# Contents

Part I Pharmacology

1 Overview of Modern Research on Danshen  
Guanhua Du and Juntian Zhang  
1.1 General Situation of Application and Research  
   of Danshen  
1.2 The Research on the Chemical Components  
   of Danshen  
   1.2.1 Overview  
   1.2.2 Research on Liposoluble Components  
      of Danshen  
   1.2.3 Research on the Hydrosoluble Chemical  
      Components of Danshen  
   1.2.4 Research Methods for the Chemical  
      Components  
1.3 Research on the Active Components of Danshen  
   and Their Pharmacological Actions  
   1.3.1 Pharmacological Actions  
      of the Liposoluble Components of Danshen  
   1.3.2 Pharmacological Actions of the Hydrosoluble  
      Components of Danshen  
1.4 Development of the Preparations of Danshen  
   1.4.1 Danshen Preparations Used for Research  
      Purposes  
   1.4.2 Clinically Used Danshen Preparations  
1.5 Research on the Pharmacological Actions  
   of Danshen  
   1.5.1 Circulatory System  
   1.5.2 Liver Diseases  
   1.5.3 Kidney Diseases  
   1.5.4 Respiratory Diseases  
   1.5.5 Cancers  
   1.5.6 Effects on Immunologic Functions  
   1.5.7 Others  
1.6 Clinical Applications of Danshen  
   1.6.1 Treatment of Cardiovascular  
      and cerebrovascular Diseases  
   1.6.2 Treatment of Hepatic and Renal Diseases  

xiii
2 The Pharmacological Actions of Danshen ThemeD Formulas ..................................... 19
Zhihao Jiang, Yi Wang, Xiumei Gao, Hongcai Shang and Xiaoying Wang
2.1 Composite Danshen Dropping Pill ................. 19
   2.1.1 Compatibility Studies on Compound Danshen Dropping Pill (CDDP) .................. 19
   2.1.2 Pharmacological Research ......................... 22
2.2 The Pharmacological Functions of Other Danshen-Containing Prescriptions ............... 25
   2.2.1 Composite Danshen Injection ................. 25
   2.2.2 Dan-Qi Hemiplegia Capsules ................. 29
   2.2.3 Compound Radix Codonopsis Tablet ......... 30
   2.2.4 Xinijing Capsules ......................... 32
   2.2.5 Fufang Xueshuantong Capsule (Copound Xue-Shuantong Capsule). ........ 33
   2.2.6 Guanxinning Injection ......................... 35
   2.2.7 Bushenyishou Capsule ......................... 36
   2.2.8 Huganning Tablet ......................... 39
   2.2.9 Xinmaitong Tablet ......................... 39
   2.2.10 Ningxinanshen Capsule ......................... 41
   2.2.11 Ningshenbuxin Tablet ......................... 41
   2.2.12 Yangxinshi Tablet ......................... 42
   2.2.13 Rukuaxinxin Tablet ......................... 44
References ..................................................... 46

