

Contents

| | |
|--|-----|
| 1 Steric and Stereoelectronic Control of Organic Molecular Structures and Organic Reactions | 1 |
| 1 Influence of Steric Effects on Structures | 1 |
| 2 Influence of Stereoelectronic Effects on Reactions | 6 |
| 3 Evaluation of the Numerical Value of Anomeric Effect | 28 |
| 4 Influence of Anomeric Effect on Conformational Preferences | 29 |
| 5 Influence of Anomeric Effect on Conformational Reactivities | 35 |
| 6 Conformations of Mono and Dithioacetals | 40 |
| 7 Conformations of Mono and Diazaacetals | 43 |
| References | 44 |
| 2 Reactions at Saturated and Unsaturated Carbons | 47 |
| References | 68 |
| 3 Diastereoselectivity in Organic Reactions | 71 |
| 1 Cram's Model for Asymmetric Synthesis | 72 |
| 2 Anh–Felkin Modification of Cram's Model for Asymmetric Synthesis | 72 |
| 3 Cieplak's Model for Diastereoselectivity | 76 |
| 4 Houk's Transition State and Electrostatic Models for Diastereoselectivity | 83 |
| 5 Cation Coordination Model for Diastereoselectivity | 86 |
| References | 100 |
| 4 A^(1,2) and A^(1,3) Strains | 103 |
| 1 Introduction | 103 |
| 2 A ^(1,2) Strain | 105 |
| 3 Stereocontrol in Reactions on Account of A ^(1,2) Strain | 109 |
| 4 A ^(1,3) Strain | 111 |
| 5 Stereocontrol in Reactions on Account of A ^(1,3) Strain | 113 |

Steric and Stereoelectronic Effects in Organic
Chemistry

Yadav, V.K.

2016, XI, 211 p. 300 illus., 83 illus. in color., Hardcover

ISBN: 978-981-10-1138-2
