# Contents

1 Introduction .......................................................... 1

2 Formulation of the Problem ......................................... 5
   2.1 Notations, Definitions and Auxiliary Results ................ 6

3 Fundamental Solution of the Evolution Problem ................ 9
   3.1 Fundamental Solution of the Non-steady “Rotating”
       Oseen Problem .............................................. 9
   3.2 Basic Properties of the Fundamental Solution ............... 16
   3.3 Further Properties of $\Gamma_{jk}$ ............................. 18
       3.3.1 Technical Lemmas ...................................... 18
       3.3.2 Pointwise Estimates of $\Gamma_{jk}$ ...................... 18

4 Fundamental Solution of the Stationary Problem ............... 25

5 Representation Formula ............................................... 39
   5.1 Heuristic Approach .......................................... 39
   5.2 Mathematical Preliminaries to the Representation Formula .... 41
   5.3 Derivation of the Representation Formula .................... 44

6 Asymptotic Behavior .................................................. 49
   6.1 Some Volume Potentials ...................................... 49
   6.2 Asymptotic Profile .......................................... 52
   6.3 Representation Formula for the Navier–Stokes System ....... 69
   6.4 Asymptotic Profile of the Gradient of the Velocity Field .... 70
   6.5 Decay Estimates of the Second Derivatives of the Velocity .... 72

7 Leray Solution .......................................................... 75
   7.1 Introduction .................................................. 75
   7.2 Auxiliary Results ............................................ 76
   7.3 Representation Formula for the Leray solution ............... 77
   7.4 Asymptotic Profile of the Linear Case ......................... 80
   7.5 Representation Formula for the Nonlinear Case ............... 82
Navier-Stokes Flow Around a Rotating Obstacle
Mathematical Analysis of its Asymptotic Behavior
Necasova, S.; Kramar, S.
2016, X, 96 p., Softcover
A product of Atlantis Press