3 Active Constituents in Danshen and Their Pharmacological Actions ..................................... 49
Ailin Liu, Yitao Wang, Guanhua Du, Xiuying Yang, Juntian Zhang, Minke Tang, Ji Chen, Yonghong Chen, Zhiwei Qu, Jie Wang, Xiaoying Wang, Yan Sun, Ping Chen and Chuan Li
3.1 Major Constituents and Their Pharmacological Actions ............................................. 49
   3.1.1 Liposoluble Constituents ......................... 49
   3.1.2 Water-Soluble Constituents ......................... 52
   3.1.3 Other Constituents ................................. 54
3.2 Pharmacological Actions of Tanshinones .......................................................... 55
   3.2.1 Overview of Studies on Tanshinones ........ 55
   3.2.2 Antibacterial Activity of Tanshinones .... 57
   3.2.3 Anti-inflammatory Activity of Tanshinones ... 59
3.2.4 Estrogen-like Activity of Tanshinones ........ 59
3.2.5 Effect of Tanshinones on Diseases of Cardiovascular System. .......... 59
3.3 Effects of Salvianolic Acid on Myocardial Ischemia-Reperfusion Injury and Cardiac Muscle Cell ............................. 60
3.3.1 Protective Effect of Salvianolic Acid A in Rat Myocardial I/R Injury .................. 60
3.3.2 Effect of Salvianolic Acid A on In Vitro Cultured Myocardial Cells of Rats .......... 61
3.4 Studies on Treating Nervous Degenerative Diseases with Salvianolic Acid B. ................. 63
3.4.1 Effect of Salvianolic Acid B on Mitochondrial Injury and Nerve Cell Apoptosis Caused by Cerebral Ischemic Reperfusion .................. 64
3.4.2 Inhibitory Effect of Salvianolic Acid B on Aβ1–40 Fibrogenesis and Its Protective Effect on Mitochondrial Damage and Cell Apoptosis of PC12 Cells Caused by Aβ1–40 Self-aggregation ................. 65
3.4.3 Effect of Salvianolic Acid B on Neurogenesis in Rat Middle Cerebral Artery with Ischemic Reperfusion .................. 66
3.4.4 Prospects of the Study on Salvianolic Acid B .................................. 70
3.5 Examples of the Effect of Salvianolic Acid on Focal Cerebral Ischemia ............................. 72
3.5.1 Objective .............................................. 72
3.5.2 Experimental Materials .................................. 72
3.5.3 Experimental Method .................................. 72
3.5.4 Results .............................................. 74
3.5.5 Conclusion ........................................... 75

References .............................................. 75

4 Effects of Danshen on the Cardiovascular System .......... 79
Xiaoming Zhu, Lianhua Fang, Guanhua Du, Ran Zhang, Dongxia Wang, Jinglan Xu and Xiaoying Wang
4.1 The Protection of Danshen Over Heart ............... 79
4.1.1 Improving the Blood Supply of Ischemic Cardiac Muscle .................. 80
4.1.2 Improving the Energy Metabolism of Cardiac Muscle .................. 81
4.1.3 Inhibition of Myocardial Hypertrophy .................. 84
4.1.4 Anti-arrhythmia ................................ 86
4.1.5 Treatment of Viral Myocarditis .................. 86
4.1.6 Summary ........................................... 87
4.2 The Effects of Danshen on Atherosclerosis ............. 87
4.2.1 Regulation of Lipid Metabolism .......................... 87
4.2.2 Prevention of Lipid Peroxidation. 90
4.2.3 Improvement in Functional Disturbance of Blood Vessel Endothelium. 93
4.2.4 The Inhibition of the Expression of Adhesive Molecules and the Antagonism of the Adhesion Between Cells. 95
4.2.5 Inhibition of Vascular Smooth Muscle Cell Proliferation. 97
4.2.6 Regulation of Antithrombotic System, Inhibition of Thrombosis. 99
4.2.7 Calcium Antagonism. 102
4.2.8 Treatment of Coronary Heart Disease and Heart-Stroke. 103
4.2.9 Summary. 104

4.3 The Effects of Danshen on Hypertension and Its Risk Factors. 104

4.4 The Effects on Blood Vessel Endothelium and Smooth Muscle. 108
4.4.1 Danshen’s Protective Effect on Vascular Endothelial Cells. 108
4.4.2 The Effects of Danshen on the Proliferation and Migration of VSMC. 112
4.4.3 Summary. 115

4.5 The Molecular Mechanism of Danshen’s Protection on Myocardial Ischemia-Reperfusion Injuries. 115
4.5.1 The Scavenging of Free Radicals and Prevention of Lipid Peroxidation. 115
4.5.2 Protection of the Cell Membrane. 117
4.5.3 The Prevention of Calcium Overload in the Cells. 119
4.5.4 The Effects of Danshen on Post-ischemia-Reperfusion “No-Reflow” 121
4.5.5 The Effects of Danshen on Myocardial Energy Metabolism. 122
4.5.6 The Effects of Danshen on the Apoptosis of Myocardial Cells and the Expression of Apoptosis Related Genes During Myocardial Ischemia-Reperfusion of Rats. 124

