**10 New Conceptions and Research Approaches to Creativity: Implications of a Systems Perspective for Creativity in Education . . . . . 161**

Introduction. . . . . 161

A Definition of Creativity. . . . . 162

The Systems Model of Creativity. . . . . 163

    Why is a Systems Approach Necessary?. . . . . 163

    An Outline of the Systems Model . . . . . 165

    The Place of Schools in the Systems Model . . . . . 168

The Individual’s Contribution to Creativity. . . . . 169

    Personal Qualities . . . . . 169

Measurements Techniques. . . . . 171

Flow. . . . . 173

Educational Implications at the Individual Level . . . . . 174

    Students’ Curiosity and Interest are the Main Sources of Potential Creativity. . . . . 174

    Potential Creativity is Enhanced by Intrinsic Motivation, and Suppressed by Excessive Reliance on Extrinsic Rewards . . . . 174

    Activities Need to be Designed with the Conditions Necessary for Flow in Mind. . . . . 175

    Learning to Formulate Problems Should be Part of the Curriculum. . . . . 175

    Respecting Creative Personality Traits . . . . . 175

    Promoting the Internalization of Learning. . . . . 175

The Contribution of the Domain . . . . . 176

Educational Implications at the Level of the Domain. . . . . 176

    How Attractive is the Information Presented to Students?. . . . . 176

    How Accessible is the Information?. . . . . 177

    How Integrated is the Information? . . . . . 177

    Are There Opportunities for Mentorships and Apprenticeships? . . . . . 177

The Contribution of the Field . . . . . 178

Educational Implications at the Level of the Field. . . . . 179

    The Role of Funding . . . . . 179

    How Open are Teachers to New Ideas? . . . . . 180

    Do Teachers Stimulate Students’ Curiosity and Interest? . . . . . 180

    Can Teachers Distinguish Good New Ideas from Bad Ones?. . . . . 180

    Are There Ways of Implementing Student Creativity in the School?. . . . . 180

Conclusion . . . . . 181
