

Contents

1 Introduction	1
1.1 About protocells	1
1.2 Why modelling protocells	3
1.3 Collective self-replication	5
1.4 Self-replication in a vesicle	7
1.5 Self-replication in a reproducing protocell	11
2 Generic Properties of Dynamical Models of Protocells	15
2.1 Introduction	15
2.2 Generic Properties of Biological Systems: Data	17
2.3 Generic Properties of Biological Systems: Concepts	19
2.4 What shall we model	24
3 Dynamical Models of Protocells and Synchronization	29
3.1 Simplified surface-reaction models of protocells	29
3.2 Synchronization in surface reaction models	32
3.3 Several linearly interacting replicators	41
3.4 Several interacting replicators with nonlinear interactions	48
3.5 Internal reaction models	52
4 Models of Self-Replication	61
4.1 Introduction	61
4.2 Autocatalytic sets	65
4.3 The properties of some replication models	70
4.3.1 Quasispecies and the error catastrophe	70
4.3.2 Hypercycles	74
4.3.3 The arrival of new species from outside	77
4.4 Products and substrates	80
4.4.1 Synthesizing catalysts and substrates	80
4.4.2 The rise of autocatalytic structures	82
4.4.3 The dynamical model	84

- 4.4.4 The Experiments 88
- 4.4.5 An Unexpected Fragility 93
- 4.5 Reflexive Autocatalytic Food-Generated (RAF) Sets 94
 - 4.5.1 RAF Sets in Kauffman Random Topologies 98
 - 4.5.2 A Taxonomy of RAF Sets 100
- 5 A Stochastic Model of Growing and Dividing Protocells 105**
 - 5.1 Semipermeable Protocells 107
 - 5.2 The Role of Active Membranes 112
 - 5.3 The Effects of Passive Membranes 116
 - 5.4 Coupled Dynamics of RAFs and Protocells 121
 - 5.4.1 RAFs in Different Chemistries 122
 - 5.4.2 Synchronization. 123
 - 5.4.3 Interactions Among RAFs in the Same Protocell 128
 - 5.4.4 Spontaneous Reactions 131
 - 5.5 Maintaining Novelties. 133
 - 5.6 A Comment on Evolvable Populations of Protocells 139
 - 5.7 Appendix 141
 - 5.7.1 The Chemical Reaction System. 142
 - 5.7.2 The Exchange with the Environment 144
 - 5.7.3 The Protocell Splitting Process 147
- 6 Conclusions, Open Questions and Perspectives 149**
 - 6.1 Introduction 149
 - 6.2 The Hypothesis of Spontaneous Fission and Synchronization. 153
 - 6.3 The Formation of Self-Sustaining Autocatalytic Cycles 158
 - 6.4 The Role of Membranes. 163
 - 6.5 A Virtual Laboratory 165
- Bibliography 169**
- Index 179**

Modelling Protocells

The Emergent Synchronization of Reproduction and
Molecular Replication

Serra, R.; Villani, M.

2017, XV, 182 p. 46 illus., 33 illus. in color., Hardcover

ISBN: 978-94-024-1158-4