5 Protective Effects of Danshen on Cerebral Vessels and the Nervous System. 129
Guangliang Han, Yuehua Wang, Guanhua Du, Hongmei Guang and Xinrui Cheng
5.1 Pharmacological Action of Danshen to Treat Cerebral Hemorrhage. 129
5.1.1 Overview of Cerebral Hemorrhage. 129
5.1.2 Pharmacological Action of Danshen. 130
5.1.3 The TCM Basis for Using Danshen to Treat Cerebral Hemorrhage 130
5.1.4 The Theoretical and Experimental Basis of Danshen’s Treatment of Cerebral Hemorrhage 130
5.1.5 Inseparable Relationship Between Cerebral Hemorrhage and Cerebral Ischemia 131
5.1.6 Decreasing Intracranial Pressure and Promoting the Absorption of Cephalophyma 132
5.1.7 Improving Hemorheological Characteristics 132
5.1.8 The Timing of Danshen Treatment for Cerebral Hemorrhage 133

5.2 The Effect of Danshen on Learning and Memory Abilities 134
5.2.1 The Effect of Danshen on Promoting the Ability of Learning and Memory 134
5.2.2 The Effect of Tanshinone on Alzheimer’s-Like Disease in Rats 135
5.2.3 Effect of Compound Danshen Preparations on Learning and Memory in Dementia Rats 140

5.3 Pharmacological Effects of Danshen for Treatment of Acute Ischemic Cerebrovascular Disease 144
5.3.1 Mechanism of Action of Danshen in Ischemic Cerebrovascular Disease 144
5.3.2 Summary and Prospect 153

5.4 Protective Effect of Danshen on Cerebral Hemorrhage-Reperfusion Injury 154
5.4.1 Improving Energy Metabolism 154
5.4.2 Clearing Free Radicals 155
5.4.3 Reducing Calcium Overload 156
5.4.4 Inhibiting the Release of Excitatory Amino Acids (EAA) 158
5.4.5 Regulating Immunity and Effects on Cytokines 159
5.4.6 Affecting the Expression of Heat Shock Protein 160
5.4.7 Improving Hemorheology and Microcirculation 161
5.4.8 Inhibiting Apoptosis 161
5.4.9 Improving Learning and Memory Disorders 162

6 Effect of Danshen on the Blood System and Microcirculatory Function
Jingyan Han, Zhixin Guo, Jinhua Wang, Li Zhang and Guanhua Du

6.1 The Effect of Danshen on Microcirculatory Dysfunction Caused by I/R
6.1.1 Danshen Improved the Microcirculatory Dysfunction Caused by I/R
6.1.2 The Improving Effect of Danshen on I/R-Related Injury

6.2 Effect of Danshen on Microcirculatory Dysfunction Caused by Endotoxins
6.2.1 Effect on Diameter of Small Artery and Vein
6.2.2 Effect on Erythrocyte Velocity of the Small Veins
6.2.3 Effect on the Adhesion of Leukocytes to the Small Veins
6.2.4 Inhibitive Effect on Peroxides
6.2.5 Protective Effect on Endovascular Cell Injury
6.2.6 Effect on Mast Cell Degranulation
6.2.7 Inhibitory Effect on Serum Albumin Leakage

6.3 Improving Effects of Danshen on Microcirculatory Dysfunction Caused by Other Factors
6.3.1 Improving Effect on Microcirculatory Dysfunction Caused by Photochemical Reactions
6.3.2 Improving Effect on Microcirculatory Dysfunction Caused by Noradrenaline
6.3.3 Improving Effect on Microcirculatory Dysfunction Caused by Scalding
6.3.4 Improving Effect on Microcirculatory Dysfunction Caused by Noise
6.3.5 Improving Effect on Microcirculatory Dysfunction Caused by Dextran Polymer
6.3.6 Summary

6.4 Research Progress in Danshen’s Effects on the Blood System, Microcirculation, and Hemorheology
6.4.1 Anticoagulation, Promoting Fibrinolysis, and Antithrombosis
6.4.2 Effect on Lipids
6.4.3 The Function of Danshen on Improving Microcirculation and Promoting Hemorheology
6.4.4 Summary
