Part I Biographical Sketches & Science in Context

1 Niccolò Tartaglia and the Renaissance Society Between Science and Technique	3
1.1 Niccolò Fontana Called Tartaglia	3
1.1.1 Biographical and Scientific Sketches	4
1.1.1.1 The Roots	12
1.1.1.2 Tartaglia's Education	14
1.1.1.3 Arnaldo Masotti, Tartaglia's Modern Editor	17
1.1.2 Tartaglia's Conceptual Stream in the Renaissance	19
1.1.2.1 Mathematics: The Third Degree Equations	20
1.1.2.2 On the Geometry: Euclid's <i>Elements</i>	31
1.1.2.3 On the Arithmetics: Tartaglia's Triangle	35
1.1.2.4 On Physics: Ballistics	39
1.1.3 Physics and Architecture: On Ballistics & Fortifications	49
1.1.3.1 On Ballistics & Technical Instruments in the <i>Nova Scientia</i>	49
1.1.3.2 The <i>Sesto Libro</i> on Fortifications	71
1.1.3.3 The <i>Gionta del Sesto Libro</i>	75
1.1.3.4 The <i>Gionta del Sesto Libro</i> and Architecture	80
1.1.4 On the <i>Opera Archimedis</i> and <i>Archimedis de insidentibus aquae</i>	87
1.1.4.1 On the <i>Opera Archimedis</i> (1543)	87
1.1.4.2 On the <i>Archimedis de insidentibus aquae</i> (1543; 1565)	92

1.1.5	Contents, Former Pupils and Philological Notes	95
1.1.5.1	A Content of <i>Quesiti et inventioni diverse</i>	98
1.1.5.2	Scholars, Former Pupils, Correspondence and Commentaries in <i>Quesiti</i> and Around Tartaglia's Science	99
1.1.5.3	Philological Notes and a Historical Hypothesis	102
2	Ancient and Modern Statics in the Renaissance	113
2.1	The Background	113
2.1.1	The <i>Scientia de ponderibus</i> in the Middle Ages	114
2.1.1.1	The Roots in the Arabic Middle Ages	115
2.1.1.1.1	Thābit's Kitāb fī il-qarastūm	117
2.1.1.2	Continuation in the Latin Middle Ages	119
2.1.1.2.1	Jordanus de Nemore's Liber de ratione ponderis	122
2.1.2	Revival During the Age of Humanism	127
2.1.2.1	A Variety of Approaches to Mathematics	128
2.1.2.2	The Emergence of a New Type of Intellectual Technician: The Engineer	133
2.1.2.3	Leonardo da Vinci's Science of Weights	134
2.1.2.3.1	Powers: Gravity and Force	138
2.1.2.3.2	The Balance and Lever	143
2.1.2.3.3	The Inclined Plane Law	149
2.1.2.3.4	The Pulley, Block and Tackle	152
2.1.2.3.5	The Concept of <i>Momento</i> of a Force	156
2.1.2.3.6	The Law of Composition of Forces	159
2.1.3	Tartaglia's Legacy. A Transition between Science of Weights and Modern Statics	163
2.1.3.1	Statics in Italy During the XVI Century	164
2.1.3.1.1	Giovanni Battista Benedetti	166
2.1.3.1.2	Guidobaldo del Monte	170
2.1.3.1.3	Galileo Galilei	174
2.1.3.2	Stevin's Legacy. The Circulation of Statics in Europe	180
2.1.3.2.1	The Law of the Inclined Plane	182
2.1.3.2.2	Forces' Composition: The Rule of Parallelogram	185

Part II History & Historical Epistemology Analyses

3 The Analysis of Books VII and VIII of *Quesiti et inventioni diverse* 191

3.1 A Historical Epistemology Outline on Early Statics
in *Books VII* and *VIII* 191

3.1.1 The Analysis of *Book VII* (1554) 193

3.1.1.1 The Aristotelian Mechanical Problems 194

3.1.1.1.1 The Accuracy of Balances 194

3.1.1.1.2 The Stability of Balances 196

3.1.1.2 The First Three *Quesiti* on Accuracy 198

3.1.1.3 The Last Four *Quesiti* on Stability 202

3.1.1.3.1 The Balance with Fulcrum Above
the Beam 203

3.1.1.3.2 The Balance with Fulcrum Below
the Beam 205

3.1.1.3.3 The Balance with Fulcrum Inside
in the Beam 206

3.1.2 The Analysis of *Book VIII* 207

3.1.2.1 The *Book VIII* and *Liber de ratione ponderis*.
A False Controversy? 209

3.1.2.2 The *Liber de ratione ponderis* 211

3.1.2.2.1 The Suppositions of *Liber de
ratione ponderis* 212

3.1.2.2.2 The Propositions of *Liber de
ratione ponderis* 218

3.1.2.3 The Structure of *Book VIII* 225

3.1.2.3.1 On the Roots of Notional
Elements in Tartaglia’s *Corpus* 225

3.1.2.3.2 The Definitions of *Book VIII* 227

3.1.2.3.3 The Petitions of *Book VIII* 229

3.1.2.3.4 The Propositions of *Book VIII* 231

3.1.2.4 The Proofs of *Propositions* 239

3.1.2.4.1 Propositions I–IV: *Gravitas
Secundum Situm* 239

3.1.2.4.2 Propositions V–VI: Balance with
Equal Weights and Arms 241

3.1.2.4.3 The Proposition VII: Balance
with Equal Weights and Different
Arms 248

3.1.2.4.4 Propositions VIII: Law of Lever 249

3.1.2.4.5 Propositions IX–XIII: Balance
with Distributed Weights 250

3.1.2.4.6 Propositions XIII–XV: Law
of Inclined Plane 254

Part III Translations & Transcriptions

4 Translation and Transcription 261

4.1 General Considerations 261

4.1.1 *Quesiti et inventioni diverse* (1554) 262

4.1.1.1 Tartaglia’s Language 262

4.1.2 Philological Notes on *Iordani opusculum de ponderositate* (1565) 263

4.1.3 *Book VII of Quesiti et inventioni diverse* (1554) 265

4.1.3.1 The Facsimile and English Translation 265

4.1.4 *Book VIII of Quesiti et inventioni diverse* (1554) 284

4.1.4.1 The Facsimile and English Translation 284

4.1.5 The Italian Critical Transcriptions 348

4.1.5.1 Book VII (1554) 348

4.1.5.2 Book VIII (1554) 358

4.1.6 *Iordani opusculum de ponderositate* (1565) 390

4.1.6.1 The Facsimile and Critical English Translation 390

4.1.6.2 The Latin Critical Transcription 416

Part IV Circulation of Knowledge & Conclusion

5 Foreign Editions of *Quesiti et inventioni diverse* 457

5.1 An Outline 457

5.1.1 *Quesiti* Foreign Editions 458

5.1.1.1 The Foreign Editions, 1547–2010 458

5.1.2 Bibliographical Notes 461

5.1.2.1 Uncertain Dates Around Partial and/or Alleged *Quesiti*’s Editions 461

6 Conclusion 465

6.1 Concluding Remarks 465

References 467

Microfilm Tartalea 489

Main *Quesiti* Accounts 491
