Contents

Introduction ........................................................................................................... 1
RILEM Recommended Test Method: AAR-0—Outline
Guide to the Use of RILEM Methods in the Assessment
of the Alkali-Reactivity Potential of Aggregates ............................................. 5
RILEM Recommended Test Method: AAR-1.1—Detection
of Potential Alkali-Reactivity—Part 1: Petrographic Examination
Method .............................................................................................................. 35
RILEM Recommended Test Method: AAR-2—Detection
of Potential Alkali-Reactivity—Accelerated Mortar-Bar
Test Method for Aggregates ............................................................................ 61
RILEM Recommended Test Method: AAR-3—Detection
of Potential Alkali-Reactivity—38 °C Test Method
for Aggregate Combinations Using Concrete Prisms ................................. 79
RILEM Recommended Test Method: AAR-4.1—Detection
of Potential Alkali-Reactivity—60 °C Test Method
for Aggregate Combinations Using Concrete Prisms ................................. 99
RILEM Recommended Test Method: AAR-5—Detection
of Potential Alkali-Reactivity—Rapid Preliminary
Screening Test for Carbonate Aggregates ..................................................... 117
RILEM Recommended Specification: AAR-7.1—International
Specification to Minimise Damage from Alkali Reactions in
Concrete—Part 1: Alkali-Silica Reaction .......................................................... 131

RILEM Recommended Specification: AAR-7.3 Preliminary International Specification to Minimise Damage from Alkali-Aggregate Reactions in Concrete—Part 3: Concrete Dams and Other Hydro Structures ................... 155
RILEM Recommendations for the Prevention of Damage by Alkali-Aggregate Reactions in New Concrete Structures
State-of-the-Art Report of the RILEM Technical Committee 219-ACS
Nixon, P.J.; Sims, I. (Eds.)
2016, XVI, 168 p., Hardcover
