

# Contents

<b>1</b>	<b>Resource Allocation and Trade-Offs in Carbon Gain of Leaves Under Changing Environment . . . . .</b>	<b>1</b>
	Kouki Hikosaka, Yuko Yasumura, Onno Muller, and Riichi Oguchi	
<b>2</b>	<b>Ecophysiological Aspects of Phloem Transport in Trees . . . . .</b>	<b>25</b>
	Teemu Hölttä, Maurizio Mencuccini, and Eero Nikinmaa	
<b>3</b>	<b>Mycorrhizae and Global Change . . . . .</b>	<b>37</b>
	Michael F. Allen, Kuni Kitajima, and Rebecca R. Hernandez	
<b>4</b>	<b>Dynamic Stomatal Changes . . . . .</b>	<b>61</b>
	Hartmut Kaiser and Elena Paoletti	
<b>5</b>	<b>The Regulation of Osmotic Potential in Trees . . . . .</b>	<b>83</b>
	Andrew Merchant	
<b>6</b>	<b>Ecophysiology of Long-Distance Water Transport in Trees . . . . .</b>	<b>99</b>
	Hanno Richter and Silvia Kikuta	
<b>7</b>	<b>Forest Trees Under Air Pollution as a Factor of Climate Change . . . . .</b>	<b>117</b>
	Rainer Matyssek, Alessandra R. Kozovits, Jörg-Peter Schnitzler, Hans Pretzsch, Jochen Dieler, and Gerhard Wieser	
<b>8</b>	<b>Influence of Atmospheric and Climate Change on Tree Defence Chemicals . . . . .</b>	<b>165</b>
	Jason Q.D. Goodger and Ian E. Woodrow	
<b>9</b>	<b>Control over Growth in Cold Climates . . . . .</b>	<b>191</b>
	Sergio Rossi, Annie Deslauriers, Carlo Lupi, and Hubert Morin	
<b>10</b>	<b>Treelines in a Changing Global Environment . . . . .</b>	<b>221</b>
	Gerhard Wieser, Friedrich-Karl Holtmeier, and William K. Smith	

**11 The Future of Trees in a Changing Climate: Synopsis . . . . . 265**  
Nancy Grulke and Michael Tausz

**Index . . . . . 281**

Trees in a Changing Environment

Ecophysiology, Adaptation, and Future Survival

Tausz, M.; Grulke, N. (Eds.)

2014, XII, 287 p. 54 illus., 13 illus. in color., Hardcover

ISBN: 978-94-017-9099-4
