## Contents

1 **Introduction: Developing a Conceptual Framework for Access to Education for Socio-economically Marginalised Groups: A Systems Focus** ............................................................... 1  
1.1 Scope of the Book .............................................................................. 4  
References ................................................................................................... 11  

2 **System Blockages for Access to Education in Europe: Paper Commitments and Substantive Gaps** ........................................... 15  
2.1 The European Union’s Strategic Priority on Paper of Access and Lifelong Learning as a Means of Fostering Social Inclusion: Falling Between Two Stools in the ET2020 Targets? ......................................................... 15  
2.2 Access to Education for Marginalised Groups: A Neglected Focus in University Rankings ........................................... 22  
References ................................................................................................... 27  

3 **Conceptual Framework and Agenda: Beyond Bronfenbrenner (1979, 1995) to Interrogation of Blocked Systems via Structural Indicators** ................................................................. 29  
3.1 Introduction ........................................................................................ 29  
3.2.1 A Systems Focus as a Multilevelled Approach ............................... 31  
3.2.2 System Transitions in Education ................................................... 32  
3.2.3 Systems: Beyond a Unidimensional Focus ..................................... 34  
3.2.4 Systems as Key Silent Conditions for Complex Causal Influences .................................................................................. 36  
3.2.5 Systems as Growth Rather than Deficits ...................................... 37
3.3 The Need for Focus on System Blockage and Displacement in Moving from Inert to Inclusive Systems: Key Limitations to Bronfenbrenner’s (1979, 1995) Understanding of Systems ........................................ 38
3.3.1 A Stronger Focus on Time ................................................................. 38
3.3.2 System Change in Time as Overcoming System Blockage or Displacement ................................................................. 39
3.3.3 The Need for Change Towards Inclusive Systems that Facilitate Individual Agency .................................................. 40
References .............................................................................................................. 44

4 Structural Indicators for System Level Change for Access to Education for Marginalised Groups ................................................. 49
4.1 An Agenda of Structural Indicators for System Level Change for Access to Education for Marginalised Groups at International, European Commission, National and Institutional Levels ........................................................................ 49
4.2 Key Interpretative Principles Underpinning a Systemic Review of Structural Indicators for Access to Education Derived by Analogy from International Rights Discourse ........................................... 54
4.3 Structural Indicators: A Key Strategic Gap in the OECD (Organisation for Economic Cooperation and Development) International Education Indicators ............................................................................. 58
4.3.1 A Critique of Indicators as a Neo-liberal Agenda: The Need for a Democratic Agenda of Accountability That Is Not Reduced to Neo-liberalism ............................................. 62
References .............................................................................................................. 65

5 Access to Higher Education for Socio-economically Marginalised Groups: Indicators at Macro-Exo Levels .................................. 69
5.1 A Central Driving Committee at State Level for Access to Higher Education and Lifelong Learning for Marginalised Groups (Structural Indicator), Including Clear Funding Sources ............................................................................. 69
5.2 Clarification of the Criteria to Ascertained Socio-economic Exclusion (Structural Indicator) Given the Observed Tendency, Especially in Central and Eastern European Countries, for Targeting to Occur for More Easily Identifiable Target Groups Like Those with a Disability or from an Ethnic Minority, In Contrast with Groups Experiencing Socio-economic Exclusion ................................................................ 74
References .............................................................................................................. 82

6 Access to Higher Education for Socio-economically Marginalised Groups: Indicators at Macro-Exo Levels .................................. 85
6.1 The Need for a Formal Obligation on Institutions from the State to Improve Access and for Incentives for Third-Level Institutions Such as Differentiated Funding from the State Based on Implementation of Access Goals (Structural Indicator) .......... 85

10 Prison Education: Indicators at Macro-Exo Levels ...................... 191
   10.1 Introduction: Prison Education as a Domain of Lifelong Learning .......................................................... 191
   10.2 A National Strategy of Education for Prisoners (Structural Indicator) ......................................................... 192
   10.3 Opportunities for Distance Education and Web-Based Learning in Prison (Structural Indicator) ......................... 197
   10.4 An Education Strategy for High-Security Prisons (Structural Indicator) ......................................................... 199
   10.5 Overcoming Ambivalence from Prison Officers in Some Countries to Prisoner Learning ........................................... 200
References .................................................................................................. 203

11 Prison Education: Indicators at Micro-Meso Levels .................... 205
   11.1 Establishment and Implementation of a Principle of Normality in Prisons (Structural Indicator)................................. 205
   11.2 Individual Education Plans for Prisoners (Structural Indicator) .... 207
11.3 Initial Assessment Approaches for Prisoners
(Structural Indicator) ................................................................. 209
11.4 Sufficient Space in Prison for Education
(Structural Indicator) ................................................................. 212
11.5 Professional Development Support and Resource Materials
for Teachers in Prisons (Structural Indicator) ......................... 216
11.6 Prisoner Exchange Based on Educational Reasons,
Including Bridges to External Education Institutions
(Structural Indicator) ................................................................. 217
11.7 Overcoming Practical Problems to Allow the Prisoner
   to Study in Prison and at Third Level ................................. 218
11.8 Peer Effects on Motivation to Learn in Prison ................... 222
References .................................................................................... 225

12 Conclusion .................................................................................. 227
12.1 Developing a European Union Agenda of Structural Indicators
   for Access to Higher Education and Lifelong Learning
   for Socio-economically Excluded Groups ............................ 227
12.2 Developing a Conceptual Framework to Move from Blocked
   Systems of Exclusion Towards Systems of Inclusion
   for Access to Higher Education and Lifelong Learning:
   From Diametric to Concentric Systems of Relation ............... 235
   12.2.1 Amplifying a Structuralist Framework for Moving from
       Diametric Oppositional to Concentric Relational Spaces:
       From Assumed Separation to Assumed Connection in the
       Communicative Culture ......................................................... 237
   12.2.2 Systemic Assumed Separation Between Strategies,
       Structures and People: Barriers to Developing
       Concentric Systems of Inclusion ........................................ 239
   12.2.3 Systemic Assumed Connection: A Transitions
       Focus on Developing Concentric Systems
       of Inclusion ........................................................................ 240
   12.2.4 Systemic Assumed Separation Where Parts
       of an Institution Operate in Parallel Due to Historically
       Different Goals of These Parts: Barriers to Developing
       Concentric Systems of Inclusion ........................................ 242
   12.2.5 Mirror Image Inversion as a Diametric Systemic
       Structural Relation: Beyond Diametric Mirror
       Image Inversions in the Relational Space
       of the Powerful (Teacher) Versus Powerless (Student),
       Active (Teacher) Versus Passive (Student) ....................... 244
References .................................................................................... 248
Appendices

Appendix A: Glossary of Key Terms
Appendix B: Illustrative Examples of a Structural Indicators Matrix Tool for Access to Education for Socio-economically Marginalised Groups: Higher Education, Non-formal Education and Prison Education

Introducing Structural Indicators
Access to Higher Education for Socio-economically Marginalised Groups: Illustrative Structural Indicators at National Levels
Access to Higher Education for Socio-economically Marginalised Groups: Illustrative Structural Indicators at Third-Level Education/University Institution Level
Access to Non-formal Education for Socio-economically Marginalised Groups: Illustrative Structural Indicators
Prison Education: Illustrative Structural Indicators
