Contents

Part I Theoretical Contributions

1 Does Being Human Matter? ........................................... 3

2 The Development of the Person: An Experiential
Perspective on the Ontogenesis of Psychological Complexity .... 7
What is a Person? ...................................................... 7
Person and Personality ............................................. 9
The Construction of Personhood Over the Life Span ............ 10
Ideal Outcomes of Adult Development .......................... 13
Complexity and Development ..................................... 19
Piagetian Theory and Complex Relationships .................. 20
Optimal Experience and Development: Some Previous
Perspectives .......................................................... 22
Flow Theory and Complex Relationships ........................ 24
Flow and Development .............................................. 27
Complex Relationships and the Complex Person ............... 29
Examples of Complexity in Later Life ............................ 33
Seven Dimensions of Complexity .................................. 35
Dialectical Thinking and Optimal Experience ................... 42
Complexity and Wisdom .......................................... 45
Complexity, Ego Control, and Ego Resiliency ................... 48
The Foundations of Complexity in Child Development ....... 51
The Importance of Social Context ................................. 52
An Extension of Baldwin’s Views on Development
in Context ............................................................ 52
Parent-Child Interaction and the Growth of Complexity ....... 55
Further Thoughts on Child-Centered and Adult-Centered
Parenting ............................................................. 63
Neoteny and Complexity: The Evolutionary Logic
of Unending Childhood ............................................ 65
The Syntelic Character of Play ..................................... 67
Conclusions: The Role of Experience in Development ....... 69
References ............................................................ 71
3 Life Themes: A Theoretical and Empirical Exploration of Their Origins and Effects

Conceptual Definition ........................................ 81
Recognition of an Existential Stress ......................... 83
Finding the Problem ............................................. 84
Stating the Problem ............................................. 84
Method of Solution ............................................. 84
An Empirical Approach ......................................... 85

Results ............................................................. 86
John ................................................................. 87
Harry ............................................................... 88
Significant Problems of Childhood ............................. 89
George ............................................................ 90
Sam ................................................................. 90
Max ................................................................. 91
Patterns ............................................................ 91
Conclusion ........................................................ 93

Discussion ......................................................... 94
Further Concerns ................................................ 95
References ......................................................... 96

4 The Role of Emotions in the Development of Wisdom

Wisdom and Knowledge: An Evolutionary Perspective ....... 100

The Phenomenology of Wisdom ................................. 104
The Development of Wisdom .................................... 107
The Measurement of Wisdom .................................... 112
Conclusions ....................................................... 114
References ......................................................... 115

5 Reflections and Reviews

How Consumer Behavior Meets Existential Needs ............... 119
The “Lower” Needs: Survival and Safety ....................... 119
Love and Belonging .............................................. 120
The Higher Needs: Esteem and Self-actualization ................ 121

How Consumer Behavior Meets Experiential Needs ............. 122
Consuming in the Third Millennium .............................. 124
References ......................................................... 126

6 Flow and Education

Part One .......................................................... 129

Motivation and Learning ......................................... 130
The Flow Experience ............................................. 132
Matching Challenges and Skills ................................ 138
## Part 2

- Characteristics That Facilitate Flow .......................................................... 141
- Questions and Answers .................................................................................. 147

### 7 Learning, “Flow,” and Happiness .......................................................... 153
- Happiness as Personal Development ............................................................... 154
- A Systemic Model of the Person ..................................................................... 156
- The Conditions of Psychic Negentropy ........................................................... 158
- The Dynamics of Personal Growth ................................................................. 161
- Some Principles for Development of the Learning Stance .............................. 164
- Suggestions for Research .............................................................................. 171

### 8 Intrinsic Motivation and Effective Teaching ........................................ 173
- The Loss of Intrinsic Motivation ..................................................................... 174
- Intrinsic Motivation and the Process of Higher Education ............................ 176
- Intrinsic Motivation and Students .................................................................. 177
- Enjoyment in the History of Pedagogy ............................................................ 180
- A Model of Intrinsically Rewarding Learning ................................................ 181
- Establishing Flow in Teaching ........................................................................ 184
  - Subject Matter .............................................................................................. 184
  - Classroom Structure .................................................................................... 185
- References ...................................................................................................... 186

### 9 The Social Context of Middle School: Teachers, Friends, and Activities in Montessori and Traditional School Environments ................................................. 189
- Importance of Social Context in Middle School ............................................ 190
- Montessori Ideas, Motivation Theory, and the Social Context at School .... 192
- Method ........................................................................................................... 194
  - Selection of Schools and Students ............................................................... 194
  - Data Collection ............................................................................................ 196
  - Measures ...................................................................................................... 197
  - Analysis Plan ............................................................................................... 200
- Results ............................................................................................................ 200
  - Students’ Perceptions of Their Schools and Teachers ............................... 200
  - Time Use at School and Classroom Activities .......................................... 201
  - Time with Friends, Classmates, Teachers, and Alone ............................. 202
- Discussion ...................................................................................................... 205
  - Improving the Social Context of Middle School ....................................... 206
  - Limitations and Implications of the Study .................................................. 208
  - Note .............................................................................................................. 210
- References ...................................................................................................... 210
10 Do Students Care About Learning? ............................. 215

