

Contents

Enhancing the Performance of Multi-parameter Patient Monitors by Homogeneous Kernel Maps	1
S. Premanand and S. Sugunavathy	
Augmenting the Performance of Multi-patient Parameter Monitoring System in LKSVM	9
S. Premanand and S. Sugunavathy	
An Efficient Classification Model Based on Ensemble of Fuzzy-Rough Classifier for Analysis of Medical Data	19
M. Sujatha, G. Lavanya Devi, N. Naresh and K. Srinivasa Rao	
A Comparative Study of Various Minutiae Extraction Methods for Fingerprint Recognition Based on Score Level Fusion	29
P. Aruna Kumari and G. JayaSuma	
Hybrid Model for Analysis of Abnormalities in Diabetic Cardiomyopathy	43
Fahimuddin Shaik, Anil Kumar Sharma and Syed Musthak Ahmed	
Computational Screening of DrugBank DataBase for Novel Cell Cycle Inhibitors	61
Satyanarayana Kotha, Yesu Babu Adimulam and R. Kiran Kumar	
Pathway Analysis of Highly Conserved Mitogen Activated Protein Kinases (MAPKs)	71
N. Deepak, Yesu babu Adimulam and R. Kiran Kumar	
Identification of Drug Targets from Integrated Database of Diabetes Mellitus Genes Using Protein-Protein Interactions	83
Duggineni Kalyani, Naresh Babu Muppalaneni, Ch Ambedkar and Kiran Kumar Reddi	
Distributed Data Mining for Modeling and Prediction of Skin Condition in Cosmetic Industry—A Rough Set Theory Approach	87
P.M. Prasuna, Y. Ramadevi and A. Vinay Babu
