## Contents

1 The Helmholtz Conditions and the Method of Controlled Lagrangians ........................................ 1  
   Anthony M. Bloch, Demeter Krupka and Dmitry V. Zenkov

2 The Sonin–Douglas Problem ........................................ 31  
   Demeter Krupka

3 Inverse Variational Problem and Symmetry in Action:  
   The Relativistic Third Order Dynamics  ......................... 75  
   Roman Ya. Matsyuk

4 Variational Principles for Immersed Submanifolds . ............ 103  
   Zbyněk Urban

5 Source Forms and Their Variational Completions ................. 171  
   Nicoleta Voicu

6 First-Order Variational Sequences in Field Theory .............. 215  
   Jana Volná and Zbyněk Urban

Index ................................................................. 285
The Inverse Problem of the Calculus of Variations
Local and Global Theory
Zenkov, D.V. (Ed.)
2015, IX, 289 p. 3 illus. in color., Hardcover
A product of Atlantis Press