11 Flow: The Joy of Reading ........................................... 227
Slide 1-Flow in Composing Music, by Czikszentmihalyi, 1975 .... 230
Slide 2-Flow in Poetry, by S. Perry, 1996. ......................... 231
Slide 3-Flow in Poetry, by S. Perry, 1996. ....................... 232
Slide 4-Flow in Playing the Piano, by Delle Fave, 1993 ...... 232
Slide 5-Flow in Poetry, by S. Perry, 1996. ....................... 233
Slide 6-Flow in Figure Skating, by Susan Jackson, 1996 ....... 233
Slide 7-How Does it Feel to be in Flow? ......................... 233
Slides 8 and 9-How Does it Feel to be in Flow? ............... 234

Part II Empirical Studies

12 The Ecology of Adolescent Activity and Experience .......... 241
Introduction .......................................................... 242
Method ............................................................... 243
Procedure ............................................................ 243
Sample ............................................................... 243
The Self-Report Form. ................................................ 244
Analysis and Interpretation of the Data. ......................... 245
Results ............................................................... 245
The Structure of Adolescent Activity Patterns .................... 245
Experiences Associated with Adolescent Activities:
Rationale, Quality of Interaction, and Moods. .................... 247
Rationale for Activities ........................................... 248
Quality of Interaction ............................................. 248
Moods and Physical States ....................................... 250
Discussion .......................................................... 252
References ........................................................... 254

13 Experiential Correlates of Time Alone in Adolescence ...... 255
Introduction .......................................................... 255
Method ............................................................... 256
Procedure ............................................................ 256
Sample ............................................................... 257
The Self-Report Form. ................................................ 257
Results ............................................................... 259
The Context of Time Alone in Adolescence ...................... 259
The Experience of Time Alone in Adolescence .................. 259
Individual Differences: Correlates of Time Spent Alone .... 264
Discussion .......................................................... 266
Summary ............................................................ 268
References ........................................................... 268
14 Intrinsic Rewards in School Crime
   - Enjoyment and the Survival of School Systems
   - Crime and Enjoyment
   - A Theory of Enjoyment
   - Flow and School Crime
   - Implications for the Reduction of School Crime

15 Mood Variability and the Psycho-social Adjustment of Adolescents
   - Introduction
   - Adolescent Variability and the Disequilibrium Model
   - Method
   - Illustration of One Person’s Mood Fluctuations
   - Are Adolescents More Variable?
     - Degree of Mood Variation
     - The Changeability of Moods
     - The Unpredictability of Moods
   - Is Mood Variability Associated with Stress, Lack of Control, and Psychosocial Maladaptation?
     - Statistical Indices of Mood Variability
     - The Relation of Mood Variability to Stress and Lack of Control
     - The Relation of Mood Variability to Psychological and Social Adjustment
   - Mood Variability and Life Style
   - Discussion
   - References

16 Affiliation Motivation and Daily Experience: Some Issues on Gender Differences
   - Method
   - Subjects
   - Data
   - Procedure
   - Results
     - Affiliation Scores
     - Expressed Wishes
     - Companions
     - Activities
     - Thoughts
     - Quality of Experience
17 **Relations Between Identity in Young Adulthood and Intimacy at Midlife** .......................................................... 327
   Method ......................................................... 329
   Sample ......................................................... 329
   Measures ....................................................... 329
   Results ........................................................... 330
   Identity and Marital Status ...................................... 332
   Identity and Well-Being ........................................ 334
   Discussion ....................................................... 335
   Identity and Intimacy ........................................... 335
   Identity and Well-Being ........................................ 336
   Generalizability of the Findings .............................. 337
   Conclusion ...................................................... 337
   References ...................................................... 338

18 **The Quality of Experience of Asian American Adolescents in Activities Related to Future Goals** ............ 339
   Introduction ..................................................... 340
   Methods .......................................................... 343
   Sample .......................................................... 343
   Procedure ........................................................ 345
   Measures ........................................................ 346
   Results ............................................................ 348
   The Quality of Experience ....................................... 348
   Parental Practices Concerning Children’s Academic Activities .......................................................... 351
   Discussion ....................................................... 354
   References ...................................................... 357

19 **Adolescent Happiness and Family Interaction** .......................................................... 359
   Complex Families and the Quality of Experience at Home .......................................................... 360
   Method .......................................................... 362
   Subjects .......................................................... 362
   Procedure ........................................................ 363
   Measures ........................................................ 363
   Results ............................................................ 365
   Happiness at Home .............................................. 365
   Family Complexity and Parental Practices .................. 366
   Happiness and Family Context .................................. 368
   Discussion ....................................................... 370
