fiber and Glass Fiber	111
E. Jiménez-Muñoz and F. Fernández-Martínez	
Technical Evolution of 3D Modular Construction from the Nineteenth Century to World War II	115
G. Ovando-Vacarezza, B. Lauret-Aguirregabiria, J. M. Lirola-Pérez and E. Castañeda-Vergara	
Architrave: Advanced Analysis of Building Structures Integrated in Computer-Aided Design	123
A. Pérez-García, F. Gómez-Martínez, A. Alonso, V. Hernández, J. M. Alonso, P. de la Fuente and P. Lozano	
Adapting Architectural Theories by specifying criteria for compliance with new requirements. The implementation of the Open Building in Residential Building	131
S. Hernando and A. Del-Águila	

Renovation Using Industrialized Systems In Collective Housing	139
M. García-Moratalla and A. Del-Águila	
Free-Form Architectural Façade Panels: An Overview of Available Mass-Production Methods for Free-Form External Envelopes	149
L. Alonso-Pastor, B. Lauret-Aguirregabiria, E. Castañeda-Vergara, D. Domínguez-García and G. Ovando-Vacarezza	
Estimation of the Probability of Biological Colonization on Etics	157
F. Re-Cecconi, G. Pergola and A. Redaelli	
SML Sistem: New Ways of Timber Construction	165
B. Serra, P. Verdejo and J. Serra	
Part III Energy and Sustainability	
Andrea Salandín	
The Use of Authentic Material and Construction Techniques in Historical Conservation: Orhaneli Stone School as a Case	173
M. B. Bagbanci	
Certification and Assessment Method for Sustainable Communities	183
P. Pereiro-Villanueva	
Energy Consumption and Thermal Behavior of a Light Construction Room-Sized Test Cell	193
